Haydn is, therefore, not only indispensable to the journalist, to every public and private library, but to everyone who desires, either in public or private life, to possess an intelligent acquaintance with

ABYSSINIA, the country of the Habes, N.E. Africa. Its ancient history is very uncertain.

The kingdom of the Axumite (its chief town Axum) flourished in the 1st and 2nd centuries after Christ. Christianity was introduced about 324 by Frumentius, consecrated Bishop of Abyssinia by St. Athanasius. Between 470 and 490 monasteries were established. In 522 Cola, king of Abyssinia, at the request of the emperor Justinian, conquered Yemen. The Ethiopians possessed at that time the richest part of Arabia, traded to India, and were in constant communication with Greece. In the 7th century the Mohammedans expelled them from Arabia, and by force conquered the country of Egypt, which the civilized world. About 990, Judith, a Jewish princess, murdered a great part of the royal family, and reigned forty years. The young king escaped; and the royal house was restored in 1268 in the person of his descendant Iron Amine. In the middle ages it was said to be ruled by Prester John, or Prete Jamin. The Portuguese missions, commenced in the 13th century, after much struggling against opposition, were expelled about 1553. The encroachments of the Gallas and intestine disorders soon after broke up the empire into petty governments. From the visits of James Bruce, 1768-73; Henry Salt, 1809—10; Edward Dodwell, 1813; major Harris, 1841; Mankfield Parkins, 1844—7, much information respecting Abyssinia has been gained. Several expeditions into Abyssinia have been organised by the French government. The brothers Antoine and Arnauld Abbadie visited the country 1852—5. Abyssinia was divided into four provinces. In 1857 Rev. Alexander of Tigré and Sumien; and Sahela Schass of Shoo. Population between 3,000,000 and 4,000,000. The ruler of Abyssinia is termed Negus, a title dating from the 13th century.

ACCLIMATIZATION OF ANIMALS. This has been prosecuted with great vigour since the establishment of the Zoological Society of London in 1832, and of the Société d'Acclimatation in Paris. Numbers of foreign animals have been naturalised in Australia; the camel has been conveyed to Brazil (1858); alpacas are bred at Paris; and ostriches in Italy (1860). On 6 Oct. 1860, le Bois de Boulogne, near Paris, was opened as a zoological garden, containing only acclimatised animals. An acclimatising garden was established at Melbourne, Australia, in Feb. 1871, and efforts made to naturalise English birds, fishes, &c. See Fish and Climate.

ACCUSERS. By occult writers, such as Agrippa, accusers are the eighth order of devils, whose chief is called Astraea, or Spy. In Revelation xi., a spion is defined as the accuser of the brethren."—False accusers were to be hanged, by 24 Henry VI. 1446; and burnt in the face with an F, by 37 Henry VIII. 1545. Stow.

ACEPHALI (Greek a, no; cephalis, head), a term applied to certain sects who resisted their bishops and met privately, about 450; and also in canon law applied to such bishops, clerks, monks, &c., as claim or enjoy independence of the jurisdiction of the ordinary or metropolitan.

ACETYLENE, a luminous hydrocarbon gas resembling coal gas, discovered by Brelchet. First made in 1836, from potassium carbide by Edmund Davy. In 1862 Wohler discovered that carbide of calcium treated with water produced lime and acetylene. Over 25,000,000 have been invested in carbide plants in Canada and the United States (1906). The demand for acetylene for lighting purposes seems to be capable of indefinite expansion; its most familiar use is for cycle and motor lamps, but it is also applied to houses, railway trains (all the Canadian Pacific trains are lighted with it), and other purposes.

ACHAEUS, a dynasty of Persian kings of which Cyrus the Great was the founder. It was overthrown by Alexander the Great.

Pela, Pella, Egeria, Serium, Bera, Tritia, Leontium, Rhyipes, Cerynea, Olene, Helice, Patra, Dyne, and Phaira, forming the Achaean League.

ACHEEN, capital of a kingdom N. W. of Sumatra, was visited by the Portuguese about 1509. Factories were set up here by the Dutch, 1565; by the English, 1602; by the French, 1621. For the war with the Dutch, see Sumatra.

The Trea of Sunderland, with sugar from Sumbawa, stranded on territory of the chief of Yansah, a Malay department of Sumatra, the rajah of Tenon, subject to the sultan of Acehn, 16 Nov. 1883. 18 British and 6 foreign sailors made prisoners; the captain released to negotiate; efforts to obtain their release, but British demands and proof of wanton, in-telec; the Dutch storm Tenon, but prisoners carried off, 7 Jan. 1884.

H. M. S. Pegase sent there. The rajah demands free trade, and desires subjection to Great Britain. Earl Granville reported conclusion to the Dutch government, announced May, 1884. See under Mansion House.

Eighteen prisoners released 17 Sept., arrived in the Thames, 26 Oct. 1884.

ACHONRY, StIANGE (N. Ireland), a bishopric founded by St. Finian, who erected the church of Achad, or Achorny, about 520, and conferred it on his disciple Nathly (Dathly, or David), the first bishop. The see, held with Killala since 1612, was united with Tuam in 1834.

ACHROMATIC TELESCOPES, in which colour is got rid of, were invented by John Dollond, and described in Phil. Trans. of the Royal Society, London, 1753-8.

ACIDS (now defined as salts of hydrogen) are generally soluble in water, render organic blues, decompose carbonates, and destroy the properties of alkalies, forming alkaline salts. The number of acids was increased by the Arabs; Geber (8th century) knew nitric acid and sulphuric acid. Theories of the constitution of acids were put forth by Boucher (1669), Lemery (1675), and Stahl (1723). After the discovery of oxygen by Priestley, 1 Aug. 1774, Lavoisier (1778) concluded that oxygen was a constituent of all acids; but about 1810 Davy, Gay-Lussac, and others, proved the existence of acids free from oxygen. In 1816 Dulong proposed the binary or hydrogen theory of acids, and in 1837 Liebig applied the theories of Davy and Dulong to explain the constitution of several organic acids. Oxygen acids were termed anhydrides by Gerhardt (died 1850). Many acids have been discovered through the advance of organic chemistry.

ACOYLES, an inferior order of clergy in the Latin church, unknown to the Greek church for four hundred years after Christ.

ACOUSTICS (from akous, Greek, I hear), the science of sound, so named by Sauvée in the 17th century. The formation of sound in the air by the vibrations of the atmosphere, strings, &c., was explained by Pythagoras about 500 B.C., and by Aristotle, 330 B.C. See Telephone, Microphone, Megaphone.

The speaking trumpet said to have been met by Alexander the Great, 335 B.C. Galileo's discoveries, about A.D. 1600.

His theorem of the harmonic curve demonstrated by Dr. Brook Taylor, in 1714; further perfected by J. Almeibert, Euler, Bernouilli, and La Grange, at various periods of the eighteenth century.

Booke calculated the vibration of sounds by the striking of the teeth of brass wheels, 1681.

Saunier determined the number of vibrations belonging to given note, about 1794.

Velocity of sound said to be 1773 feet in a second, by Gascoign; 1772 feet by Cassini, Roman, and others; 1826 feet by Newton, 1600 feet, at the temperature of 70 Fahrenheit, by Tyndall; the velocity increases with the rise of temperature.

Chladni (who raised acoustics to an independent science) published his important discoveries on the figures produced in layers of sand by harmonic chords, &c., in 1787, and since.

Cagniard-Latour invented the Sierra (which see), 1819.

Savart determined the range of the perception of the human ear to be from 7 to 24,000 vibrations a second, 1830.

Biot, Savart, Wheatstone, Lissajous, Helmhotz, Tyndall, Lord Rayleigh, and others in the 19th century have greatly increased our knowledge of acoustics.

Overtones, harmonics, well investigated by Helmholtz; overtones by Airy, 1859.

Tyndall's experiments showed that the panloral-marine gun with gun-cotton, and that of sir Richard Collinson's gun-cotton rocket, are very effective fog-guns. Fine-grain gunpowder, with howitzers is the best sound-producer; pebble powder the worst, 1854.

Sound produced by electricity, light, and from radiant heat, see Telephone and Photophone, 1851.

Mr. A. Stock exhibits the attraction and repulsion (resonating magnetic) produced by somnorous vibrations in tubes to the Telegraph Engineers, 27 April, 1852.

ACRE, a land measure, formerly of uncertain quantity, and differing in various parts of the country, was reduced to a standard by Edward I., about 1305. In 1824 the standard acre was ordered by statute to contain 4840 square yards.

ACRE. Acre, anciently Podemis, in Syria, was taken by the Saracens in 698; by the crusaders under Baldwin I. in 1101; by Saladin in 1187; and captured again by Richard the Lionheart, and held by the Christians till 1191, after a siege of two years, with a loss of 6 archbishops, 12 bishops, 40 earls, 500 barons, and 300,000 soldiers. It was then named St. Jean d'Are. It was retaken by the Saracens in 1291, when 60,000 Christians perished, and the nuns, who had mangled their faces, were put to death. Acre was gallantly defended by Byzanz Pacha against Bonaparte, till relieved by sir Sidney Smith, who resisted twelve attempts by the French, between 16 March and 20 May, 1799, when Bonaparte retreated. Acre, as a Turkish pachalic, was seized 27 May, 1842, by Ibrahim Pacha, who had revolted. On 5 Nov. 1840, it was stormed by the allied fleet under sir Robert Stopford, and taken after a bombardment of a few hours, the Egyptians losing upwards of 2000 in killed and wounded, and 3000 prisoners, while the British had but 12 killed and 42 wounded; see Syria and Turkey.

The act was restored by William III., 1698.

The work was resumed by the Jesuits in 1837, and 6 more volumes had been published in 1867. The writers have been named Bolducistes, from John Bolduc, who published the first two volumes.

ADMINISTRATIONS.

the privy council became greater during the reign of William III. His ministers included both Whigs and Tories, and their dissensions led to much maladministration, civil, military, and naval, and consequent public political reverses. These therefore compelled to have a united ministry, at first wholly composed of Whigs. The change was gradually effected, 1644-6. The control of the chief, now termed the "premier," began in the reign of Anne. ADMIRALTY OFFICE. 14

ADMIRALTY OFFICE. 14

ADMIRALTY OFFFICE dates from 1312, when Henry VIII. appointed commissioners to inspect his ships of war. During the Commonwealth the admiralty affairs were managed by a committee of the parliament; and at the restoration in 1660, James, duke of York, became lord high admiral. In 1682 the admiralty first put into commission the great officers of state being the commissioners; see succeeding changes below. In 1688-9 the French admiral is said to have been offered £1284. The rank of admiral of the English sea was first given to William de Leybourne by Edward I. in 1297. Speelman; Rymer. The first Lord High Admiral in England was created by Richard II. in 1385; there had been previously high admirals of districts—the north, west, and south. The duties have generally been executed by lords commissaries; see Admistration, A. of Scotland from the reign of Robert III. In 1673, Charles II. bestowed it upon his natural son Charles Lennox, afterwards duke of Richmond, then an infant, who resigned the office to the crown in 1703; after the union it was discontinued.—The dignity of lord high admiral of Ireland (of brief existence) was conferred upon James Bruce, 12th Duke of Buccleugh. It was repaired and strengthened by Severus, 207-210.

Adrian was taken by the Turks under Amurath in 1534, and was their capital till the capture of Constantinople in 1535. It was taken by the Russians on 20 Aug. 1828, and restored 14 Sept. same year; after the capture of the Turkish army in the Shipka pass it was occupied by the Russians without resistance, 20 Jan. 1878, Population 1857, 7,086; 1910, about 8,500. They did not vote together uniformly in 1865, and lord Eldon and Mr. W. kept excepted with Mr. Gladstone, for the disestablishment of the Irish church 1 May, 1867.

ADULTERATION. That food was prohibited in England in 12th, and punishments for it enacted, 1581, 1604, 1803, 1821, &c. Much attention was drawn to it in 1822, through Mr. Acland's efforts, and called "Death in the Pot," and in 1825, through Dr. Hassall's book, "Food and Its Adulterations." By an act for preventing the adulteration of food, passed in 1860, the chemical analysts may be appointed. An act to prevent adulteration of seeds passed 16 Aug. 1866, amended 1878. Another to prevent adulteration of food and drugs passed 20 Aug. 1872. Penalties for adulterating liquors were imposed by the new licensing act passed same time. The report of a commission, issued in July, 1874, declared that the public "were cheated rather than poisoned." All the anti-adulteration acts were repealed by the Sale of Food and Drugs Act, passed 11 Aug. 1877, which was amended in 1878. The duty of the licensing authority was made larger late sale of margarine, 6 Aug. 1879. The report of the select committee appointed in 1894, with suggestions, was issued in July, 1899.

ADULTERY was punished with death by the law of Moses (Deut. xxi. 21, 22; Lev. xx. 21, 22) — and by Lycurgus 384 B.C. The early Saxons burnt the adulterers, and erected a gibbet over her ashes, whereas they hanged the adulterer. The ears and nose were cut off under Conists, 1311. Adultery was ordained to be punished capital by the parliament, May 14, 1540; but there is no record of this law taking effect; and it was repealed at the restoration. In New England the punishment for adultery was made capital to both parties, and several suffered for it, 1602. Hardie. Till 1857 the legal redress against the male offender was by civil action for a money compensation; the female being liable to divorce. By 20 & 21 Vict. c. 85 (1857) the "action for criminal conversation" was abolished and the suit for Divorce and Matrimonial Causes established with power to grant divorces for adultery and ill usage; see Divorce. An act was passed in 1899 permitting parties to suits for adultery to give evidence.

ADVOWSONS, right of a presentation to a church living. First recorded instance in 448, when a bishop was permitted by the council of Orange to nominate a clerk to a church he had built outside his diocese. Advowsons were allowed in the 6th cent. (123 Novel of Justinian). Patronage has grown as part of the feudal system. The Deercats stated that if with the consent of the bishop any man built a church he acquired the right of patronage. In Thomas à Becket's time presentations were often made against the will of the bishop, and for money payments. Exchange of advowsons is now regulated by various acts, notably 23 & 24 Vict. c. 124, 1860, 31 & 32 Vict. c. 114, and 33 & 34 Vict. c. 39, 1860-70. See Benefice.

ESTHETICISM, an art movement to carry the love of the beautiful into home-life, sprang up during the latter part of the 19th century. It was strongly supported by Mr. Ruskin, sir (b. 1819) Frederick Leighton, Mr. (b. 1799) Alma-Tadema, Mr. Holman Hunt, Mr. (b. 1819) P. Burne-Jones, Mr. (b. 1812) Rossetti, and others associated with the Pre-Raphaelite movement (called so). The elastic extravagances of some of the followers of the cult were cleverly hit off by Gilbert and Sullivan in "Patience," produced in 1881, and satirized in Punch about that period. The influence of Estheticism has been in the improvement of decorative art in modern houses, and increased artistic refinement.

AGAPE (αγάπη, Greek for love, charity), "feasts of charity," referred to Jud. 12, and described by St. Paul as the tribunal of all rank-as one family partook, as Christ did with his disciples. Disorders creeping in, these feasts were forbidden to be celebrated in churches by the councils of Laodicea (364) and Carthage (396). They are still recognised by the Greek church, and held in their original form weekly by the Gloses and some other Churches, in such degree by the Moravians, Wesleyans, and others.

AGE. Chronologers have divided the time between the creation and the birth of Christ into ages. Hesiod (735 B.C.) described the Golden, Silver, Bronze, Heroic, and Iron Ages; Ovid (43 B.C. to A.D. 18 A.D.) in his enumeration the Heroic Age; see Dark Ages.

FIRST AGE (from the Creation to the Deluge) B.C. 4004-2349
SECOND AGE (to the coming of Abraham into Canaan) 2348-1977
THIRD AGE (to the Exodus from Egypt) 1971-1497
FOURTH AGE (to the founding of Solomon's Temple) 1490-1014
FIFTH AGE (to the capture of Jerusalem) 1004-583
SIXTH AGE (to the birth of Christ) 582-4
SEVENTH AGE (to the present time)

ARCHAEOLOGICAL AGES. The various stages through which man has passed in the process of development and civilisation are divided into the Stone Age—(a) Palaeolithic, rough stone cutting tools and weapons; (b) Neolithic, polished stone implements—the Bronze Age (with an Age of Copper in place of, or in addition to, the Age of Bronze), and (c) the Iron Age, the two last characterised by tools and weapons of such materials. No sharply defined chronological division can be made between these Ages, the Stone Age of one area sometimes co-existing with that of the Bronze or Iron Age of another area of the same period.

AGE. In Greece and Rome twenty-five was full age for both sexes, but a greater age was requisite for the holding certain offices: e.g., thirty for tribunes; forty-three for consuls. In England the majority of a male terminates at twenty-one, and of a female in some cases, as that of a queen, at eighteen. In 1547, the majority of Edward VI. was, by the will of his father, fixed at eighteen years; previously to completing which age, his father, Henry VIII., had assumed the reins of government, in 1509. A male of twelve may take the oath of allegiance; at fourteen he may consent to a marriage, or choose a guardian; at seventeen he may be an executor, and at twenty-one he is of age; but according to the Statute of Wills, 7 Will. IV. & 1 Vict. c. 20, 1857, no will made by any person under the age of twenty-one years shall be valid. A female at twelve may consent to a marriage, at fourteen she may choose a guardian, and at twenty-one she is of age.

Of the French, there were, according to some accounts, 10,000 killed, including the dukes of Alençon, Brabant, and Bar, the archbishop of Sens, one marshal, thirteen earls, ninety-two barons, and 15,000 knights; and 14,000 prisoners, among whom were the dukes of Orleans and Bourbon, and 500 barons and knights. The English lost the duke of York, the earl of Suffolk, and about 20 others. St. Rémy asserts with more probability that the English lost 1600 men. Henry V. soon after obtained the kingdom of France.

AGITATORS (or Adjutators), officers appointed by the Parliamentary army in 1647, to take care of its interests: each troop or company had two. The general Cromwell was eventually obliged to repress their seditious power. At a review he seized the ringleaders of a mutiny, shot one instantly, in the presence of his companions, and the forces on the ground, and thus restored discipline. Hunne. — Daniel O'Connell, the agitator of Ireland, was born in 1775. He began to agitate at the elections in 1826; was elected for Clare, 5 July, 1828; the election being declared void, he was re-elected 30 July, 1829. After the passing of the Catholic Emancipation bill he agitated in vain for the repeal of the union, 1831 to 1843. He died 15 May, 1847. — Richard Cobden and John Bright were the chief Anti-corn-law agitators, 1814—45.—Mr. Bright became a Reformer agitator in 1866.

**AGRARIAN LAW** (Apparitio lex), decreed an equal division among the Roman people of all the lands acquired by conquest, limiting the acres which each person should enjoy. It was first proposed by the consul Spurius Cassius, 386 B.C., and was carried in office in 278 B.C. — An agrarian law was passed by the tribune Licinius Libo, 379; and for proposing further amendments Tibullus Graccus in 133, and his brother Cornelius in 121, were murdered. Livius Drusus, a tribune, was murdered for the same cause. Oct. Julius Cesar propitiated the plebeians by passing an agrarian law in 50. In modern times the term has been misinterpreted to signify a division of the lands of the rich among the poor, frequently proposed by demagogues, such as Gracchus Robert, editor of the *Tribun du Peuple*, in 1794. In 1797 he occupied against the directory with the view of obtaining a division of property, was condemned, and killed himself, 27 May, 1797. *Agrarian league*, see *Greendo*, 1896.

AIR or ATMOSPHERE. Anaximenes of Miletius (530 B.C.) declared air to be a self-existent deity, and the first cause of everything created. Posidonius (about 79 B.C.) calculated the height of the atmosphere to be 800 stadia. The pressure of air, about 15 lb. to the square inch, was discovered by Galileo, 1581, and demonstrated by Torricelli (who invented the barometer) about A.D. 1645; and was found by Pascal, in 1647, to vary with the height. Halley, Newton, and others, up to the present time have illustrated the agency and influences of this great power by various experiments, and numerous inventions have followed; among others, the Air-Gun of Guter of Nuremberg about 1656; the Air-Pump, invented by Otto von Gruicke of Magdeburg about 1679; improved by Robert Boyle in 1657, by Robert Hooke about 1669; & the Air-PIPE, invented by Mr. Sutton, a brewer of London, about 1756. The density and elasticity of air were determined by Boyle; and its relation to light was demonstrated by Newton, and Derham. The extension of our atmosphere above the surface of the earth, has been long considered as about 45 miles.—Its composition, air, about 77 parts of nitrogen, 21 parts of oxygen, and 2 of other matters (such as carbonic acid, water vapour, a trace of ammonia, &c.) was ascertained by Priestley (who discovered oxygen gas in 1774), Scheele (1775), Lavoisier, and Cavendish; and its laws of refraction were investigated by Dr. Bradley, 1737.

The researches of Dr. Schonbein, a German chemist of Basel, between 1830 and 1850, led to his description of two states of the oxygen in the air, which he calls ozone and azote. In Aug., 1879, at Oxford, Lord Rayleigh and Professor Ramsay reported to the British Association their discovery of a new

† Air, as well as its gaseous components, has been compressed—by the liquid state by means of pressure and intense cold, 1858, by Raoul Pictet of Geneva, and Callot of Paris, Dec. 1857, Jan. 1878. Mr. Edward Field, in his new motive power, introduced a small volume of steam into a large volume of heated air, and obtained an economy of 12 to 20 per cent. of steam. The system was exhibited in London, July, 1859.

ALADJRA DÂGH, near Kara, Armenia. Here the Turks, under Ahmed Mukhtar, after severe conflicts, were totally defeated by the Russians under the grandduke Michael, and generals Loris Meckoff, Lazareff, and Heimann, 11, 15 Oct. 1877.

The Turkish army was divided and broken up, the strong camp taken, with many prisoners, including 7 peshas and 8 guns. The Russian strategy was highly commended. This overwhelming defeat, and the increase in the strength of the fleet, led to the investment of Karns, attributed to Mukhtar's maintaining too extended lines which were turned (20 miles with only 40,000 men; when 200,000 were required).

ALBANS, ST. (Hertfordshire), near the Roman Verulam, derived its name from Alban the British protomartyr, said to have been beheaded during the persecution by Diocletian, 23 June, 286. A stately monastery to his memory was erected about 795, by Offa, king of Mercia, who granted it many privileges. Its superior sat as premier abbot in parliament till the dissolution in 1539. A meeting was held 22 June, 1871, to raise a fund for the restoration of the abbey. The results were favourable, and the work was confided to Mr. G. Gilbert Scott. The work was carried on under the superintendence of Sir Edmund Beckett (Lord Grimthorpe 1888; d. 29 Apr. 1905), who contributed 50,000/. Verulam was built on the site of the capital of Cassi览eynum, taken by Julius Caesar, 54 B.C. It was retaken after much slaughter by Boudicca or Boudonalia, queen of the Iceni, see Leuvi, 224-223 B.C. ALBIGENSES. a name given to various persons who opposed the doctrines and corruptions of the church of Rome, living at Albi, in Languedoc, and at Toulouse in the 12th century. They were persuaded as alleged Manicheans, 1163, and assassinated (proclaimed by pope Innocent III.) against them commenced in 1207, Simon de Montfort commanded 500,000 men, and at Beziers, 1209, he and the Pope's legate put friends and foes to the sword, saying, "God will find his own!" At Minerva he burnt 550 of the Albigensians alive; and at La Vaur he hanged the governor, and beheaded the chief people, drowning the governor's wife, and murdering another woman. He died 1218. Louis VIII. and IX., kings of France, patronised the crusade; Count Raymond was subdued, and abdicated in 1229; and the heretics were given up to the Inquisition. They had little in common with the Waldenses, which see.

ALBION. Britain is said to have been so called by Aristotle (died 322 B.c.). Julius Caesar and others are said to have given it the name (from albus, white) on account of its chalky cliffs.

ALBUERA or ALBUHERA, Estremadura, Spain. Here a battle was fought between the French, commanded by martial Soult, and the British and Anglo-Spanish army under marshal, afterwards, 16 May, 1811. The allies obtained a brilliant victory. The French lost exceeded 8000 men previous to their retreat; but the allies lost a large number. The chief brunt of the action fell on the British; colonel Inglis, 22 officers, and more than 400 men, out of 570 who had mounted a hill, fell, out of the 75th regiment alone; the other regiments were scarcely better off; not one-third being left standing: "1500 wounded men, the remnant of 6000 unconquerable British soldiers, stood triumphant on this fatal hill." Napier.

ALBUFEIRA (Spain, East Central), a lagoon, near which the French marshal Suchet (afterwards duke of Albufera) defeated the Spaniards under Blake, 4 Jan. 1812: this led to his capture of Valencia on 9 Jan.

ALCALA DE HENARES, Spain, the Roman Complutum. At its once famous university founded by cardinal Ximenes, 1510, was printed the Complutensian Polyglot Bible, at his expense, 1502-15. Gervanis, the author of "Don Quijote," was born here, 1547.

ALCANTARA, a town on the Tagus, W. Spain. A fine bridge was built here by Trapan, 105. The duke of Alva acquired Portugal for Spain by defeating the Portuguese army here, 24 June, 1580. The Spanish military college of knighthood of Alcantara was established in 1158. The sovereignty of Spain has been grand master since 1395. Population, 4000.

ALCAZAR-QUIVER, near Fez, N.W. Africa, where the Moors totally defeated the Portuguese, whose gallant king Sebastian was slain, 1 Aug. 1578. The Portuguese disbelieved his death, and long expected his return; this led to the appearance of five impostors.

ALCHEMY, the forerunner of chemistry; its chief objects being the discovery of the philosopher's stone (which was to effect the transmutation of metals into gold), an elixir or universal men-

strum, and the elixir of life.* The alchemists assert that their founder was Hermes Trismegistus (thrice greatest), an ancient Egyptian king—Pliny says the emperor Caligula was the first who prepared natural arsenic, in order to make gold of it, but left it off, because the charge exceeded the profit. Zosimus wrote on the subject about 420. The Arabs cultivated alchemy, and were followed (in the 13th century) by Roger Bacon, Albertus Magnus, Aquinas, Raymond Lullius, Basil Valentine (born 1294), Paracelsus (died 1541), and others.

In 1494 the craft of multiplying gold and silver was made felony by 2 Hen. IV. c. 4, which act was repeated in 1689. A licence for practising alchemy with all kinds of metals and minerals was granted to one Richard Carter, 1475. Dr. Price, of Guilford, in 1782 published an account of his experiments and brought specimens of gold to the king, affirming that they were made by means of a red and white powder. Being a fellow of the Royal Society, he was required, under pain of expulsion, to repeat his experiments before Messrs. Kirwan and Wolfe (some say Higgins); but after much equivocation and delay he took poison and died, Aug. 1275.

ALCOHOL. Pure spirit of wine or hydrated alcohol is said to have been obtained by the distillation of fermented liquors by Albinus in the 12th century; and the dehydration of this latter to have been partially effected by Raymond Lullius in the 13th century by carbonate of potassium. In 1820, Faraday and Hennell obtained traces of alcohol by passing olefiant gas (bi-carburetted hydrogen) through sulphuric acid; and in 1862 this process was examined and confirmed by Berthelot. Alcohol has been artificially formed from its elements (carbon, hydrogen and oxygen) by chemists; it was solidified by Prof. Dewar at the Royal Institution, 1880; see Distillation, Spirits, Beauty, Gas, Rom. See Temperance.

ALCOLEA (Andalusia, S. Spain). Near the bridge a sharp engagement took place between the royalists under general Pavia y Laza, marquis de Nervalhes, and the insurgents under marshal Sorano, 27 Sept. 1808. The former was defeated.

AL-CORAN or AL-KORAN, see Koran, Meckmetism, &c.

ALDERMAN. The Saxon eschelmann was next to the king, and frequently a viceroy; but after the settlement of the Danes the title was gradually displaced by that of earl. Aldermen in corporations are next in dignity to the mayor. A curious list of aldermen and their wards is assigned to the year 1290. Reform. Aldermen chosen for life, instead of annually, 17 Rich. II. 1394. Aldermen made justices of the peace, 15 Geo. II., 1741. The council of a borough consists of mayor, aldermen, and councillors, Acts, 1835.

The 26 London (City) aldermen are elected by the wards. In 1577 the court of aldermen exercised their ancient right of veto against Sir John Hennet (third chosen alderman for the ward of Cheaps), and chose Mr. Edgar Bredit, 23 Oct. 1577. Aldermen elected by the councillors form part of the County Councils established by the Local Government Act, 1835, and of the London municipal boroughs, created by the London Government Act, 1889.

The British main war Victory, of 100 guns and 1660 men, was wrecked here, 5 Oct., 1741; the admiral, Sir John Balchen, and all his crew perished. Thus the game the French escaped after their defeat at the hands of admirals Russell and Howe, 19 May, 1742. The destruction of a breakwater, in order to make Aldershot a naval station, was begun in 1822, and after having cost £33,700, was suspended by parliament in 1871. In 1874 the harbour and land were transferred from the control of the board of trade to that of the admirality and the war department.

In April, 1854, the War Office, having obtained a grant of 200 acres, purchased 4,000 acres of land for a permanent camp for 20,000 men. The camp, which was at first made up of wooden huts, is now a handsome red brick town, possessing its own public buildings, fire-brigade stations, post offices, &c., and one of the finest gymnasia in the country. The inhabitants were evacuated in 1894. Additional barracks in the town.

ALE, Beer, and Wine. Ale is said to have been known as a beverage at least in 200 B.C. Herodotus ascribes the first discovery of the art of brewing barley-wine to Leis, the wife of Osiris, and a beverage of this kind is mentioned by Xenophon, 301 B.C. The Romans and Germans very early learned from the Egyptians the process of preparing a liquor from corn by means of fermentation. Tinctures, Ale-houses are mentioned in the laws of Inn, king of Wessex. Booths were set up in England, 728, when laws were passed for their regulation. None but freemen were allowed to keep ale-houses in London, 13 Edw. I. 1285. They were further subjected to regulation by 5 & 6 Edw. VI. c. 23 (1551). By 1 James I. c. 6 (1603), one full quart of the best, and two quarts of small ale were to be sold for one penny. Excess duty on ale and beer was imposed by the parliament in 1643, and continued by Charles II. (1660), repealed, 1 Wills. c. 51 (1828). See Beer, PORTER, Wine, VINTNERS. Michael Thomas Bass, the eminent brewer of Burton, died 28 April, 1884, aged 84.

ALEMANNI, or ALL MEN (i.e., men of all nations), hence Almain, German. A body of Suevi, who took this name, were attacked by Caracalla, 211. After several repulses, they invaded the empire under Aurelian, who subdued them in three battles, 273. They were again vanquished by Julian, 335, 337, by Jovinus, 388. They were defeated and subdued by Clovis at Tolbiac (or Zul iPod), 496. The Suabians are their descendants.

ALEppo, North Syria, a large town named Beren by Seleucus Nicator, about 250 B.C. The
pachalic of Alexno is one of the five governments of Syria. It was taken by the Saracen squ. A.D. 638, who restored its ancient name Haleb or Chalde; by Saladin, 1193; and sacked by Timour, Nov. 1400. Its depopulation by the plague has been frequent; 66,000 persons were massacred; and thousands of persons slain by the Greeks in 1797; many in 1827. The choler raged here in 1832. Alexno suffered severely from the terrible earthquakes in 1822 and 1830; and has often been the scene of fanatical massacres. On 16 Oct. 1830, the Mahometans attacked the Christians, burning everything. Three churches were destroyed, five other buildings plundered, and thousands of persons slain. The total loss of property amounted to about a million sterling; no interference was attempted by the pacha. Population in 1885, 110,000; 1910, (est.) 140,000.

ALESSANDRIA, a city of Ptolemais, built in 338 B.C. under the name of Cassir by the Mameluke and Cremonese, to defend the Tamaro against the emperor, and afterwards named after pope Alexander III. "Alkali works" are defined as works for the manufacture of alkali, sulphates of soda, sulphate of potash, and in which muriatic gas is evolved.

Mr. Gossage's process for condensing muriatic acid gas patented in 1836. The "ammoniac process" of making soda, invented by Dyer and Henning, in 1836; patents respecting it taken out by Solvay, 1863, 1867, 1872; Rossenhofe, 1854; Schlesing, 1854, 1855; Young, 1871, 1872; Weldon, 1872, 1873; and by others. Mr. Walter Weldon received the French Lavoisier medal for his most important improvements in the alkali manufacture, July, 1877. He died of overwork, 28 Sept., 1885, aged 53. In consequence of the injury to vegetation produced by the alkali works in Lancashire and Cheshire, the Alkali Works act came into operation, and compensation (of 55 per cent. of muriatic acid gas) (or hydrochloric acid) was passed, 25 July, 1861. It came into operation 1 Jan., 1864, proved successful, was re-enacted, 1868; and amended, 1872, 1883, and 1892. Mr. James Greenwood's electrolytic process for the direct production of caustic soda and chlorine from common salt reported successful, Jan., 1892. See Bleaching, Chlorinated Works, and Union.

Manufacture of ammonia-soda by the Solvay process by sir J. Brunner and Dr. L. Meudel at Northwich, 1857. Patents taken out for making chlorine in conjunction with soda. These alkali works now the largest in the world, 1903.

ALKMAER, see Bergen.

ALLAHABAD (N.W. Hindostan), the "holy city" of the Indian Mahometans, situated at the junction of the rivers Jumna and Ganges. The main station of the Grand Trunk road and East Indian railway. Here is the pillar of Asoka, 240 B.C. The province of Allahabad was successively subject to the sovereigns of Delhi and Oude, but in 1801 was partially and in 1803 wholly incorporated with the British possessions. By treaty here, Bengal, i.e., was ceded to the English in 1756.—During the Indian mutiny many soldiers and officers rose and massacred their officers, 4 June, 1857; colonel Neil marched promptly from Benares and suppressed the insurrection. In Nov., 1801, lord Canning made this city the capital of the N. W. provinces. Visit of the Prince of Wales, 7 March, 1876. University instituted, 1887. A fair is held Dec.-Jan., visited by about 300,000 persons. Population, 1901, 173,032; 1910, (est.) 260,000.

ALLEGY abounds in the Bible and in Homer; see Jacob's blessing upon his sons, Genesis xlix. (1689 B.C.), Psalm lxxx., and all the prophets. Spenser's Faerie Queene (1590) and Bunyan's Pilgrim's Progress (1678) are allegories throughout. The Spectator (1711), by Addison, Steele, and others, abounds in allegories. The allegorical interpretation of the scriptures is said to have begun with Origen in the 3rd century; but see Gol, iv. 24.

ALL FOR IRELAND LEAGUE inaugurated at Cork, 31 March, 1910.

ALLIA (more correctly Alia), Italy, a small river flowing into the Tiber, where Brunnen and the Gauls defeated the Romans, 6 July, 390 B.C. The Gauls sacked Rome and committed so much injury that the day was thereafter held to be unlucky ( nefastus), and no public business was permitted to be done thereon.

ALLISON ISLAND, in the Pacific, n. of German New Guinea, discovered early in 1887.

ALL NIGHT SITTINGS, see Parliament, 1877 and 1881. Have since become of frequent occurrence.

ALL RED ROUTE. Lord Strathcona, high commissioner for Canada, defines the all-red route as the British highway between Great Britain, New Zealand, and Australia, by way of Canada, along which the objective points should be entirely in British territory or under British control, 7 April, 1908.

ALL SAINTS' DAY (Nov. 1), or All-Hallows, a festival said to have been begun by pope Boniface IV. about 605, celebrated in the Pantheon at Rome, and established by pope Gregory IV. (about 830) for the commemoration of all those saints and martyrs in whose honour no particular day is assigned. The name is adopted by the Easterners of the English church, 1539, struck out of their calendar a great number of anniversaries, leaving only those which were connected with popular tradition.

ALL SOULS' COLLEGE, Oxford; see Oxford.

ALL SOULS' DAY (2 Nov.), a festival of the Roman Catholic church to commemorate the souls of the faithful, instituted, it is said, at Cluny about 993 or 1000.

"ALL THE TALENTS" ADMINISTRATION, see Grandville Administrations.

ALLOBROGES, Gauls, defeated by Q. Fabius Maximus, near the confluence of the Rhone and Saone, 121 B.C.

ALLOTMENTS, see Land.

ALMA, a river in the Crimea, near which was fought a great battle on 20 Sept., 1854. (See Russo-Turkish War and Crime.) The English, French, and Turkish army (about 57,000 men) moved out of their first encampment in the Crimea on 10 Sept., and bivouacked for the night on the left bank of the Bulganac. The Russians (commanded by prince Menschikoff), mustering 40,600
infantry, had 180 field-pieces on the heights, and, on the morning of 20 Sept., were joined by 6000 cavalry from Theodosia (or Kaffa). The English forces, under lord Raglan, consisted of 20,000 men; the French of 24,000, under marshal St. Arnaud. At 12 o'clock the signal to advance was made; the river, which was bridged, while the men of Napoleon took possession of the village under the fire of the Russian batteries, and at 4, after a sanguinary fight, the allies were completely victorious. The enemy, utterly routed, threw away their arms and knapsacks in their flight, having lost about 3000 men, of whom 900 were made prisoners, mostly wounded. The loss of the British was 26 officers and 327 men; (chiefly from the 23rd, 7th, and 33rd regiments); that of the French, 3 officers and 233 men killed. Total loss of the allies about 3400.

**ALMACK’S ASSEMBLY-ROOMS.** King-street, St. James’s, London, at first very exclusive, were erected by a Scotchman named Almack or M’Call, and opened 12 Feb. 1765. They were subsequently termed Willis’s rooms, from the name of later proprietors.

**ALMANACS** (from the Arabic of manah, to count; or better, the Coptic αο, computation, and men, memory). The Egyptians computed time by instructions, and the Babylonians, and later calendars are ancient. In the British Museum and universities are specimens of early almanacs. Michael Nostradamus, the astrologer, wrote an almanac in the style of Merlin, 1559. *Du Fresney, Professor Augustus De Morgan’s valuable “Book of Almanacs, with an index of reference, by which the almanach may be found for every year,” was published in March, 1851.* Among the earlier and more remarkable almanacs were—

- John Sowen’s Calendar, written in Oxford, 1479.
- One in Lambeth Palace, written in English, 1495.
- First printed one, published at Bath, 1472.
- Tylott’s Prognostics, 1513.
- Almanacs of Ligues, 1540.
- Lilly’s Ephemeris, 1566.
- Poor Robin’s Almanac, 1562.
- British Merlin, 1658.
- Connaissance des Temps (by Picart), 1681.
- Edinburgh Almanack, 1661.
- Moore’s Almanac, from 1678 or 1713.
- Lady’s Diary, 1705.
- Season of the Seasons, 1730.
- Gentleman’s Diary, 1741.
- Nautical Almanac, begun by Dr. Neville Molyneux (correctly improved, 1734).
- Annual Register, 1798.
- British Imperial Calendar, 1804.
- New and Every Day Book, 1796.
- British Almanack and Companion, 1798.
- Chambers’ Book of Days, 1812-1818.
- Waker’s Almanack, 1821.
- Hazell’s Annual, 1824.
- Mr. F. Mayer’s International Almanack for 1824, in five languages, published in 1825.

**ALMSHOUSES.**

- Of Foreign Almanacs, the principal are the “Almanach de France,” first published in 1699, the “Almanach de Goth,” 1764, in 150 pages; in 1805, 1,367, and the “Livre d’Or des Souverains,” by H. R. Hoit-Looresen, published in Paris, July, 1755.

**ALMANZA** (S. E. Spain). Here on 25 April (o.s. 14), 1707, the English, Dutch, and Portuguese forces, under the earl of Galway, were totally defeated by the French and Spanish commanded by James Fitzjames, duke of Berwick (illegitimate son of James II). Most of the English were killed or made prisoners, having been abandoned by the Portuguese at the first charge.

**ALMEIDA** (Portugal), a frontier town, captured by Massena, 27 Aug., 1810. The French entered Spain, leaving a garrison at Almeida, blockaded by the English, 6 April, 1811. Almeida was retaken by Wellington (11 May), and Massena retired from Portugal.

**ALMENARA,** a village N. E. Spain, where on 25 July, 1710, an English and German army defeated the Spanish army supporting Philip V, the grandson of Louis XIV. of France. Stanhope, the English general, killed the Spanish general, Menguza, in single conflict; an act almost unexampled in modern warfare.

**ALMOHADES,** Mahometan partisans, followers of Mohammed ben Abdalla, surnamed El-Mechech, in Africa, about 1120. They subdued Morocco, 1140; entered Spain and took Seville, Cordova, and Granada, 1144-56; and founded a dynasty and ruled Spain till 1232, and Africa till 1278.

**ALMONER,** an office anciently allotted to a dignified clergyman who gave the first dish from the royal table to the poor, or an alm in money. By an ancient canon all bishops were required to keep almoners. The grand almoner of France was the highest ecclesiastical dignity in that kingdom before the revolution, 1759. Hereditary grand almoner of England, 1759. The marquis of Exeter, 1895. The king’s almoner or the sub-almoner distributes the king’s gifts on Maundy Thursday (which see).

The Rev. Lord Almyaw Compton, king’s almoner, died 4 April, 1896.

The very Rev. Dr. Armitage Robinson, D. D., Dean of Westminster, appointed to succeed him, 17 May, 1896.

**ALMORAVIDES,** Mahometan partisans in Africa, rose about 1050; entered Spain by invitation, 1086; were overcome by the Almohades in 1147.

**ALMSHOUSES** for aged and infirm persons have been erected by many public companies and benevolent individuals, particularly since the abolition of religious houses at the Reformation in the 16th century. A list of them, with useful information, will be found in “Low’s Charities of London,” 1862; frequently republished.

Armourers’ almshouses, Bishopsgate, 1553.

Cordwainers Yard, Drum founded the Red Lion almshouses, Westminster, 1577.

Emmanuel College, Westminster, founded by Lady Dacre, 1594.

*ALPERS’s almshouses,* near City road, founded by E. Alben, 1600.

Whittington’s almshouses, founded in 1631, were rebuilt near Highbate-hill by the Mersers’ company, 1686.

*The Fishmongers’ company founded almshouses in 1678, and rebuilt them on Wandsworth common, 1850. *Habarshers’ almshouses,* Hoxton, founded by Robert Aske, 1692.
ALNEY.

AN EY, near Gloucester. Here a combat is asserted to have taken place between Edmund Ironside and Canute the Great, in sight of their armies, 1016. The latter was wounded, and proposed a division of the kingdom, the south part falling to Edmund. Edmund was murdered at Oxford shortly after, it is said by Edric Streon; and Canute obtained possession of the whole kingdom.

ALNWICK (Saxon Edelic), on the river Alne in Northumberland, was given at the conquest to Ivo de Vesci. It has long belonged to the Percies. Malcolm, king of Scotland, besieged Alnwick, and he and his sons were killed 13 Nov. 1093. It was taken by David I. in 1136, and attempted in July, 1774, by William the Lion, who was defeated and taken prisoner. It was burnt by king John in 1215, and by the Scots in 1448. Since 1854 the castle has been repaired and enlarged with great taste and at unsparing expense.

ALPACA (or Paco), a species of the S. American quadruped, the Llama, the soft hairy wool of which is now largely employed in the fabrication of cloths. It was introduced into this country about 1836, by the earl of Derby. An alpaca factory (covering 11 acres), with a town, park, almshouses, &c., for the workpeople, was erected at Saltaira, near Shipley, Yorkshire, by Mr. (afterwards sir) Titus Salt in 1852. A statue of him at Bradford was unveiled 1 Aug. 1874. He died 29 Dec. 1876. Saltaira visited by the prince and princess of Wales 22 June, 1882.

The Royal Yorkshire Jubilee Exhibition at Saltaira opened by the Princess Beatrice. 6 May, 1887

ALPHABET, so called from the first two Greek letters alpha, beta (Hebrew abhph beth). The statements that Cadmus brought the Phoenician letters from Egypt into Greece are legendary. M. de Rougé about 1859 demonstrated the true origin of the alphabet. Dr. Isaac Taylor's learned work, "The Alphabet," was published May, 1883; he died, aged 72, 18 Oct. 1901.

Nearly 260 alphabets are known, of which about 30 are in use, mostly developed from the Phoenician alphabet itself, said to have been derived from the Egyptian hieroglyphic picture writing; the Roman alphabet was based upon the Greek. The alphabets of the different nations contain the following number of letters:—

ALPHONSO, King of Castile, b. 5 Jan. 1455, d. 26 Apr. 1504. His reign was marked by social and political reforms, and he was known as "El Católico." He is associated with the discovery of America by his grandson, Christopher Columbus.

ALPS, European mountains. Those between France and Italy were passed by Hannibal, 218 B.C.; by the Romans, 155 B.C.; and by Napoleon I. May, 1800. Roads over Mont Cenis and the Simplon, connecting France and Italy, were constructed, by order of Napoleon, between 1801-6; see Simplon. The "Alpine Club," which consists of British travellers in the Alps, was founded in 1858, and published its first work, "Peaks, Passes, and Glaciers," 1859; and a journal since. Mr. John Ball, F.R.S., long the able first president, and author of almost all the works of the club.

Alpine Club.—Austrian founded, 1862; Swiss, 1865; Italian, 1863; German, 1869, united with the Austrian 1874, and numbers some 40,000 members. The Appalachian Mountain Club was founded in 1881, and the principal mountain-climbing Club in the United States.

Mont Cenis or Col de Fréjus Tunnel.—A tunnel, 25 miles long through Mont Cenis, connecting Savoy and Piedmont, was proposed by M. Mehall, and after long lying dormant, was discussed and plans drawn up 1843. The execution was prevented by the war of 1849.

The work of excavation was begun by king Victor Emmanuel, 31 Aug. 1857. The boring was first effected by ordinary piercing machinery; steam power was employed in 1860; and latterly compressed air.

Engineers—Grattoni, Grandis, and Sammeller; the task being completed, 23 Dec. 1870. The total cost was about 2,600,000. As the Italians had executed the work within the given time, the French government bore the chief expense.

The first experimental trip was made in 40 minutes, 13 Sept., and the tunnel was solemnly inaugurated by the passage of 22 carriages in 20 minutes, 17 Sept. 1871; regular trains pass through, 16 Oct. 1871.

A railway for locomotives over Mont Cenis was constructed upon Mr. Fell's plan in 1887 (see Railways), and opened for traffic, 14 June, 1887.

The overland mail first travels through the tunnel to Brindisi, saving 24 hours, 5 Jan. 1872.

St. Gotthard Tunnel (part of a railway system to connect the North Sea and the Mediterranean), about 94 miles; compressed air employed in boring; begun June, 1872; completed 29 Feb. 1880; through failure in vaulting, May, 1886, opening deferred.

The first complete train, carrying 1,000 passengers, passed through the St. Gotthard Tunnel, 1 Nov. 1881; partially opened 1 Jan. 1882; completely opened June, 1885.

Simplon tunnel, convention for its construction by the Italian and Swiss governments, signed 22 Nov. 1855. Mr. Hugo Mylius, celebrated alpinist, makes winter ascents of the Finsteraarhorn (14,025 ft., 12 Feb., 1859; and the Jungfrau (13,670 ft., 14 Feb., 1859, both on skis; ascends Mt. Blanc (15,764 ft.), with 3 Bernese Oberland guides, temperature 40° below zero, Fahr., 25 Feb., 1894.

New Rhettian Railway, begun 1858, opened 27 June, 1860. Scheme for a railway on the top of Mt. Blanc proposed by M. Vallot, Sept. 1879.

Miss Beatrice Thompson, with Joseph Donarcho, a guide, successfully ascends Mt. Blanc in spite of a heavy fall of snow, May, 1894.

Simplon tunnel train of the ordinary passenger service passed through, 25 Jan., 1866; the tunnel formally opened by the king of Italy and the president of the Swiss Confederation, 16 May, 1866.
ALUMINIUM.

ALTONA (Holstein, N. Germany), acquired by the Danes, 1807, and made a city, 1694. It was occupied first by the German federal troops, 24 Dec. 1803, and then by the Prussians (the federal diet protestant), 12 Feb. 1804.

ALT-RANSTADT (Prussia), where the treaty of peace dictated by Charles XII. of Sweden, to Frederick Augustus of Poland, was signed, 24 Sept. 1706, o.s. Frederick, deposed in 1704, regained the throne of Poland after the defeat of Charles XII., in 1709.

ALUM, a salt, is said to have been first discovered at Rocchi, in Syria, about 1300; it was found in Tuscany about 1470; its manufacture was brought to perfection in England by Sir T. Chaloner, who established large alum works near Whilty in 1608; it was discovered in Ireland in 1757; and in Anglesey in 1790. Alum is used as a mordant in dyeing, to harden tallow, and in the paper manufacture.

ALUMBAGH, a palace with other buildings near Lucknow, Oude, India, taken during the mutiny from the rebels, 23 Sept. 1857, and heroically defended by the British under Sir James Outram. He defeated an attack of 30,000 sepoy on 12 Jan. 1858, and of 20,000 on 21 Feb., and was relieved by Sir Colin Campbell in March.

ALUMINIUM. A metal, the base of the earth alumina, which is combined with silice in clay, and which was shown to be a distinct earth by Marggraf in 1754, having been previously confounded with lime. It is very light (sp. g. 2.25), malleable, and sonorous; when pure does not rust, and is not acted upon by sulphuric acid, and except hydrochloric. Oersetz in 1826 obtained the chlorate of aluminium; and in 1827 the metal itself was got from it by F. Wohler, but was long a scientific curiosity, the process being expensive. The mode of production was afterwards simplified by Bunsen and others, more especially by H. Ste. Claire Deville, who in 1856 succeeded in procuring considerable quantities by the aid of the metal sodium. A cheaper method was devised by Mr. Webster, of Hollywood, near Birmingham, in 1881. Since 1890 by electrolytic methods, as the Metz, Cowles of Milton, near Stoke-on-Trent, and of Lockport, in New York, the chemical process has been practically superseded. In March, 1876, it was announced; in June, 1857, 11s. or 12s.; and it gradually became much cheaper; at the present time, 1875, it is 8s. 6d. per lb. The cagles of the French colours have been made of it, and many other ornamental and useful articles. Deville's work, De l'Aluminium, was published in 1859. An aluminiumated rayon fabric was made by New- castle in 1860, by Messrs. Bell. They obtain the metal from a French mineral, bauxite. Their aluminium bronze, an alloy of copper and aluminium, invented by Dr. John Percy, E.R.S., was made into watch cases, &c., by Messrs. Reid of Newcastle, in 1862. Aluminium bronze, which can be manufactured with a textile strength equal to steel, renders it a useful material for held guns; its endurance and resistance to friction, combined with its lightness, adapt it specially for, the bearings of shafts and other kinds of machinery. Its cost of production is, however, high. Combined with tin aluminium is used for optical instruments, and for alloyed with copper to give it strength. "Aluminum," from which forks and spoons are manufactured, "Aluminium gold," used for imitation.
gold jewelry, is an alloy of aluminium with copper. Aluminium entered largely into the construction of the deck of Shannon III.

A steam launch wholly made of aluminium (alloy), 6 metres long, 15 metres wide, was constructed at Zürich by Escher, Wys & Co., Sept. 1893.

An aluminium yacht, Fendolasse, launched on the Seine, 6 Dec. 1893.

The Jules Banonc, 33 feet long, weighs 15 cwt., also exhibited on the Seine, Dec. 1893.

An aluminium torpedo-boat, built by Messrs. Yarrow, for the French government, successfully tried at Greenwich, 29 Sept. 1894.

The British aluminium company (registered 1894) established works at Faversham, and utilizes the Falls; reported June, 1896; reservoir works completed, Jan. 1898.

AMADIS OF GAUL, a Spanish or Portuguese romance, stated to have been composed about 1370 by Vasco de Loberia. It was enlarged by De Montalvo, about 1465; and first printed (in Spanish) 1519; in French, 1540-56. Translation by Southey, 1803.

AMALEKITES (descendants of Amalek), grandson of Esau, brother of Jacob) attacked the Israelites, 1491 B.C., when perpetual war was denounced against them. They were subdued by Saul about 1079, by David, 1058 and 1056; and by the Simeonites about 715 B.C.

AMALFI, a city on the gulf of Salerno, Naples, in the 8th century became the seat of a republic, and flourished by its commerce till 1075, when it was taken by Roger Guiscard, and eventually incorporated with Naples. The Pisani, in their sack of the town in 1135, are said to have found a copy of the Pandects of Justinian, and thus to have induced the revival of the study of Roman law in Western Europe. The story was doubted. Flavio Gioia, a native of Amalfi, is the reputed discoverer of the mariner's compass, about 1302.

AMATI, a family of celebrated violin makers of Cremona, 16th and 17th centuries. Andrea (1509-1600) founded the business, which was carried on by his sons Geronimo and Antonio and his grandson Niccolo. The last-named was the master of both Guarneri and Stradivario, whose violins are so highly prized.

AMATONGALAND, between Zuuland and the Portuguese possessions, South Africa. The territory annexed to the British possession of Zuuland, 30 Nov. 1897.

AMAZON, West India mail steam ship, left Southampton on her first voyage, Friday, 2 Jan. 1852, and on Sunday morning, Jan. 4, was destroyed by fire at sea, about 110 miles W.S.W of Scilly (ascribed to the spontaneous ignition of combustible matter placed near the engine-room). Out of 165 persons on board, 122 persons must have perished by fire or drowning. 21 persons were saved by the life-boat of the ship; 25 more were carried into Brest harbour by a Dutch vessel passing by; and 13 others were picked up in the bay of Biscay, also by a Dutch galion. Ellet Warburton, a distinguished writer in general literature, was among those lost.

AMAZON (S. America). The longest river in the world. Navigable for large steam vessels 2,500 miles from the sea. Discovered by Pinzon in 1500, and explored by Francesco Ordelaff in 1540. Coming from Peru, he sailed down the Amazon to the Atlantic, and observing companies of women in arms on his bank, he called the country Amazonia, and gave the name of Amazon to the river, previously called Maranon. Steam navigation commenced 1850. There is now a regular service of ocean-going steamers up the Amazon.

AMAZONS. Three nations of Amazons have been mentioned—the Asiatic, Scythian, and African. They are mythically said to have been the descendants of Scythians inhabiting Cappadocia, where their husbands, having made incursions, were all slain, being surprised in ambuscades by their enemies. Their widows formed a female state, and decreed that matrimony was a shameful servitude. Quintus Curtius. They were said to have been conquered by the Theseeans. The Amazons were constantly employed in wars; and that they might bend the bow with more force, their right breasts were burned off, whence their name from the Greek, a, no, mazos, breast. Others derive the name from mazat, the moon, which they are supposed to have worshipped. About 330 B.C. their queen, Thalestris, visited Alexander the Great, whilst he was pursuing his conquests in Asia, with three hundred females in her train. Herodotus. For modern amazons, see Dukhness.

AMBASSADORS. Accredited agents, and representatives from one country to another, are referred to in early ages. In most countries they have great privileges; and in England, they and their servants are secured against arrest. They declared their independence, Sept. 21, 1821, and separated from the Mexican confederation, Nov. 29, 1824. They made a treaty of union between themselves, March 1847. The latter were defeated at Santa Rosal 1854; and San Salvador was taken, Dec. 1854; the president of San Salvador, Barrios, fled; and Carrera, the dictator of Guatemala, became predominant over the confederacy. ANATOMY (Greek, cutting up). The human body was studied by Aristotle about 350 B.C., and became a branch of medical education under Hippocrates, about 420 B.C. Erasistratus and Herophilus first laid the foundations of human anatomy; having been previously confined to animals, it is said that they practised upon the bodies of living criminals, about 300 and 293 B.C. Galen, who died about A.D. 201, was a great anatomist. In England, the schools were long supplied with bodies unlawfully exhumed from graves; and until 1832, the bodies of executed men were generally preserved for dissection. Pope Pius VIII forbade the dissection of dead bodies.

ANCIENT ANATOMY has been treated systematically by Cuvier, Owen, Müller, Huxley, Virchow, Schwann, Haeckel, Agassiz, Burmeister, Carpenter, Flower, Thomson, and others. The practice of anatomy is greatly aided by the use of the microscope. See Microscope.

Mr. Thomas Coke, founder of Coke's School of Anatomy, died 8 Feb. 1833. The anatomy of plants has been studied since 1820; see Botany.

ANCHORITES, see Monachism.

ANCHORS were invented by the Tuscani, Pliny. The second tooth, or thole, was added by Ambraesius the Scythian (392 B.C.). Strabo. Anchors said to have been forged in England A.D. 578. The Admiralty anchor was introduced about 1841. Improved anchors were made by Perring and Rodgers about 1828, by Porter, 1838, by Costello, 1838; by Trotman, 1853; and by several other persons. The anchors of ocean steamships are of enormous size. Acts for the proving and sale of chain cables and anchors were passed in 1804 and 1871.

* By 12 Feb. 1781 (42 Geo. III.) surgeons were granted four bodies of executed malefactors for "monstrousness," which privilege was extended in following reigns; but in consequence of the cases committed by resurrection men in order to supply the surgeons' needs, groining churchyards and even committing murder, see Resurrection, a new statute was passed in 1823, which abated the ignorance of dissection by prohibiting that of executed murderers, and made provision for the wants of surgeons by permitting, under certain regulations, the dissection of persons dying in workhouses, &c. The act also appointed of anatomy, established the schools, provided for the use of neglected, and required persons professing anatomy to obtain a licence. It repealed the clauses of the act of 1822, which directed the dissection of the body of an executed murderer.

ANCIENT HISTORY commences in the Holy Scriptures 3001 B.C., and in the history of Herodotus about 1087 B.C., and is considered to end with the destruction of the Roman empire in Italy, A.D. 476. Modern history begins with Mahomet (A.D. 622), or with Charlemagne (768).

ANHALT, House of, in Germany, deduces its origin from Berenthobaldus, who made war upon the Thuringians in the sixth century. In 1660, the principality was divided among the four sons of Joachim Ernest, by the eldest, John-George. Thus began the four branches—Anhalt-Dessau (descended from John-George); Zerbst, extinct, 1793; Plötschau or Cothen, extinct, 1817; and Bernburg, extinct, 1863 (the last duke died without issue 22 Aug., 1860). ANILINE, an oily alkaline body, discovered in 1826 by Unverdorben among the products of distillation of indigo. From benzole (which see) Bechamp, in 1850, obtained it by successive treatment with concentrated nitric acid and reducing agents. The substance relations of aniline have been carefully examined by several chemists, especially by Dr. A. W. Hofmann. It was long known to yield a series of coloured compounds, but it was not till 1856 that Mr. W. H. Perkin showed how a violet oxidation-product (mauve) could be applied in dyeing. Aniline is now manufactured on a large scale for the commercial production of "mauve" and "magenta" (rosanine) (which see), and several other colouring matters, aniline blue, 1861; violet, 1863; "night" green, &c. The patent of Simpson, Maule, and Nicholson, for aniline colours, was annulled by the house of lords, 27 July, 1866. See Alizarine. Poisoning from the inhalation of aniline vapoours, characterized by the bluish colour of the lips, cheeks, and ears of the persons affected, is termed Anilina.

ANIMALS, as the term is here used, comprehends all the higher animals, e.g., the horse, dog, cat, etc., as well as the human species. But in zoology the first class of animals is the class of the ANIMALIA, which includes all animals other than the PLANTAE.

ANIMAL COUNCILS, Lecwenhoek's remarkable microscopic discoveries were published in the Philosophical Transactions of the Royal Society for 1677; in his "Arcana Naturae," at Leyden, 1669. The great works of Ehrenberg on the Infusorial Animals, &c., were issued 1838-57; Pritchard's Infusoria, ed. 1861, and Mr. W. Savile Kent's Manual of Infusoria, 3 volumes, 1880-2, are valuable. The Rev. W. H. Dallinger, Dr. Drysdale and other distinguished scientists, by their microscopic observations of bacteria and other low forms of life, have greatly increased our knowledge.

ANIMAL MAGNETISM (to cure diseases by sympathetic affection) was introduced by father Heil, a Jesuit, at Vienna, about 1774, and had its believers in France and England about 1758-59. Heil for a short time associated with Mesmer, but they soon quarrelled—Mr. Perkins (who died in 1799) invented "Metallic Tractors for collecting, condensing, and applying animal magnetism," but Drs. Falconer and Haygarth put an end to his pretensions by performing many wonders with a pair of wooden tractors. Brande. See Mesmerism. Animal magnetism disproved by commissions of the French Academy of Sciences, 1852-3; investigation closed as of a "dead letter," 1840. Remarkable feats were performed by Miss Abbott, "the magnetic lady," at the Alhambra theatre, 14 Nov. et seq. 1891.

ANIMALS. Mr. Martin, M.P., as a senator, zealously laboured to repress cruelty, and in 1824 the Royal Society for the Prevention of Cruelty to Animals was instituted. Its new house in Jermyn-street, London, was founded 4 May, 1869. It opposed vivisection in 1860, in union with a French society, and in Oct. 1873, offered premiums for improved trucks for conveying
cattle. A jubilee congress of this and similar societies met in London 17 June, 1874. Convictions obtained by the society (1873 to June, 1876, 28,289). Convictions in England and Wales, 1876, 1877, 1878, 1879, 1880, and 1881, as follows:—By the society, 64,205; by other societies, 6,204. Annual meetings are held. See Trials. Report. Mr. Martin's act was passed 1822, and similar acts were passed in 1827, 1835, 1837, 1839, and 1845. Dogs were forbidden to be used for dragooning in 1839. See Cattle.

ANIMISM, the name given to the doctrine propounded by George E. Stahl about 1707, that the soul (prana) is the proper principle of life, "the vital principle," in opposition to materialism, which see. The term animism was given by Dr. Edward H. Taylor in 1879, to the belief in the existence of active spiritual beings common alike among civilized and uncivilized peoples. He regarded animism as "the minimum definition of religion at the Royal institution, March 1895.

ANJOU, a province, W. France, was taken by Henry II. of England from his brother Geoffrey in 1137, their father Godfrey Plantagenet, count of Anjou, having married the empress Matilda in 1127. It was taken from king John by Philip of France in 1215; was reconquered by Edward III., richly bribing him at the battle of Poitiers in 1356, and by the Treaty of Brétigny in 1360, which gave to his father Louis V. the title of duke. The university was founded in 1348.

ANJOU or BEAUGES, BATTLE OF, between the English and French; the latter commanded by the dauphin of France, 22 March, 1321. The English were defeated, the duke of Clarence was slain by sir Alan Swinton, a Scotch knight, and 1,000 men of the Earl, the earls of Someret, Dorset, and Huntingdon were taken prisoners. Beaugas was the first battle that turned the tide of success against the English.

ANNAM or ANAM, an empire of Asia, to the east of India, nominally subject to China, formerly composing Tonquin, Cochin China, part of Cambodi, and various islands in the Chinese Sea; said to have been conquered by the Chinese in 843, and held by them till A.D. 263. In 1406 they reconquered it, but abandoned it in 1428. After much anarchy, bishop Adrian, a French missionary, obtained the friendship of Louis XVI. for his pupil Giacelon, the son of the nominally reigning monarch, and with the aid of a few of his followers, established Giacelon on the throne, who reigned till his death in 1821, when his son became king. In consequence of the persecution of the Christians, war broke out with the French, who defeated the army of Annam, 10,000 strong, about 22 April, 1859, when 500 were killed. On 3 June, 1862, peace was made; three provinces were ceded to the French, and Giacelon on the throne granted. An insurrection in these provinces against the French, begun about 17 Dec. 1862, was suppressed in Feb. 1863. Ambassadors sent from Annam with the view of reigning the ceded provinces arrived at Paris in Sept. 1863, had no success. Cochinchina and other provinces were annexed to the French empire by proclamation, 25 June, 1867. Several thousand French Christians were driven from a house, July, 1868. Population about 3,600,000, capital Hué. Buddhism, ancestor worship, communal life, and education prevail.

Some scholars dispute the authorship to Cerinthus, the heretic, and others to John, the disciple. In the first centuries many churches disowned it, and in the 4th century it was excluded from the sacred canon by the council of Laodicea, that was again revived by other councils, and continued by that of Trent held in 1545, &c. Its canonical authority is almost universally acknowledged.

**APPEAL.**

**APPELLATE COURT.** a court of justice created for the hearing of appeals from the decisions of inferior courts. The courts of appeal are the highest courts in the different countries of Europe. The highest court of appeal in England is the House of Lords, consisting of the King in Council, the Lords of Appeal, and the Privy Council for Judgments in Equities. The United States of America have a system of appellate courts in each state, and a federal court of appeals for the United States as a whole. The Court of Cassation in France, consisting of the Emperor and fifteen judges, is the highest court of appeal in France. The Supreme Court of Canada, consisting of the Lieutenant-Governor, the Chief Justice, and six judges, is the highest court of appeal in Canada.
APPEALS. In the time of Alfred (861-899), appeals lay from courts of justice to the king in council. Courts of appeal at the Exchequer Chamber, in error from the judgments of the superior and criminal courts regulated by statute in 1550, 1582, and 1848. Appeals from English tribunals to the pope were first introduced about 1151, were long vainly opposed, and were abolished by Henry VIII 1531; restored by Mary, 1554; again restored by Elizabeth, 1559. House of Lords sat in court of appeal in 1278. By 14 Edw. III., c. 5, 1346, a prayer was made, and two barons formed the court. Protest of Commons against appeal to the Lords, 1752, resisted by the peers; hearing of appeals resumed, 1677. The principle that this jurisdiction was a delegation by the crown of its final authority was reaffirmed 1760. See Privy Council and Justice, Lords, Common Pleas, Court of appeal abolished by the Judicature Act, 1873; abolition of appeal and a positon in the court established, Aug. 8 Nov. 1875. The House of Lords was reconstituted as a court of final appeal by the Appellate Jurisdiction Act, passed Aug. 1, 1876. The Act came into force April 5, 1876; it enacted that every appeal shall be brought by petition to the House of Lords, that the matter may be referred before being brought in the House of Lords. The court first sat, Nov. 24, 1876. The Act was amended by the Appellate Jurisdiction Act 1878, the Appeal Act (forma propria) 1887, and the Statute Law Revision Act 1887. Lords of Appeal in Ordinary (1609) are: Lord Chancellor (Baron Locohorn, lord Macnaghey, 1877), lord Atkinson (1893), lord Collins (1917), lord Shaw (1917), and other peers of Parliament who have held or are holding high judicial office. Criminal appeal bill, 8 Geo. Lawson Walton's, passed 1697.

APPENDICITIS was abstracted as a separate cause of death for the first time in 1891, previous to which it was classed under the head of enteritis. The disease of King Edward VII., and the operation he underwent, 21 June, 1892, brought this disease prominently to public notice. It is since held to be a germ disease.

APPENZELL, a Swiss canton, threw off the supremacy of the abbots of St. Gall early in the 15th century, and became the thirteenth member of the Swiss confederation, 1513.

APPIAN WAY, a Roman road to Capua, made by Appius Claudius Caecus, while censor, 312-308 B.C.

APPLES. Several kinds are indigenous to England; but those in general use have been brought at various times from the continent. Richard Harris, traitor to Henry VIII., is said to have planted a great number of the orchards in Kent, and lord Scudamore, ambassador to France in the reign of Charles I., planted many of those in Herefordshire. Ray reckons 58 varieties of apples in his day (1703). In 1731 there were some 2000 varieties cultivated in Great Britain. The scientific study and classification of apples is entitled Pomology.

APPORTIONMENT ACT (for rents, annuities, dividends, and other periodical payments) passed 1 Aug. 1870.

APPRAISERS. The valuation of goods for another was an early business in England; and so early as 1226 by the statute of merchants, or of Acton Burnel, "it was enacted that if they valued the goods of parties too high, the appraisers should take them at such price as they have limited." In 1815 their annual licence was raised from 10s. to 40s. A duly licensed auctioneer or house agent may act as appraiser.

APPRENTICES. Those of London were obliged to wear blue cloaks in summer, and blue gowns in winter, in the reign of queen Elizabeth, 1558. Ten pounds was then a great apprentice fee. From twenty to one hundred pounds were given in the reign of James I. Acts of Sundry. The apprentice tax enacted 45 Geo. III. 1802. The term of seven years, not to expire till the apprentice was 24 years old, required by the statute of Elizabeth (1563), was abolished in 1814. An act for the protection of apprentices, &c., was passed in 1814. The apprentices of London have been at times very riotous; they rose into insurrection against foreigners on Fri. May-day (which see), 1 May, 1817. Exhibition of apprentices' work at the People's Palace opened by the prince of Wales 10 Dec. 1883.

APPROPRIATION ACT passed annually by a clause prohibits the treasury officials from applying public money to any service other than that to which it has been specially appropriated. The principle was adopted by the commonwealth, and was definitely established in 1665.

APPROPRIATION CLAUSE, of the Irish Tithe Bill of 1835, brought forward by lord John Russell, whereby any surplus revenue that might accrue by the working of the act was to be appropriated for the education of all classes of the people. The principle was adopted by the commons, but rejected by the lords in 1835 and 1836, and was abandoned.

APPROPRIATIONS (property taken from the church) began in the time of William I. The parochial clergy, then commonly Saxons, were impoverished by the bishops and higher clergy (generally Normans) to enrich the monasteries possessed by the conqueror's friends. Where the tithes were so appropriated, the vicar had only such a competency as the bishop or superior thought fit to allow. Pope Alexander IV. complained of this as the bane of religion, the destruction of the church, and a poison that had infected the whole nation. Lay appropriations began after the dissolution of the monasteries, 1536.

APRICOT (prunus, early ripe), Prunus Armeniaca, from Asia Minor, said to have been first planted in England about 1540, by the gardener of Henry VIII.

APRIL, the fourth month of our year, the second of the ancient Romans.

APTERYX (wingless), a bird, a native of New Zealand, first brought to this country in 1815, and deposited in the collection of the earl of Derby. Fossil specimens of a gigantic species of this bird (named Dimornis) were discovered in New Zealand by Mr. Walter Mantell in 1843 and since, and much studied and many papers written on it by Professor Owen.

APULIA, a province in S.E. Italy. The people favoured Hannibal, and were severely punished by the Romans at his retreat, 205 B.C. Apulia was conquered by the Normans, whose leader Guiscard received the title of duke of Apulia from pope Nicholas II. in 1059. After many changes of masters, it was absorbed into the kingdom of Naples, in 1265. Strike riot, conflict with troops at Candela, 5 deaths, 5 Sept. 1762.

AQUACULTURE, see under Fisheries.
AQUARII. a sect said to have been founded by Tatian in the 2nd century, who forebore the use of wine even in the sacrament; during persecution they met secretly at night. For this they were censured by Cyprian (mart. 258).

AQUARIUM or AQUAVIVARUM, a vessel containing water (marine or fresh) in which animals and plants may co-exist, mutually supporting each other; snails being introduced as scavengers. In 1849, Mr. N. B. Ward succeeded in growing seaweeds in artificial sea-water; in 1850, Mr. R. W. Godwin demonstrated the conditions necessary for the growth of animals and plants in jars of water; and in 1853 the glass tanks in the Zoological Gardens, Regent's Park, were set up by Mr. D. Mitchell. The great aquarium (50 yards long and 12 wide) at the Jardin d'Acclimatation at Paris, was constructed under his direction in 1860. He also constructed the aquarium at Hamburg and others. That at Brighton was inaugurated by Prince Arthur, 30 March, and publicly opened by the mayor, 10 August. 1872. That at the Crystal Palace was opened Jan. 1872.

The Royal Aquarium and Summer and Winter Garden Society was established 1874; the building at Westminster was opened by the duke of Edinburgh, 22 Jan. 1876, closed 1902.

AQUEDUCT, an artificial water-carrying. Appius Claudius Cæcus, while censor, advised and constructed the first Roman aqueduct, as well as the Appian way, about 312-308 B.C.* There are now some remarkable aqueducts in Europe: that at Lisbon is of great extent and beauty; that at Segovia has 129 arches; and that at Versailles is three miles long, and of immense height, with 212 arches in three stupendous aqueduct on the Ellesmere canal, in England (1,007 feet in length, and 126 feet high), was completed by T. Telford, and opened 26 Dec. 1805. The Lisbon aqueduct was completed in 1738, and the Croton aqueduct, near New York, was constructed between 1837 and 1842. The aqueduct to supply Marsilles with water was finished in 1847. Other important aqueducts: Manchester (nearly 100 miles) 1843; Glasgow (35 miles) 1860 (another 1845); Liverpool (68 miles) 1862; Vienna (60 miles) 1873; Bombay (95 miles) 1892.

AQUILA. S. Italy. Near here the Arragonese under the condottiere Braccio Forte-Braccio were defeated by the allied Papal, Neapolitan, and Milanesian army under Jacob Caldara, 2 June, 1424. Braccio, a wounded prisoner, refused to take food, and died, 5 June.

*Remains of these and other noble aqueducts, constructed by emperors, still remain, and some supply water to the city.

AQUELEIA (Istria), made a Roman colony about 180 B.C. and fortified a.d. 168. Constantine II. was slain in a battle with Constans, fought at Aquileia towards the close of March, 330. Maximus defeated and slain by Theodosius, near Aquileia, 28 July, 395. Theodosius defeated Eugenius and Arbogastes, the Gaul, near Aquileia, and remained the emperor. See Sept. 394. Eugenius was put to death, and Arbogastes died by his own hand, mortified by his overthrow. St. Ambrose held a synod here in 381. In 452 Aquileia was almost totally destroyed by Attila the Hun, and near it in 463 Theodoric and the Ostrogods totally defeated Odovacer, the king of Italy. Aquileia was an early patriarchal see.

France), conquered by the Romans 29 B.C.; by the Visigoths, a.d. 418; taken from them by Clovis in 507; Henry II. of England obtained it with his wife Eleanor, 1152. It was erected into a principality for Edward the Black Prince in 1362; but was annexed to France in 1370. The title of duke of Aquitaine was taken by the crown of England on the conquest of this duchy by Henry V. in 1413. The province was lost in the reign of Henry VI.

ARABIA (W. Asia). The terms Petraea (stony), Felix (happy), and Deserta are said to have been applied to its divisions by Ptolemy. The Arabs claim descent from Ishmael, the eldest son of Abraham, born 1910 B.C. (Gen. xvi.). Arabia was unsuccessfully invaded by Gallus, the Roman governor of Egypt, 24 B.C. The Abyssinians conquered part of Arabia Felix, and retained it 70 years. In a.d. 622, the Arabians, under the name of Saracens, followed by Mahomet (born at Meca, 570), now called and professed, commenced their course of conquest; see Mohammedan. Arabia was conquered by the Ottomans 1518-39. The Arabs greatly favoured literature and the sciences, especially mathematics, astronomy, and chemistry. The Koran was written in Arabic (622-622). The Bible was printed in Arabic in 1571. See Wahhabies. The aggression of the Turks on the South coast excited jealousy in England, and was checked by the sultan in 1573. The gold and silver found in the cities of Susa, Persepolis, and Babylon, which fell to Alexander from this victory, amounted to thirty millions sterling; and the jewels and other precious spoil, belonging to Darius, sufficed to load 20,000 mules and 5000 camels. ARBITRATION. Submission to arbitration was authorised and made equivalent in force to the decision of a jury by 9 & 10 Will. III. (1698). Further enforced by 3 & 4 Will. IV. c. 42 (1833); see Oncel Treaty. The Common Law Procedure Act (1847) authorizes the judges of superior courts to order compulsory arbitration; and, by an act passed in 1879, railway companies may settle disputes with each other by arbitration. The Arbitration (Masters and Workmen) Act was passed 6 Aug. 1872. See previouse.

Mr. Lloyd George, representing the board of trade, interviews in the railway dispute of 1907; at a meeting between Mr. Lloyd George and a committee of railway chairman, the chief point of discussion was that relating to the formation of a board of conciliation, consisting of an equal number of representatives of the companies and the men as a permanent body, with an independent chairman, 1 Nov.; the executive of the Amalgamated Society of Railway Servants accept the scheme of conciliation as an honourable settlement, 7 Nov. 1907.

The President, on the board of trade proposes the establishment of a standing court of arbitration under the powers given by the Conciliation Act of 1906, and induces the Chambers of Commerce and Employers' and Workmen's associations by memorandum, 15 Sept. 1907.

A scheme for conciliation and arbitration, arising out of the threatened railway strike of the autumn of 1907, results in the proposal to form boards for each railway, consisting of representatives of the company and of the men, to consider any question relating to rates of wages and hours of duty. It was further provided that questions on which these boards were unable to settle were to be referred to a single arbitrator, 6 Nov. 1907.

The London and North-Western Railway were the first company to complete their arrangements in connection with the scheme. The arbitration of Sir E. Fry, based upon evidence submitted to him during eight days' sitting, during December 1908, affected the interests of 26,000 men; the award made a number of concessions to various grades, but, on the other hand, wages involved were reduced in accordance with the company's proposals, and various claims put forward in the men's "National Programme" were entirely disregarded by the arbitrator. The award, which comes into effect, and remains binding until the end of 1912, was published 1 Oct. 1907.

Lord Hardasy declines his award on questions at issue between the Great Eastern railway company and their employees, the award operates from 24 Sept. 1909, and is binding until the end of 1913, 19 Aug. 1909.

The award operates from 1 April, 1873, and continues to 31 Dec. 1873. Times, 1 Feb. 1910.

ARCADES, or walks arched over. In London: the Burlington-arcade, opened 20 March, 1819; the Lowther-arcade, Strand, opened 1811, closed 1822; between Old Bond-street and Albemarle-street, opened May, 1889. The Royal-arcade, Durham, opened June, 1820, was burnt to the ground, 25 April, 1837.

ARCADIA, in the centre of the Peloponnesus, Greece, named after Arcas, a king. The Arcadians regarded their nation as the most ancient of Greece. The early history of Arcadia is fabulous.

Sir Philip Sidney's Arcadia, a pastoral romance, was published in 1590, the 3rd edition in 1613.

Magna Graecia, in S. Italy, said to have been colonised by Arcadians under Eustratus, about 1700 B.C. and under Evander, B.C. 1240. Arcas taught his subjects agriculture and to spin wool.

ARCIADIANS, an ultra-conservative French political club, composed of a section of the majority in the chambers, and opposed to liberal measures, ever when excelling from the emperor (such as the new press law). It derived its name from Rome de l'Arcade, where its meetings were held: Feb. 1868.

ARCH. It appears in early Egyptian and Assyrian architecture. The oldest arch in Europe is probably in the Cloaca Maxima, at Rome, constructed under the early kings, about 588 B.C. The Chinese bridges, which are very ancient, are of great magnitude, and are built with stone arches similar to those that have been considered a Roman invention. — The TRIUMPHAL arches of the Romans formed a leading feature in their architecture. The arch of Titus (A.D. 80), that of Trajan (114), and that of Constantine (312), were magnificent. The arches in our parks were erected about 1828. The Marble Arch, which formerly stood before Buckingham Palace (whence it was removed to Cumberland-gate, Hyde Park, in 1851), is modelled from the arch of Constantine; see Hyde Park.

ARCH-EPTERYX (ancient bird); the name given to the earliest known remains of a bird, found in the lithographic slate of Solenhofen by Herman von Meyer and Dr. Haberlein in 1801. Its structure approximated more to that of a reptile than that of modern birds does. It was described by Owen in 1853.

ARCHANGEL (N. Russia), a city, is thus named from a monastery founded here, and dedicated to St. Michael in 1384. The passage to Archangel was discovered by the English navigator Richard Chancellor in 1553, and it was the only export of Russia till the formation of the docks at Cronstadt, and the navigation of Petersburg in 1732. The dreadful fire here, by which the cathedral and upwards of 3000 houses were destroyed, occurred in June, 1795. Increased commercial development under Gov. Engelhardt; Alexanderovsk, a new ice-free port, opened by the grand duke Vladimir, 6 July, 1819. Population of the province, 1880, 328,819; 1897, 345,539.

ARCHBISHOP (Greek archiepiscopos), a title given in the 4th and 5th centuries to the bishops of chief cities, such as Rome, Alexandria, Antioch, and Constantinople, who ruled over metropolitans and bishops in the districts attached to those places. The word is first found in the AIsology against the Arians by Athanasius, who died 373. Four archbishops of the Eastern church are styled patriarchs. Riddle.

Before the Saxons came to England, there were three archbishops: London, York, and Carlisle-upon-Usek; but soon after the Reformation, the see of Carlisle was united to York, and the see of Durham to Newcastle. The bishops in Scotland were under the jurisdiction of the archbishop of York until the erection of the archiepiscopal sees of St. Andrews and Glasgow in 1172 and 1413; these last were disannulled at the Revolution; see Glasgow and St. Andrews.

The bishop of Rœchlin was chosen Primus, 1836, the title being conferred on one of the bishops by election.

The rank of archbishop was early in Ireland; see Ferns. Four archbishops were constituted, Armagh, Cashel, Dublin, and Tuam (until then the archbishop of Canterbury had jurisdiction over the Irish, as well as English bishops, in like manner as the archbishop of York had jurisdiction over those of Scotland); 1146.

Of these four archbishops two were reduced to bishoprics (Cashel and Tuam) conformably with the stat. 3 & 4 Will. IV., by which also the number of sees in Ireland was to be reduced from twenty-two to twelve (see Bishops, Cashel, Tuam, Patrick, &c.), 1833.

ARCH-CHAMBERLAIN. The elector of Brandenburg was appointed the hereditary archchamberlain of the German empire by the golden bull of Charles V., in 1356, and on that quality he bore the sceptre before the emperor.

ARCH-CHANCELLORS were appointed under the two first races of the kings of France are, the two sides 240 feet each, and the centre 245 feet; thus the centre arch exceeds the adorned bridge of Sunderland by four feet in the span, and the long famed Rialto at Venice, by 155 feet; see Bridges.
ARCHDEACON.

The archbishops of Mentz, Cologne, and Treves became arch-chancellors of Germany, Italy, and Arles.

ARCHDEACON, a name early given to the first or eldest deacon, who attended on the bishop without any power; but since the council of Nice, his function has become a dignity above a priest. The appointment in these countries is referred to the eighth century. There were seventy-five archdeacons in England (1878) in 1095. The archdeacon's court is the lowest in ecclesiastical polity; an appeal lies from it to the consistorial court by 21 Henry VIII. (1532).

Richard I. revived archery in England in 1195, and was himself killed by an arrow.

The victories of Crevy (1436), Poitiers (1436), and Castillon won chiefly by archers. Four thousand archers of the king surrounded the houses of Parliament ready to shoot; protected by the king, 21 Richard II. (1397).

The citizens of London formed into companies of archers in the reign of Edward III.; and into a corporate body by the style of The Fraternity of St. George. 29 Henry VIII. (1538).

Royal company of archers, instituted by the marquis of Athol, as the king's body-guard for Scotland.

The long bow was six feet long, and the arrow three feet; the usual range from 600 to 800 yards. Robin Hood is said to have shot from 600 to 800 yards. The cross-bow was fixed to a stock, and discharged with a trigger.

Sir Ralph Payne Gallwey, Bart. shot 643 yards, A.D. 1477. (The longest shot ever made by a British archer."

ARCHES, COURT OF, the most ancient consistory court, chiefly a court of appeal from inferior jurisdictions within the province of Canterbury; it derives its name from the church of St. Mary-le-Bow (Sanctua Maria de Arches, London), where it was formerly held, and whose top is raised on stone pillars built archwise. Careull, Appeals from this court lie to the judicial committee of the privy council, by statute, 1832. ARCHIVISTS, SOCIETY OF. In 1805, Mr. Saxe Wynilham founded a society with this title consisting of autograph and MSS. collectors, &c.

ARCHONS. When royalty was abolished at Athens, in memory of king Codrus, killed in battle,
1044 or 1068 B.C., the executive government was vested in elective magistrates called archons, whose office continued for life. Menon, eldest son of Cdrus, was the first archon. The office was limited to ten years, 752 B.C., and to one year 653 B.C.

ARCOLA (Lombardy), the site of battles between the French under Bonaparte, and the Austrians under field-marshall Alvinzi, fought 14-17 Nov. 1796. The Austrians lost 18,000 men in killed, wounded, and prisoners, four flags and eighteen guns. The French lost about 15,000, and became masters of Italy. In one contest Bonaparte, in most imminent danger, was rescued by the intrepidity of his troops.

ARCOIT (East Indies). This city (founded 1716) was taken by colonel Clive, 31 Aug. 1751; was retaken, 1758, but again surrendered to colonel Coote, 10 Feb. 1760; besieged and taken by Hyder Ali, when the British under colonel Baillie suffered severe defeat, 31 Oct. 1780. Arcoit has been subject to Great Britain since 1805; see India.

ARCTIC EXPEDITIONS, see North West Passage, and Franklin's Expedition.

ARDAGH, an ancient bishopric in Ireland, founded by St. Patrick, who is said to have made his nephew, Mell, the first bishop, 451. This see, held with Kilmore since 1742, was held in commendam with Tuam (which see). It was united with Kilmore in 1839, and with Elphin in 1841.

ARDAHAN, a town in Turkish Armenia, ceded to Russia by the Berlin treaty, 13 July, 1878.

ARDFERT AND AGHADOE, bishoprics in Ireland long united; the former was called the bishopric of Kerry; E't presided in the 5th century; William Fuller, appointed in 1603, became bishop of Limerick in 1607, since when Ardfeirt and Aghadoe have been united to that prelacy. Near the cathedral an anchorite tower, 120 feet high, the loftiest and finest in the kingdom, suddenly fell, 1770.

AREIOpagus or Areopagus, a Greek tribunal, said to have heard cases in the dark, because the judges should be blind to all but facts, instituted at Athens about 1507 B.C.; also ascribed to Cecrops, 1535. The name is derived from the Greek Areios pagos, the hill of Mars, through the tradition that Mars was the first who was tried there for the murder of Harmothoeus, who had violated his daughter Alcippe. The powers of this court were enlarged by Solon, about 594 B.C., and diminished by Pericles, 491 B.C. Paul preached on Mars' hill A.D. 52. (Acts xvii.) See Press.

AREOMETER or AREOMETER (from Greek areo, thin), an instrument for measuring the density and specific gravity of fluids. Baumé described his areometer in 1768. Others made by Nicholson and Mohr. Also called Hydrometer.

AREQUIPA, Peru, founded by Pizarro, 1539; was destroyed by an earthquake, 13 Aug. 1868; surrendered to the Chilian 26 Oct. 1883. The town is 7,850 ft. above the sea. Pop. 37,000. In the neighbourhood is the Harvard University high level Observatory (alt. 10,775 ft.) in 1903 under the charge of Prof. Barley. The Arequipa-Puno section of the Mollendo to Cuzco railway (completed in 1873 at a cost of over 5,000,000£) is 218 miles long, and at its highest level is 14,490 ft. above the sea. Puno, pop. 7,000, is a town on the lake Titicaca; alt. 12,000 ft. Steamers ply 117 miles across this lake to Guaya, Bolivia.

ARETHUSA, see Naval Battles, 1778, and Chichester.

AREZZO, near the ancient Arretium or Aretium, an Etrurian city, which made peace with Rome for 30 years, 308 B.C., was besieged by the Galli Sconeses, about 283 B.C., who defeated the Roman army Metellus sent to its relief—a disgrace avenged signally by Dolabella. Arezzo was an ancient bishopric: the cathedral founded in 1277. It is renowned as the birthplace of Machiavelli, Petrarch, Vasari, and other eminent men. Michael Angelo was born in the vicinity.

ARGANDAB, a river in Afghanistan. See Afghanistan, 1830.

became preceptor of Alexander, son of Philip

the circle of knowledge into metaphysics and logic,

physics (including part of the science of mind), and

ethics. His philosophy was too much exalted by the

schoolmen during the middle ages, and too much

deprecated after the Reformation. His works

on natural science contain a vast collection of facts

and an extraordinary mixture of sound and

ARMINIANS, or REMONSTRANTS, derive their former name from James Arminius (or Harmsen), a Protestant divine of Leyden, Holland (died 19 Oct. 1609); the latter name from his followers having presented a Remonstrance to the states-general in 1610. They separated from the Calvinists, objecting to their views respecting predestination, &c. Their doctrines were condemned in 1619, at the synod of Dort (which see); they were exiled till 1625. The Calvinists were sometimes styled Gomarists, from Gomar, the chief opponent to Arminius, James I. and Charles I. favoured the Arminian doctrine.

ARMORIAL BEARINGS became hereditary in families at the close of the 12th century. They were employed by the crusaders, 1190. Armorial bearings were taxed in 1788, and again in 1868. ARMY, British, mainly arose in the reign of Charles II. in 1661, in consequence of the extinction of feudal tenures. The first five regiments of British infantry were established between 1663 and 1680. James II. established several regiments of dragoon guards (1685-8). In 1688 the army consisted of 7000 foot and 1700 cavalry. The Militia then consisted of about 130,000 men, horse and foot. Standing armies were introduced by Charles I. in 1638; they were declared illegal in England, 31 Car. II. 1679; but one was then gradually forming, which was maintained by William III. 1689, when the Mutiny Act was passed. Grose's "History of the British Army" was published in 1801. See Regiments, Recruitment, Militia, and Volunteers.

Territorial and Reserve Forces Act, reorganizing the army into First and Second line, the latter being composed of the militia, volunteers, and yeomanry, passed 23 July, 1897.

ARRAIGNMENT consists in reading the indictment by the officer of the court, and calling upon the prisoner to say whether he is guilty or not guilty. He must not be in fetters, unless it be made necessary by apprehended violence. Before the question is answered, all legal exceptions or objections are to be stated. If he fails, or refuses to plead, a jury is sworn to determine, if he is mute of malice or by visitation of God, whether he is able to plead and understand the course of his trial, whether he is insane. If the prisoner is found to be insane, so as to be unfit to plead, the court orders his detention during his Majesty's pleasure, otherwise the court directs entry of a plea of not guilty and the clerk proceeds to call and swear the jury. On a plea of guilty, the court proceeds to judgment. A previous conviction must not be mentioned on arraignment. Formerly, persons who refused to plead in cases of felony were pressed to death by weights placed upon the breast. A person was declared guilty by verdict of an act passed 1772; but in 1827, the court was directed to enter a plea of "not guilty" in such cases; see Mute.

**ARTEMISIUM,** a promontory in Euboea, near which indecisive conflicts took place between the Greek and Persian fleets for three days, 480 B.C. The former retired on hearing of the battle of Thermopylae.

**ARTESIAN WELLS** (from Artesium, now Artois, in France, where they frequently occur) are formed by boring through the upper soil to strata containing water which has percolated from a higher level, and which rises to that level through the boring tube. The fountains in Trafalgar-square and government offices near have been supplied since 1844 by two of these wells (393 feet deep). At Paris the Grenelle well (1798 feet deep), was completed in 1831, after eight years of exertion, by M. Mulet at an expense of about 12,000 fr. and the well at Passy, which it is said will supply sufficient water for nearly 500,000 persons, was begun in 1855, and completed in 1860 by M. Kind. Artesian wells are in many London breweries, clubs, printing offices have deep wells; these need lowering from time to time as their number increases. That at the Reform Club is 315 feet in depth. Artesian wells, some 4,000 feet in depth, are much used for irrigation purposes in W. Australia. Amongst recently completed wells of interest might be mentioned the New Lodge, Threadneedle Street, which reaches a depth of 1,213 feet. Another well bored to provide water for the Loxington Military Camp in Dorset has a depth of 720 feet, and is capable of raising 3,000 gallons per hour (completed 1907). Also a well recently bored at the Bank of England reaches a depth of 400 feet, and yields a minimum supply of 150,000 gallons per day (completed 1907).

**ARTHUR,** king of Britain, said, mythically, to have lived A.D. 500-532.

The events of his life and the conflicts of the knights of his round table, as sung by the Welsh poets Taliessin, Llywarch Hen, and Aneurin, were incorporated into his Latin history by Geoffrey of Monmouth, about 1135, who died 1143: put into French verse by Geoffrey Gaimar, and by Wace soon after; and set forth in an English poem called Brut by Layamon, about 1205. Walter Map by incorporating in his version the legend of the Holy Grail, introduced the religious element about 1271.

**ARTICHOKEs** are said to have been introduced from the East into Western Europe in the 15th cent. and to have reached England in the 16th.

**ARTICLES OF RELIGION.** On 8 June, 1539, after much disputing, the English clergy in convocation published "Articles decreed by the king's highness" Henry VIII., who published in 1539 the "Statute of Six Articles," decreeing the acknowledge of transubstantiation, communion in one kind, vows of chastity, private masses, celibacy of the clergy, and auricular confession. Offenders were punishable as heretics. In 1531 forty-two were prepared, and published in 1553. These were modified by the convocation, and reduced to Thirteen in Jan. 1553; and they received the royal authority and authority of an act of parliament in 1553. The Lambeth Articles, of a more Calvinistic character, proposed by archbishop Whitgift, were withdrawn in consequence of the displeasure of queen Elizabeth, 1555. One hundred and four Articles were drawn up for Ireland by archbishop Ussher in 1611; but in 1635 the Irish church adopted the English articles. See *Perth Articles.* The 59 Articles were ordered to be removed from the studies at Oxford in Nov. 1571.

**ARTICLES OF WAR** were decreed in the time of Richard I. and John. Those made by Richard II. in 1385 appear in "Groce's Military Antiquities." The articles of war now in force are based upon an act, passed by William III. in 1689, to regulate the army about to engage in his continental warfare.

**ARTIFICERS AND MANUFACTURERS.** Their affairs were severely regulated by the statutes of labourers, 1349, 1350, 1360, 1349, and especially of 1562. They were prohibited from leaving England, and those abroad were outlawed, if they did not return within six months after the notice given them. A law of 1006, and imprisonment for three months, were the penalties for seducing them from these realms, by 9 Geo. II. (1756) and other statutes. The law was modified in 1821; see *Artisans, Workmen, &c.*

The company numbered 1,200 in 1803 and 800 in 1861. Since 1842 the officers have been appointed by the queen. took the fort of Ahmednuggur, 12 Aug., and defeated Scindiah and the rajah of Berar at Assaye, 23 Sept. 1803. This was Wellesley's first great battle, in which he opposed 40,000 with only 4,000 men. The enemy fled, leaving their artillery, &c.

ASSEMBLY OF (130) DIVINES, held at Westminster, 1 July, 1643, convoked by order of parliament to consider the liturgy, government, and doctrines of the church. Two members were elected for each county. The presbyterian majority adopted the Scottish covenant, and drew up the directory for public worship, a confession, and the catechisms now used by the church of Scotland. The last (116th) meeting was on 22 Feb. 1649; see Church of Scotland.

ASSESSED TAXES. By some the date is referred to Ethelbert, in 991; to Henry VII. 1522; and to William III. 1669, when a land-tax was imposed; see Land Tax. The assessed taxes yielded in 1815 (the last year of the war), exclusively of the land-tax, 6,524,764l., their highest amount. These import duties varied in their nature and amount, according to the exigencies of the state. They were considerably advanced in 1797 and 1801, et seq., but reduced in 1816, and in subsequent years. An act for the repeal of certain assessed taxes was passed 16 & 17 Vict. c. 90, 20 Aug. 1853, explained and amended by 17 & 18 Vict. c. 1, 17 Feb. 1854. Acts for the better securing and accounting for the assessed and Income Taxes, 10 Aug. 1854; see Taxes, and Income Tax. Changes were made in the assessed taxes, their time of collection, &c., by the Revenue act, passed 24 June, 1869. Licences for servants, dogs, and armorial bearings were also introduced. An act to provide for uniformity in the assessment of rateable property in the metropolis was passed 9 Aug. 1869. The "Court of General Assessment" first met 19 May, 1870. See House Duty and Land (Tax).

ASSURANCE, see Insurance.

ASSYRIA, originally Assur, an Asiatic country between Mesopotamia and Media, was the seat of the earliest recorded monarchy. Till recently its history was mainly derived from Greek historians, Ctesias, Herodotus, and Phidias Scylax, Berosus, a Greco-Chaldean priest, and the Holy Scriptures. The discovery by Mr. Grotefend of the "Labyrinth of the Ninevites" antiquities, now in the British Museum, and the deciphering of many ancient cuneiform inscriptions, by Grotefend, Sir H. Rawlinson, and other scholars, have thrown much light upon Assyrian history. The chronologers, Blair, Usher, Hales, and Clinton, differ much in the dates. The results of recent investigations are given in the rev. G. Wilkinson's "Fifteen Thousand Feet in the Ancient World," and in prof. A. Sayce's "Assyria, Its Princes, Priests, and People," 1883. Mr. W. W. Bencawen's article "Assyria" in "Chambers' Encyclopedia," 1888, has been used for much of this summary.

becomes energetic and warlike, defends himself in Nineveh for two years, and when overcome burns himself in his palace with his wives and treasures, thus ending the first Assyrian Empire. (Chiraz).

1. This story and most of what is given above, is now considered mythical. The following is based upon the records in the ancient Assyrian tablets and the Bible.

His son, Shalmaneser II, makes large conquests in N. A.-722.

At Karkar he defeats Bahdad, king of Damascus, Ahab, king of Israel, and Hethlon, king of Hamath.

The empire enlarged by his son, Samsu-kin Minmon II.

The Assyrian epica-canon records a solar eclipse, and is thereby the basis of Assyrian chronology.

Assur-ninur king; many revolts.

Den, or Pal, revolts the throne and styles himself Eshath Pileser. He consolidated the empire, reformed the government, quelled revolts and enlarged his dominions by the conquest of Babylon, etc.

His weak son, Shalmaneser IV, king, 727; died or was murdered by Sargon the Tartan, who, after the severe campaign, captures Babylon, and is proclaimed king.

Sargon is killed in his new palace.

His son, Sennacherib, succeeds him.

Babylonia revolts; Merodach-baladan returns, but is defeated at Kirs; Sennacherib conquers Phoenicia, and having been offended by Hayes, he ravages Judea, and besieges Jerusalem, which is saved by the sudden destruction of his army. (Isaiah xxxvii. 36-38; he is killed by his son, 705.)

His son Esar haddon deports his brothers and becomes king at Nineveh, and reorganizes the empire.

He invades Judea, makes Manasseh prisoner.

He invades Egypt and captures Memphis, and after a long campaign, subdues the country and becomes ruler of nearly all the ancient world.

Disturbed by a rising in Egypt and conspiracies at home, he makes his son Assur-hani pal, king at Nineveh, April, 669; and dies during a campaign, Oct. 6tli, 638, leaving the kingdom to his son Sargon, who, in the succeeding 30 years, heABCDEGHIJKLMNOPQRSTUVWXYZ

Great fall of the empire; now revolts; Egypt becomes independent; Kandanan, vicerey of Babylon, and his successor, father of Nebuchadnezzer, is independent; Assyria pal succeeded by his son, Assur-etil-yikini.

Esar haddon II. (the Sarakos of Oesha), the last king; the N. E. provinces invaded by a vast viceroy under the command of Kariun, (a viceroy of Assyria the Medo.)

ASTOLABE, an instrument for observing the stars, said to have been employed by Hipparchus about 130 B.C.; and by Ptolemy about 140 A.D. The modern astrolabe was described by Fabricius in 1513. Chaucer's "The Targaryon" the astrolabe," published 1872 by the Early English Text Society.

ASTROLOGY was cultivated by the Chaldeans, Egyptians, Hindus, Etruscans, Chinese, Greeks, and Romans. It was much in vogue in Italy and France in the 16th century. It is said that Bele, 675-735, was addicted to it; and Roger Bacon, 1214-1292. Lord Burleigh is said to have calculated the nativity of Elizabeth, and she and other princes were dupes of Dee, the astrologer. It is said that Lilly was consulted by Charles I., respecting his projected escape from Cariebrook castle in 1647. Ferguson, an astronomical almanac published in London, 1875, by Michael Nostredamus, a French physician (1503-1566), cultivated astrology, published almanacs, and in 1555, "Centuries" and "Pressages." His oracles, edited by Mr. Chas. A. Ward, appeared in 1892. He was consulted by the Chevalier de Meclie, Henry II. and Charles IX. of France.

ASTRONOMY. The earliest astronomical observations were made at Babylon; it is said about 2231 B.C. ASTROPHYSICS, the science of applying physics and chemistry and other terrestrial sciences to the heavenly bodies by means of spectrumanalysis, photography, &c., developed by sir Wm. Huggins from the work of Kirchhoff and Bunsen, 1861 et seq.

ASTURIAS (Oviedo, since 1533), N. W. Spain, an ancient principality. Here Pelayo collected the Gothic fugitives, about 713, founded a new kingdom, and by his victories checked Moorish conquest. For his successors, see Spain. The heir-apparent of the monarchy has borne the title of prince of Asturias since 1388, when it was assumed by Henry, son of John I., king of Leon, on his marriage with a
descendant of Peter of Castile. In 1808, the junta of Asturias began the organised resistance to the French usurpation.

AYLESBURY, or PRIVILEGED PLACES, at first were places of refuge for those who by accident or necessity had done things that rendered them obnoxious to the law. ATELIERE NATIONAUX (National Workshops), were established by the French provisional government in Feb. 1878. They interfered greatly with private trade, as about 100,000 workmen threw themselves upon the government for labour and payment. The breaking-up of the system led to the collapse of the shops in June following; and the system was abolished in July.

ATHANASIAN CREED. Athanasius, of Alexandria, elected bishop, 329. He firmly opposed the doctrines of Arius, who denied Christ's divinity, was several times exiled; died in 373. Lamy, in his "History of the Creeds" (1854), asserts that this creed, beginning "Quoniam eum," was not composed by Athanasius; that it is made up of two distinct parts, and was originally written in Latin and put into its present shape between 813 and 820; not connected with Athanasius's name by any trustworthy authority before 825; set forth first in Gaul, about 870, gradually extended into Italy, Britain, &c; accepted by the Greek church about 1200. This creed asserts the procession of the Holy Ghost from the Father and the Son, see Filioque.

Dr. Waterland's "Critical History of this creed, 1723.

Memorandum of the great alteration of this creed has arisen in the Church of England, among both clergy and laity, 1779-84.

Modifications approved by several bishops were negatived by the House in convocation in early March 1874. The vote was rejected by the bishops, and the agitation continued.

In a letter to the Earl of Shaftesbury, 22 July, 1877, the archbishops of Canterbury and York expressed their hope of devising a way for rendering the reading of the creed during public worship not compulsory.

Omission of "cannatory clauses" in the creed at services in Westminster abbeys revived discussion as to its use, Jan. 1898, 1899.

Memorial of clergy and laity seriously deprecating "any alteration in the Athanasian creed," as its use has enshrined by the Book of Common Prayer, presented to the Archbishop of Canterbury, signed by 109 clergy, and 49 low communicants (240 clergy, and 739, laity of the province of Canterbury, 635 clergy, 1,417 laity of the province of York) 13 Feb. 1878.

Lower house of convocation by a large majority refused to approve of the resolution of the upper house to allow a discretionary use of the creed, 5 July, 1878.

Memorial signed by 27 deans of cathedrals and colleges within the provinces of Canterbury and York, and addressed to the Archbishop of Canterbury and York, expresses approval of what the bishops have done in regard to the "Cannatory Creed." Feb. 5, July, 1898.

ATHENEAUM, a place at Athens, sacred to Minerva, where the poets and philosophers recited their compositions. This was of Rome, of greatest fame, was created by the emperor Augustus, 13 B.C.—The Athenaeum Club of London was formed 16 Feb. 1824, for the association of persons of scientific and literary attainments, and artists, and noblemen and gentlemen, patrons of learning, &c., by the earls of Liverpool and Aberdeen, the marquises of Lansdowne, Dr. V. Younger, Lord Nickleson, Lord Palmerston, Lord Derby, Croker, Chantrey, Lansdowne, &c, and even future premiers. The clubhouse was erected in 1829-30 on the site of the late Carlton Palace; it is of Grecian architecture, and the frieze is an exact copy of the Panatheniac procession which formed the frieze of the Parthenon.—The Liverpool Athenaeum was opened 1 Jan. 1793.—At Manchester, Bristol, and many other places, buildings have been erected for a like purpose have been founded. —The Athenaeum, a weekly literary and scientific journal in relation to literature, science, art, and drama, originated by James Silk Buckingham, first appeared in 1828. John Francis, publisher, 1831-82, died 6 April, 1882. Rev. Henry Stubbing, first editor, died 12 Sept. 1826, aged 84. The estate and property of Mr. C. W. Dilke in 1830, who edited the paper until 1841, when he entrusted it to T. K. Hervey; in 1855 W. Heppworth Dixon succeeded him, followed by Norman MacColl in 1870. ATHENS.

ATHENS, the capital of ancient Attica, and of modern Greece. The first sovereign mentioned is Ogyges, who reigned in Beotia, and was master of Attica, then called Ionia. Tradition states that in his reign (about 1764 B.C.) a deluge laid waste the country, which so remained till the arrival of the Egyptians, who colonized by whom the land was re-peopled and twelve cities founded, 1536 B.C. The city, said to have been first called Cecropia, was afterwards named Athens in honour of Minerva (Athene), her worship having been introduced by Erechtheus, 1533 B.C. Athens was ruled by seventeen successive kings (587 years), by thirteen peripteral archons (370 years), seven decennial archons (70 years), and mostly by annual archons (756 years). It attained great power, and no other city has had, in a short space of time, so great a number of illustrious citizens. The ancients called Athens 

*, the city, by eminence, and one of the eyes of Greece; see Greece. The early history is mythical and the dates conjectural.

Population of modern Athens, 1871, 48,127; 1879, 63,125; 1886, 159,735 (with Piraeus); 1910, (est.) 200,000.

The MS. text of the recovered work of Aristotle on the Constitution of Athens was published in the British Museum, Jan. 1874.

ATMOLYSIS, a method of separating the constituent gases of a compound gas (such as

of porous material (such as graphite); first made
known in Aug. 1863 by the discoverer, the late professor T. Graham, F.R.S., master of the mint.

ATMOSPHERE, see Air.

ATMOSPHERIC RAILWAYS. The idea of producing motion by atmospheric pressure was
conceived by Papin, the French engineer, about
1680. Experiments were made on a line of rail,
and down across Wormwood Scrubs, London, be-
tween Shepherd's Bush and the Great Western
railroad, to test the efficacy of atmospheric tubes,
the working of the air-pump, and speed of carriages
upon this new principle on railroads in June, 1840,
and then tried for a short time on a line between
Croydon and London, 1845. Atmospheric pressure
was also tried and abandoned, in 1848, on the South
Devon line. An atmospheric railroad was con-
ceived by Mr. William Dunlop and constructed in
the vicinity of Dublin, in Sept. 1843; opened 29 March, 1844;
discontinued in 1855. A similar railroad was pro-
posed to be laid down in the streets of London by Mr.
T. W. Rammell, in 1857. Mr. Rammell's Pneumatic
Railway was put in action successfully at the Crystal
Palace on 27 Aug. 1863, and following days. An
act for a automatic railroad between the Waterloo
railway station and Whitehall was passed in July,
1865. Atmospheric pressure was proposed for a
submarine railroad from Dover to Calais, in 1869; see
Pneumatic Dispatch.

ATOMIC THEORY, in chemistry, deals with the indivisible particles of all substances. The
somewhat involved labours of his predecessors
The number in Edward III.'s reign was under 400 for the whole kingdom. In the time of Henry V., 1414, a law reduced the practitioners in Norfolk, Norwich, and Suffolk, from eighty to fourteen, and restricted their increase. The number of attorneys practising in the United Kingdom was said to be 13,824 (1872). By the Judicature Act, 1873, which came into force, 1 Nov. 1875, all solicitors, attorneys and proctors are now called "solicitors of the supreme court."

ATTORNEY-GENERAL, the chief law officer of the crown, is appointed by letters patent. He acts for the crown in all proceedings at law and equity affecting the royal prerogative; and prosecutes for the crown in criminal and in revenue cases, and grants facts for writs of error. His sanction is required before proceedings can be taken under the Public Health Act, Corrupt Practices Act. He may, in his discretion, prosecute for any misdemeanor, and can stay proceedings in any indictment without consent of prosecutor. In his absence his duties are performed by the "solicitor-general." The first attorney-general was William Bonneville, 1277.

ATTRACTION.

AUCTION, a kind of sale known to the Romans, mentioned by Cicero, Livy, and Petronius Arbiter. The first in Britain was about 1760, by Elisha Yule, a gentleman of Fort George, now Madras, in the East Indies, who thus sold the goods he had brought home. Auction and sales' tax began, 1779. Various acts of parliament have regulated auctions and imposed duties, in some cases as high as five per cent. By 8 Vict. c. 15 (1845), the duties were repealed, and a charge imposed "on the licence to be taken out by all auctioneers in the United Kingdom, of tol." In 1858 there were 4358 licences granted, producing 43,380/; 139,774/; in 1902. The abuses at auctions, termed "knock-outs," caused by combinations of brokers and others, received attention in Sept. 1866. An act regulating sales of land by auction was passed 15 July, 1867. Certain sales are now exempt from being conducted by a licensed auctioneer, such as goods and chattels under a distress for rent, and sales under the provisions of the Small Debts' acts for Scotland and Ireland.

See the very important Sale of Goods Act.

AUDIANI, followers of Aurea of Mesopotamia, who, having been expelled from the Syrian church on account of his severely reproving the vices of the clergy, about 338, formed a sect and became its bishop. He was banished to Syria, where he is said to have made many converts. His followers celebrated Easter at the time of the Jewish passover, attributed the human figure to the Deity, and had other peculiar tenets.

AUDIOMETER (from audio, I hear), an instrument for the measurement of the faculty of hearing; invented by professor Hughes (died 22 Jan. 1900). It consists of a battery of two Leclanché's cells connected with a simple microphonic circuit and telephone; described to the Royal Society, 15 May, 1859.

AUDIPHONE, an instrument to assist the partially deaf, invented by Mr. R. G. Rhodes of Chicago, and modified by M. Colladon of Geneva, in 1880. It consists of a thin sheet of hard ebonite rubber attached to a card-board. The vibrations are conveyed against the teeth, through which and other bones the vibrations are conveyed to the auditory nerve.

This engagement proved decisively fatal to the interest of James II., and Ginkel was created earl of Athlone.

AUGMENTATION OF POOR LIVING OFFICE, established in 1704. 5507 clerical livings, not exceeding 50l. per annum, were found by the commissioners under the act of Anne capable of augmentation, by means of the bounty then established.

AUGMENTATIONS COURT, established in 1535 by 27 Hen. VIII. c. 27, in relation to cap. 28 same section, which gave the king the property of
all monasteries having 2000 a year. The court was abolished by Mary, 1553, and restored by Elizabeth, 1558.

AUGSBURG (Bavaria), originally a colony settled by Augustus, about 12 B.C.; became a free city, and flourished during the middle ages. Here many important diats of the empire have been held. In A.D. 552, a council confirmed the order for the celibacy of the priesthood. Augsburg has suffered much by war, having been frequently taken by siege—in 793, 1704, and, last, by the French, 10 Oct. 1809, when it was restored to Bavaria in March, 1806. Population, 1890, 75,523; 1910, 105,000.

Augsburg Diet, summoned by the emperor Charles V., to settle the religious disputes of Germany, met 29 June, and separated 23 June, 1552. Confession of Augsburg, compiled by Melanchthon, Luther and others, signed by the Protestant princes, presented to the emperor Charles V., and read to the diet, 25 June, 1552.

League of Augsburg, a document issued by Charles V.: an attempt to reconcile the Catholics and Protestants (it was fruitless and was withdrawn), signed 15 May, 1555.

AUGURY. Three augurs, at Rome, with vestals and several orders of the priesthood, were formally constituted by Numa, about 716 B.C. The number increased, and was fifteen at the time of Sylla, 81. The college of augurs was abolished by Theodosius about A.D. 390.

AUGUST, the sixth month of the Roman year (originally called Sextiliis, or the sixth from March), by a decree of the senate received its present name in honour of Augustus Caesar, in the year 8 B.C., because in this month he was created consul, had thrice triumphed in Rome, added Egypt to the Roman empire, and made an end of the civil wars. He added one day to the month, making it 31 days. The appearance of shooting stars on the 10th of Aug. was observed in the middle ages, when they were termed "St. Lawrence's tears." Their periodicity was noticed by Mr. Forster early in the present century. See under France, 10 August, 1792.

AUGUSTAN ERA began 14 Feb. 27 B.C., or 273 years after the foundation of Rome.

AUGUSTIN or AUGUSTINES, a religious order, which ascribes its origin to St. Augustin, bishop of Hippo, who died 430. They first appeared about the 11th century, and the order was constituted by pope Alexander IV., 1259. The rule requires poverty, humility, and chastity. Martin Luther was an Augustin monk. The Augustins held the doctrine of free grace, and were rivals of the Dominicans. The order appeared in England soon after the conquest, and had 32 houses at the suppression, 1536. One of their churches, at Austin Friars, London, erected 1534, and since the Reformation used by British protestants, was partially destroyed by fire, 22 Nov. 1862. It was restored, and reopened, 1 Oct. 1865. A religious house of the order, dedicated to St. Monica, mother of Augustine, was founded in Hoxton-square, London, 1864. Letters and documents of the Dutch Church of London, 1652-1874, edited by J. H. Hessel; completed, 1897.

AULIC COUNCIL, a sovereign court in Germany, established by the emperor Maximilian I., being one of the two courts, the first called the Imperial Chamber civil and criminal, instituted at Worms, 1495, and afterwards held at Spires and Wetzler, and the other the Aulic council at Vienna, 1506. These courts having concurrent jurisdiction, were instituted for appeals in particular cases from the courts of the Germanic states.

AURAY (N. W. France). Here, on 29 Sept. 1344, the English, under John Chandos, defeated the French and captured their leader Du Guesclin. Charles de Blois, made duke of Brittany by the king of France, was slain, and a peace was made in April, 1345.

AURICULAR CONFESSION. The confession of sin at the ear (Latin, auris) of the priest was in early practice never found in the church. It is in the Vulgate, has been forbidden in the 4th century by Nectarius, archbishop of Constantinople. It was enjoined by the council of Lateran in 1215, and by the council of Trent in 1551. It was one of the six articles of faith enacted by our Henry VIII. in 1539, but was abolished in England at the Reformation. Its revival here has been attempted by the extreme or Ritualistic section of the high church party. The rev. Alfred Poole, a curate of St. Barnabas, Knightsbridge, was suspended by his bishop from his office for practising auricular confession in June, 1558, and the suspension was confirmed in Jan. 1559. Much excitement was created by a similar attempt by the rev. Tennyson West at Boyle Hill, in Sept. 1855.

In May, 1574, 483 members of the Church of England presented a petition to conviction court for the education, selection, and licensing of duly qualified confessors, in accordance with the provisions of canon law. Strongly disapproved of by the bishops. Letter from the bishop of London asserting that confession should be to God; that to the minister optional, 25 July, 1873.

Archdeacon Denison (in a letter) declares war against all opposing auricular confession, 22 Aug., 1873.

AURIFLAMMA or ORIFLAMME, the national banner mentioned in French history, belonging to the abbey of St. Denis, and suspended over the tomb of that saint. Louis le Gros was the first king who took this standard from the abbey to battle, 1124. He bore it. It appears for the last time at Agincourt, 25 Oct. 1415. Thél. Others say at Montlhéry, 16 July, 1456. See Holy Cross.

AURORA, Frigate, sailed from Britain in 1771 to the East Indies, and was never again heard of.—Aurora, daily papal newspaper, appeared at Rome 1 June, 1880.

AURORÉ BOREALES AND AUSTRALÉS (Northern and Southern Polar Lights), though rarely seen in central Europe, are frequent in the arctic and antarctic regions. In March, 1716, an aurora borealis extended from the west of Ireland to the confines of Russia. The whole horizon about 57° N. was overcast with continuous electric discharges of a dismal red during a whole night, Nov. 1716. Mr. Foster, the companion of captain Cook, saw the aurora in lat. 58° S. The aurora is now attributed to the passage of electric light through the rarified air of the polar regions. In August and September, 1859 (and about 24 Oct. 1876), when the brilliant aurora appeared very frequent, the electric telegraph wires were seriously affected, and communications interrupted. Auroras were seen at Rome and Basel, and also in Australia. A magnificent aurora appeared in New York and other states, evening of 13 Feb. 1882. A Danish expedition under lieut. Le CoU started for S. Finland to study the aurora, Dec. 1890.

The killed and wounded exceeded 30,000 on the side of the allies, who lost forty standards, 150 pieces of cannon, and thousands of prisoners. The decisive victory of the French led to the treaty of Pressburg, signed 26 Dec., 1805; see Pressburg.

AUSTRALASIA, the fifth great division of the world. This name, originally given to it by De Brosses, includes Australia, Van Diemen’s Land (now Tasmania), New Guinea, New Zealand, New Britain, New Caledonia, &c., mostly discovered within two centuries. Accidental discoveries were made by the Spaniards as early as 1520; but the first accurate knowledge of these southern lands is due to the Dutch, who in 1642 explored a part of the coast of Papua or New Guinea. Torres, a Spaniard, traversed the straits which now bear his name, between that island and Australia, and gave the first correct report of the latter, 1666. The Dutch continued their discoveries. Grant in 1685, and Flinders again (1801-5) completed the survey. M’Clintock. Gold discovered by Mr. Hargraves, &c. 1851.

* Gold discovery. Mr. Edward Hargraves went to California in search of gold, and was struck with the similarity between the rocks and strata of California and those of his own district of Cambodias, some thirty miles west of Bathurst. On his return he worked his lands, examined the soil, and after one or two months’ digging, found a quantity of gold, 12 Feb. 1851. He applied to the colonial government for a reward, which he readily obtained, with an appointment as commissioner of crown lands. The excitement became intense throughout the colony of New South Wales, rapidly spread to that of Victoria and other places, and in the first week of July, 1851, an aboriginal inhabitant, formerly attached to the Wellington mission, and then in the service of Dr. Kerr, of Waiwara, discovered, while tending his sheep, a mass of gold among a heap of quartz. Three blocks of two to three hundred weight, found in the Murray Creek, fifty miles to the north of Bathurst, contained 112 lb. of pure gold, valued at £500. The "Victoria nugget," a tremendous mass of virgin gold, weighing 340 ounces, was brought to England from the Bendigo diggings; and a piece of pure gold of 106 lb. weight was also found from the gold-fields of Mount Alexander and Ballarat. The value of the district of Victoria in Dec. 1851, there were found 2,232,442 ounces, or 25 tons cwt. of gold; and the gold exported up to the same date represented £2,000,000 sterling. In Nov. 1856, the James Baines and "Lion’s Whisker" brought gold at 1,200/ cwt. The "Welcome nugget" weighed 1,047 ounces; value, 8376/ 10/ 14; found at Bakery Hill, Ballarat, 11 June, 1855. It was sold on May 1856, for £14,310; the value of 50,000 ounces had been brought to England from New South Wales and Victoria. Mr. Hargraves died on 2 Nov. 1851.

AUSTRALASIAN ASSOCIATION, for the advancement of science, was founded mainly by the exertions of prof. Liversidge, 1886, held its first meeting in Sydney, Aug. 1888.

AUSTRASIA, (Estreich) (Eastern Kingdom), also called Metz, a French kingdom which lasted from the 6th to the 8th century. It began with the division of the territories of Clovis by his sons, 511, and ended by Carolum becoming a monk and surrendering his power to his brother Pepin, who thus became sole king of France, 747.

AUSTRIA, a Hamburg company's steamship, sailed from Southampton to New York 4 Sept. 1858, with 528 persons on board. On 13 Sept. in lat. 45° N., long. 41° 30' W., it caught fire through the carelessness of some one in burning some tar to extinguish the steere. Only 67 persons were saved—upwards of 60 by the crew, a French barque; the rest by a Norwegian barque.

AUSTRIA, (Estreich) (Eastern Kingdom), anciently Noricum and part of Pannonia, was annexed to the Roman empire about 33; was overrun by the Huns, Avars, &c., during the 5th and 6th centuries, and taken from them by Charlemagne, 791-796. Redivided the government of the country, establishing margraves of Eastern Bavaria and Austria. Louis the German, son of Louis le Débonnaire, about 817, subdued Radbod, margrave of Austria; but in 883 the descendants of the latter raised a civil war in Bavaria against the emperor Charles the Fat, and eventually the margraves of Austria were immediate predecessors of the empire. In 1156 the margraviate was made a hereditary duchy by the emperor Frederic I.; and in 1453 it was raised to an archduchy by the emperor Frederic III. Rodolph, count of Hapsburg, elected emperor of Germany in 1273; acquired Austria in 1278; and from 1293 to 1304 his descendants were emperors. On 14 Aug. 1804, the emperor Francis II. renounced the title of emperor of Austria, and the king of Germany (popularly termed emperor of Germany), and became hereditary emperor of Austria. The condition of Austria is now greatly improving under the enlightened rule of the present emperor. The political constitution of the empire is based upon—1. The pragmatic sanction of Charles VI., 1734, which declares the indivisibility, and rules the order of succession, of the empire. 2. The pragmatic sanction of Francis II., 1 Aug. 1804, when he became emperor of Austria only. 3. The diploma of Francis Joseph, 20 Oct. 1860, whereby he imparted legislative power to the provincial states and the council of the empire (Reichsrath). 4. The law of 26 Feb. 1861, on the national representation. Self-government was granted to Hungary, 17 Feb. 1867.

AUTOMATON FIGURES (or AMUSEMENTS), made to imitate living actions, are of early invention. Friar Bacon is said to have made a bræm head which spoke, a.p. 1204. Albertus Magnus spent thirty years in making another. A coach with horses, with a footman inside, and a lady inside, were made by Camus for Louis XIV. when a child; the horses and figures moved naturally, variously, and perfectly, 1679. Vaucanson, in 1738, made an artificial duck, which performed many functions of a real one—eating, drinking, and quacking; and he also made a flute-player. The writing automaton, exhibited in 1790, was a pentagraph worked by a confederate out of sight. The automaton chess-player, of Mackel, exhibited
the same year, was also worked by a hidden person; so was the "invisible girl," 1800. See Chess. Maelzel made a trumpeter about 1809. Early in this century, an automaton was exhibited in London which pronounced several sentences with tolerable distinctness. The "anthropoglossus," an alleged talking-machine, exhibited at St. James's Hall, London, July, 1816, proved to be a gross imposition. The exhibition of the talking-machine of professor Faber of Vienna, in London, began 27 Aug. 1819, at the Palais Royal, Argyl-street, W. Psycho, an automaton card-player, invented by J. N. Maskelyne and John Alemayne Clarke, exhibited in London, Jan. 1825. Another Zoe, which played cards, was exhibited by Mr. Maskelyne, 1857. An automaton horse was hunted at Hendon, near London, 9 Sept. 1876. See Enquemarelle.

AUTOMOBILE CLUB. was founded in 1857, for the social intercourse of persons interested in motor locomotion and its development, 4,000 members in 1910. Ladies' Automobile Club, instituted 1903, see Motors. Ladies' Automobile Club holds its first meeting at Carlton-house Terrace. 9 June, 1894.

Farman, Blériot and others. The following is a record of the most notable flights, &c.:-

AVIGNON, a city, S. E. France, ceded by
Philip III. to the pope in 1273. The papal seat
was removed by Clement V. to Avignon, in 1309.
In 1348 Clement VI. purchased the sovereignty from
June, countess of Provence and queen of Naples.
In 1409 the French, ware the schism, ex-
peled Benedict XIII, and Avignon ceased to be
the seat of the pappacy. Here were held nine
councils (1080-1417). Avignon was seized and re-
stored several times by the French kings; the last
time restored, 1773. It was claimed by the national
assembly, 1791, and was confirmed to France by
the congress of sovereigns in 1815. In Oct. 1797, horrid
massacres took place here. See Paris, 1309-94.

AYACUCHO (Peru). Here the Peruvians
finally achieved their independence by defeating the
Spaniards, 9 Dec. 1824.

AYDE, or AIDE, the tax paid by the vassal
to the chief lord upon urgent occasions. In France
and England an aide was due for knightings
of the king's eldest son. One was demanded by Philip
the Fair, 1313. The aide due upon the birth of a
prince, ordained by the statute of Westminster
(Edward I.), 1285, was not to be levied until he
was fifteen years of age, for the case of the subject.
The aide for the marriage of the king's eldest
dughter could not be demanded in this country
until her seventh year. In feudal tenures there
was an aide for ransoming the chief lord; so when
our Richard I. was kept a prisoner by the emperor
of Germany, an aide of 20s., to redeem him,
was enforced upon every knight's fee; see Beveledence.

AYLESBURY, Buckinghamshire, was reduced

AZOFF, Sea of, the Paks Macotis of the ancients, communicates by the strait of Yenikale (the Bosporus Cimmerius) with the Black Sea, and is entirely surrounded by Russian territory; Taganrog and Kertch being the principal places. An expedition, composed of British, French, and Turkish troops, commanded by sir G. Brown, arrived at Kertch, 24 May, 1855, when the Russians retired, after blowing up the fortifications. On the 25th the allies marched upon Yenikale, which also offered no resistance. On the same evening the allied fleet entered the Sea of Azoff, and in a few days completed their occupation of it, after capturing a large number of merchant vessels, &c. An immense amount of stores was destroyed by the Russians to prevent their falling into the hands of the allies.

AZOIMIDE, a compound of hydrogen and nitrogen (azote), a very explosive gas, obtained from organic sources, such as benzoyl-glycollic acid and hippuric acid, by prof. Curtius in 1890. It forms salts by combination with metals; it is described in Nature, 10 Dec. 1891.

AZORES, or WESTERN ISLES (N. Atlantic), belonging to Portugal, the supposed site of the ancient Atlantis, are said to have been discovered in the 15th century by Vanderberg of Bruges, who was driven on their coasts by the weather. Cabral, sent by the Portuguese court, fell in with St. Mary's in 1432, and in 1457 they were all discovered and named Azores from the number of goshawks found on them. They were given by Alfonso V. to the duchess of Burgundy in 1466, and colonised by Flemings. They were subject to Spain 1580-1640. The isle Terceira, during the usurpation of don Miguel, declared for Donna Maria, 1829, and a government was established at the capital Angra, 1830-33. A volcano at St. George's destroyed the town of Ursulina, May, 1868; and in 1871 a volcano appeared near St. Michael's, in the sea, where the water was eighty fathoms deep; an island then formed gradually disappeared. A destructive earthquake lasting 12 days, happened in St. Michael's, 1591. The telegraphic cable from Lisbon to the Azores was inaugurated by the king and queen at Carcavellos, 27 Aug. 1893.

AZRAEL, according to Mohammedan mythology, the "Angel of Death," who "separates men's souls and bodies, and with his assistants either tears them asunder with violence, or draws them apart with gentleness."

AZTECS, the ruling tribe in Mexico at the time of the Spanish invasion (1519). In June, 1553, two pretended Aztec children were exhibited in London. They were considered by professor Owen to be merely South American dwarfs. They were married in London, 1 April, 1867, and exhibited for some time after.
BAAL (Lord), the principal male deity of the Phoenician nations, worshipped as the supreme ruler and visiter of nature. He was also frequently worshiped by the Israelites, especially by Ahah, introduced into Israel by Jezebel, his Zidonian wife c.494 B.C. His priests and votaries were massacred by Jehu, and his temple defiled, 883 B.C. The cult of the Babylonian deity Bel, and Tyrian god Mol, were allied to Baal worship. The name, a general Semitic word, was generic, signifying lord, and applied to various deities, or to the same deity regarded in various aspects as exercising different functions. The word enters into the composition of many Hebrew, Phoenician, and Carthaginian names of persons and places, e.g., "Hamnasp," "Baal is gracious," Baalbek, &c. See Sayce's Hibbert Lectures, 1885, and W. R. Smith's "Religion of the Semmites," 1893.

BAALBEC, HELIOPOLIS (both meaning "City of the Sun"), an ancient city of Syria, of which magnificent ruins remain. The chief of those is the temple of the Sun, built by Antinous Pius; converted into a Christian Church by the emperor Theodosius. The Temple of Jupiter, of smaller size, is situated south of the Great Temple; a third ruin is known as the Circular Temple, Visited by Wood (in 1753), and others. Its origin is lost in antiquity. Originally a centre of sun worship, Baalbec became a Roman colony under Augustus Cesar. The city was sacked by the Moslems, 748, and by Timour Beg (Tamerlane), 1400. Visited by terrible earthquake, 1759. Site of the Acropolis excavated by Germans, 1850-52. See Heliopolis; and Germany, 11 Nov. 1868.

BABA WALL. See AFGHANISTAN, 1 Sept. 1880, and Mozaffar.

BAIBEL, Tower of, built by Noah's posterity, 2247-44 B.C. (Genesis, ch. xi.). The magnificent temple of Belus, asserted to have been originally this tower, is said to have had lofty spires, and many statues of gold, one of them forty feet high. In the upper part of this temple was the tomb of the founder, Belus (the Nimrod of the sacred scriptures), who was deified after death. Blair. The site of Nimrod, the site of a temple dedicated to Noah, and called the "Temple of the Seven Lights," Splendent, examined by Rich, Layard, and others, is conjectured by some to be the remains of the tower of Babel. More recent scholarship would seem to identify the Tower of Babel with the Zikkurat of the temple E-sagil, the extant ruins of which, now known as Ninurta, are in Babylon. See Prov. Sayce's "Fresh Light from the Ancient Monuments," 1884; and Sayce's Action of Geo. Smith's "Chaldean Account of Genesis," 1889.

BABIL (embly), the temple of a Mohammedan sect, established in Persia, about 1854, by Sayed Mirza Ali, born 1814, who, while resident near Bagdad, began to preach a new faith which in many respects differed from orthodox Islam. He took the name of Babed-din, "the gate of the faith," whence he became known as the "Bib," and his disciples the "Babas." Subsequently he called himself "the Nazar," "the point or focus," as being not merely the recipient of a new divine revelation, but the locus in which all preceding dispensations would converge. Moses, Jesus Christ, and Mohammed were revered by him as prophets and his forerunners. By the doctrines of Babi-ism polygamy, concubinage, and the inferior states of women were condemned; morality, cheerfulness, and benevolence are inculcated. Buddhist and Tantric ideas are mingled with the teaching of the sect. Incurving the hostility of the orthodox mulhahs, the Bab, with many of his followers, after armed resistance to their persecutors, were defeated and dispersed, he himself being put to death at Tabriz, 8 July, 1850. His successor was Mirza Yahya, a youth of noble birth; Acquiesced in being implicated in an attempt on the life of the Shah, Nasr-ed-Din, in 1852, this sect suffered much persecution, and the Babis were deported to Constantinople, 1863, and soon afterwards to Adrianople, and in 1868 to Famagusta in Cyprus. Since that date Arec has been the headquarters of the section under Baha, numbering about 1,000,000. See also Persia.

BABYLONIA* (Babilll Assyrian, Baburush Persian, the Shinar, Babel, and land of the Chaldees of the Old Testament), a vast plain watered by the Tigris and Euphrates, the seat of a great Asiatic empire, traditionally stated to have been founded by Belus, supposed to have been the

* The city of Babylon was at one time the most magnificent in the world. The Hanging Gardens are described as having been of a square form, and in terraces one above another until they rose as high as the walls of the city, the ascent being from terrace to terrace by steps. The whole pile was sustained by vast arches raised on other arches, and on the top of these arches cemented together with plater of bitumen, and that covered with sheets of lead, upon which lay the mould of the garden, with its beds, where there were various trees, shrubs, and flowers, with various sorts of vegetables. There were five of these gardens, each containing about four English acres, and disposed in the form of an amphitheatre. Steke; Jebardin. Pliny said that in his time it was but a desolate wilderness. Mr. Rich visited the ruins in 1811, and Sir R. Ker Porter in 1818. The laborious researches of Mr. (after Sir A. H.) Layard, Sir H. Rawlinson, M. Rotta, and others, and the interesting relics excavated and brought to this country between the years 1849 and 1855, have caused very much attention to be given to the history of Babylon. Many of the inscriptions in the cuneiform or wedge-like character have been translated, principally by ed. (after Sir Henry) Rawlinson, and published in the Journal of the Royal Asiatic Society. In the spring of 1848 he returned to England, bringing with him many valuable relics, drawings, &c., which are now in the British Museum. Important exploration of the ruins of Niffer, near Babylon, at the cost of the Babylon Exploration Fund of Philadelphia, conducted by Dr. Peters, 1888-92 et seq.; an ancient temple of Bel was discovered, with many other relics; reported Dec. 1894. American explorations on the site of N. Babylon resumed, under Mr. Hazen, in 1873; cities of Nippur, or Niffer, and Multii "Old Bel," in S. Babylonia excavated; reported, Times 24 June, 1894. Explorations carried on at Susa, first by Layrus, palaces uncovered by M. Dkoss, in 1842-44, and by M. de Morgan, Dec. 1839. Excavations of palace ruins, monuments, &c., discovered, Times, 10 Jan. 1893. King Khammurabi's laws abt. B.C. 2200 trans. by Dr. Schiel, Times, 14 April, 1913.

Nimrod of Gen. x. 1. 8. See Assyria. According to the earlier existing history the country was divided between two races, the Semir (Turmanian), the probable inventors of cuneiform writing; and the Accad or Akkad (Semitic), which became predominant. See Accadian. “The fragmentary Canon of Kings,” given by Berosus the Greek-Chaldean priest 268 B.C., had been superseded by the newly-discovered Babylonian canon inscribed on tablets carried away from 2200 to 647 B.C., an unequaled chronological series. Summaries are given by Mr. Jesse in the articles “Assyria” and “Babylonia” in "Chambers' Encyclo- 
depedia", 1901.

Cohn (1853) to be small, single-celled fungoid 
plants. They are found everywhere, and through 
the researches of Koch, Pasteur, Dujard, Burdon 
Samelson, Klein, Fullerton, and others the bacilli 
of many diseases have been identified. Prof. 
Molisch, of Prague, reports a lamp illuminated

BALL. By ancient common law, before and since the conquest, all felonies were bailable, till murder was excepted by statute; and by the 3 Edward I. (1275) the power of bailing in treason, and in divers instances of felony, was taken away. Bail was further regulated in later reigns. It is now accepted in all cases, except felony; and where a magistrate refuses bail, it may be granted by a judge. Acts respecting bail passed 1820, 1832, and 1878.

Battle of Balaklava. - About 12,000 Russians, commanded by general Liprandi, attacked 1 and took some redoubts in the vicinity, which had been captured to about 200 Turks. They next assaulted the English, by whom they were compelled to retire, mainly through the charge of the heavy cavalry, led by brigadier Scarlett, under the orders of lord Lucan. After this, from an unfortunate misconception of lord Raglan's order, lord Lucan ordered lord Cardigan, with the light cavalry, to charge the Russian army, which had retreated in good order with its artillery in front. The order was most gallantly obeyed, and great havoc was made on the enemy: but of 670 British horsemen, only 158 returned. The infantry engaged were termed a "thin red line." 25 Oct. 1854.

31 men and officers surviving. 23 June, 1910.

**Balkans, the ancient Illyrians, a range of mountains extending from the Adriatic to the Euxine. The passage, deemed impracticable, was completed by the Russians under Dehnbich, during the Russian and Turkish war, 25 July, 1829. An armistice was the consequence; and a treaty of peace was signed at Adrianople, 14 Sept. following. The Balkans were crossed by the Russians under Gourko, 13 July, 1857, see Russo-Turkish War. By the treaty of Berlin, 13 July, 1878, the Balkans became the frontiers of the Sultan's European Dominions. **Ballads may be traced in the British history to the Anglo-Saxons. Turner, Adhelme, who died 709, is mentioned as the first who introduced ballads into England. The harp was sent round, and those might sing who could. Bred. Alfred sung ballads, Halmsham. Canute composed one, Turner. Minstrels were protected by a charter of Edward IV.; but by a statute of Elizabeth they were made punishable among rogues and vagabonds, and sturdy beggars, Viner. Fletcher, of Saltham (died 1710) in a letter to Montrose expressed his opinion that making ballads was more important than law-making. The sea-ballads of Dibdin were very popular in the French war; he died 20 Jan. 1833.**

BANK OF ENGLAND was projected by William Paterson, a Scotch merchant (see Darien), to meet the difficulty experienced by William III. in raising the supplies for the war against France. By the influence of Paterson and Michael Godfrey, 40 mer 
chants (aided by Charles Montague) subscribed 
500,000l. towards the sum of 1,200,000l. to be lent 
to the government at 8 per cent., in consideration of the subscribers being incorporated as a bank. The scheme was violently opposed in parliament, 
but the bill (a tamago act) obtained the royal 
sent 25 April, 1694, and the charter was granted 
27 July following, appointing sir John Houblon 
the first governor, and Michael Godfrey the first 
deputy-governor. The bank commenced active 
operations on 1 Jan. 1695, at Grocers' Hall, Poultry,

jointed with others to support Messrs. Baring. See 
London, Nov. 1890.

* The foundation of the building in Threadneedle street 
  was laid 1 Aug. 1792, by sir Edward Bellamy, governor, 
  and the bank was removed there 1843, its site now 
  occupied by G. Sampson, architect. Great additions have 
  been made from time to time by successive architects: sir 
  Robert Taylor, sir John Scane, and Mr. C. R. Cockrell. 
  It now occupies the site of the church, and nearly all 
  the parish of St. Christopher-le-Stocks. The churchyard 
  is now termed "the garden." Another entrance opened

BANKERS'

Irish liouse of commons rejected a bill for establishing a national bank. Important failures in Irish
banks occurred in 1727, 1733, and 1758: this led
gradually to the establishment of the Bank of Ireland at 'St. Mary's abbey, Dublin, I June, 1783.
The business was removed to the late parliament
house, in College-green, in May, 1808. Branch
banks of this establishment have been formed in
most of the provincial towns in Ireland, all since

1828.

having dug and covered pits, they fell into them, and were thrown into confusion. The rout was complete: the English king narrowly escaped, and 50,000 were killed or taken prisoners. (2) At Sanuchiburn, near here, James III. was defeated and slain on 11 June, 1498, by his rebellious nobles.

BANXS, in the feudal law, were a solemn proclamation of any kind: hence arose the present custom of asking banns, or giving notice before marriage; said to have been introduced into the English church about 1200.

BANTAM (Java). Here a British factory was established by captain Lancaster, in 1603. The English and Danes were driven from their factories by the Dutch in 1683; Bantam surrendered to the British in 1811, but was restored to the Dutch at the peace in 1814.

La Popeliniere calculates the victims at 20,000; Mirian, De Serres, and De Thon say 30,000; Davila states them at 40,000; and Perdix makes the number 100,000. In 1774 an educational institution called the Philosophenhaus was opened by Basedow, an institution in its character for the pursuit of intellectual, moral, and physical studies. He retired from its direction 1778, and the school was closed in 1793. The system led, however, to a reform of the earlier methods of education in Germany.

**Basque Provinces, N.W. Spain (Biscay, Gipuzkoa, and Alava).** The Basques are considered by some to be descendants of the ancient Iberi, were termed Vascones by the Romans, whom they successfully resisted. They were subdued with great difficulty by the Goths about 580, and were united to Castile in the 13th and 14th centuries. The origin of the Basque language, like its ethology, is very obscure; it is polysynthetic, and no connection between it and any other language has yet been determined.

France).** Fourteen French ships of the line, riding at anchor here, were attacked by lords Gambier and Cochrane (the latter commanding the fireships), and 4 were destroyed, 11—12 April, 1809. BATHOMETER (Greek, bathos, deep), an apparatus invented by Dr. C. William Siemens to measure the depth of water without submerging a sounding-line, 1861-70. Its action depends on the diminution of the effect of gravitation on the surface of the water as compared with its effect on the earth, owing to the mass of water (of less density) which replaces earth (of greater density), which is duly registered.

BATHS were early used in Asia and Greece, and introduced by Agrippa into Rome, where many were constructed by Augustus and his successors. The theme of the Romans and gymnasia of the Greeks (of which baths formed merely an appendage)
were summary. The marble group of Lacedaemon was found in 1899 in the baths of Titus, erected about 84, and the Etruscan Hercules in those of Caracalla, erected 214.

BAYEUX TAPESTRY, mythically said to have been wrought by Mathilda, queen of William L., or to have been made under the direction of his sister Oda, bishop of Bayeux. This is 260 inches wide, 23 feet long, and is divided into 72 compartments showing the events from the visit of Harold to the Norman count to his death at Hastings; it is now preserved in the public library of Bayeux near Caen. The earliest existing historical mention of the tapestry is made in an inventory of the ornaments of the cathedral in 1726; it remained practically unknown except to the inhabitants of the city until 1724, when a description, based on a drawing at part of the tapestry was presented by M. Landot to the Académie des Inscriptions.

BAYNET, the short dagger fixed at the end of the armed, said to have been invented in Bayonne, in France, about 1417, 1760, or 1660. The queens of Spain and France met the cruel duke of Alva here, June, 1556, it was supposed to arrange the marriage of St. Bartholomew. Charles IV. of Spain abdicated here in favour of "his friend and ally" the emperor Napoleon, 1 May, and his sons, Ferdinand prince of Asturias, don Carlos, and don Antonio renounced their rights to the Spanish throne, 6 May, 1808. In the neighbourhood of Bayonne was much desperate fighting between the French and British armies, 9 Dec., 1813. Bayonne was invested by the British, 14 Jan., 1814; on 14 April, the French made a sally, and attacked the English with success, but were at length driven back. The loss of the British was considerable, and Lieut.-Gen. sir John Hope was wounded and taken prisoner.—A Franco-Spanish industrial and fine arts exhibition was opened at Bayonne in July, 1864.

"BAYOU STATE," a name given to the state of Mississippi, from the numerous bayous (streams or canals connecting other streams or rivers in the southern United States) it contains.

BAY STATE, the popular designation of the state of Massachusetts, United States, from its original name, the Massachusetts Bay Colony, 1620, united with Plymouth Colony in 1692, the two colonies took the name of Massachusetts.

In London the Soho-square bazaar was opened by Mr. Trotter in 1810 to relieve the relatives of persons killed in the war, offered for sale 1870, closed shortly afterwards. The Queen's bazaar, Oxford-street, a very extensive one, was (with the Diorama) burnt down, and the loss estimated at 50,000L., 25 May, 1820. BAZAINÉ, MARSHAL, trial, &c., Dec. 1873 and Aug. 1874. See Metz and France.

BAZÉILLES, a village in the Ardennes, N.E. France. During the dreadful battle of Sedan, 1 Sept. 1870, Bazéilles was burnt by the Bavarians, and atrocious outrages were said to have been committed. Of nearly 2,000 inhabitants it was asserted scarcely fifty remained alive, and these indignantly denied having given provocation. Much controversy ensued, and in July, 1871, gen. Von der Tann asserted correctly that the number of deaths had been grossly exaggerated, that there had been much provocation, and denied the alleged cruelties.

BAZOCHE-DÉS-HAUTES, near Orleans, central France. Here a part of the army of the Loire, under gen. D'Aurelle de Paladines, was defeated after a severe action, by the Germans under the grand-duke of Mecklenburg, 2 Dec. 1870. See Orleans.

Sussex, near which the British and Dutch fleet, commanded by the earl of Torrington, was defeated by a superior French force under admiral Tournville, 30 June, 1690; the allies suffered very severely. BEACONS, see Lighthouses, Jubilee, 1887.

BEACONSFIELD ADMINISTRATION, see Disraeli and People's Tribute.

BEADS were early used in the east for reckoning prayers. St. Augustin mentions them 366. About 1090, Peter the Hermite is said to have made a series of 55 beads. To Dominie de Guzman is ascribed the rosary of the Beads (a series of 15 large and 150 small beads), in honour of the Blessed Virgin, about 1202. Beads soon after were in general use. The Bead-roll was a list of deceased persons, for the repose of whose souls a certain number of prayers was recited. Beads have been found in British barrows.

BEAM AND SCALES. The apparatus for weighing goods was so called, "as it weighs so much at the king's beam." A public beam was set up in London, and all commodities ordered to be weighed by the city officer, called the weigh-master, who was to do justice between buyer and seller, stat. 3 Edw. II. 1309. Stat. Beams and scales, with weights and measures, were ordered to be examined by the justices at quarter sessions, 35 Geo. III. 1794; see Weights and Measures.

BEANS, BLACK AND WHITE, were used by the ancients in gathering the votes of the people for the election of magistrates. A white bean signified absolution, and a black one condemnation. The precept of Pythagoras to abstain from beans, abstinere a fabis, has been variously interpreted. "Beans do not favour mental tranquility," Cicero. The finer kinds of beans were brought here with other vegetables, in Henry VIII.'s reign.

BEAR-BAITING, an ancient popular English sport, prohibited by parliament in 1835.

BEARDS.* The Egyptians did not wear beards; the Assyrians did. They have been worn for centuries by the Jews, who were forbidden to mar their beards, 1490 B.C. Lev. xix. 27. The Tartars waged a long war with the Persians, declaring them infidels, because they would not cut their beards, after the custom of Tartary. The Greeks wore their beards till the time of Alexander, who ordered the Macedonians to be shaved, lest the beard should give a handle to the enemy. Much controversy ensued. In England, they were not fashionable after the conquest, 1066, until the 13th century, and were discontinued at the Restoration. Peter the Great enjoined the Russians, even of officers, to shave, but was obliged to keep officers on foot to cut off the beard by force. About 1831 the custom of wearing the beard increased in Great Britain until about 1890, when moustaches only became popular: after about 1905 it became the fashion to wear no hair of any kind on the face.

BEARER COMPANY, introduced in the British army 1873 for the removal of the wounded from the battle-field and to render first aid. On active service a company is attached to each division.

BEARN, S. France, the ancient Benechammor, was held successively by the Romans, Franks, Goths, and Gascons, and became a hereditary fief of the king of France, in 1819, under Count L., son of Loup, duke of Gascony. From his family it passed to the houses—of Gabaret, 1134; of Moncau, 1170; of Foix, 1290; and of Bourbon, 1590. Its annexation to France was decreed by Henry IV., 1591; affirmed by Louis XIII., 1620.

BEARS and BULLS, see Stocks.

BEAUGÉ, see Ajouy.

BEAULIEU, ABBEY OF, (reformed Benedictines) founded by king John, in the New Forest, Hampshire, in 1204, and dedicated to the Blessed Virgin, had the privilege of sanctuary. It became an asylum to Margaret, queen of Henry VI., after the defeat of the earl of Warwick at Barnet, 14 April, 1471; and to Perkins Warbeck, Sept. 1497.

BEAUMONT, a village near Sedan, department of Ardennes, N.E. France. Near here a part of the army of marshal MacMahon under De Failly, which, after vainly endeavouring to reach Metz, was retreating before the Germans under the crown prince of Prussia, was surprised, defeated, and driven across the Meuse at Mouzon, 30 Aug. 1870. The French loss included about 7,000 prisoners, many guns, and much camp equipage. The victory was chiefly gained by the Bavarians.

BEAUMONT TRUST. Mr. John Thomas Barber Beaumont, artist, financier, founder of the London and County Fire Office (born 1774, died 1830), bequeathed 12,500£, to establish an institution for the moral and intellectual improvement of....

A bearded woman was taken by the Russians at the battle of Pultowa, and presented to the Tsar. Blessed Virgin, 29 May, 1724; her beard measured 14 yard. A woman is said to have been seen at Paris with a bushy beard, and her whole body covered with hair. Hier. de Thiron. The present Margaret, grand-niece of the last, had a long stiff beard. In Bavaria, in the time of Welfius, a virgin had a long black beard. Millic. Bois de Chene, born at Geneva (was said) in 1814, was exhibited in London, in 1852, when, excepting only her hair, she had a profuse head of hair, a strong black beard, large whiskers, and thick hair on her arms and from her neck on her back, and masculine features. One or two bearded women were exhibited by Barnum 1889 and 1889.
The working classes of east London, which was opened in Beamont-square, Mile-end.

BEAUNE-LA-ROLLANDE, a village in the Loire, France, a chief seat of the Burgundian wine trade, giving its name to one of the best of the Burgundies. Here the French army of the Loire, under general D'Aurcille de Paladines, was defeated by the Germans, under prince Frederick Charles, in an attempt to march in the direction of Fontainebleau to relieve Paris, 28 Nov. 1870. The French loss was reported by the Germans to be 10,000 dead, 4,000 wounded; above 1,000 prisoners. Their own loss was heavy. Pop. 12,000.

BEAUVS (N. France), the ancient Beloyum, or Cassinumagus, formerly capital of Picardy. Where Charles the Bold died, holds Burgundy, with 50,000 men, the widow of Jeanne Fourchet or Lainez, also de la Huchette, from her using that weapon, particularly distinguished themselves, and the duke raised the siege, 10 July, 1472. In memory of this the young girls of Beauvais walk in procession on the anniversary of their deliverance, bearing a banner commemorating the tearing down by Jeanne of the standard of the Burgundians.

BED. The ancients slept on skins. Beds were afterwards made of loose rushes, heather, or straw. The Romans are said to have first used feathers. An air-cushion is said to have been used by Heligabalus, 218-222; air-beds were in use in the 16th century. Feather-beds were in use in England in the reign of Henry II. The beds of the Egyptians and other Greeks, like modern couches, became common among the Roman upper classes.

The ancient great bed at Ware, Herts., capable of holding twelve persons, is of the 16th century. Referred to in Shakespeare's Twelfth Night.

A bedstead of gold was presented to queen Victoria on 2 Nov. 1855, by the Maharajah of Cashmeer.

Air-beds and water-beds have been made since the manufacture of india-rubber cloth by Clark in 1833; and by Macintosh in 1824.

Many patent beds obtainable 1910.

BED OF JUSTICE, a French court presided over by the king, whose seat was termed a "bed." It controlled the ordinances of the parliament. The last was held by Louis XVI. at Versailles, 19 Nov. 1787, to raise a loan.

BEDE MEMORIAL is a cross consisting of a base stone bearing a dedicatory inscription: "To the glory of God, and in memory of his servant Beda the Venerable, who was born between Wear and Tyne DCLXXIII., and died at Jarrow, Ascension day, DCCXXV." The stone is 5 ft. 6 in. square and 3 ft. thick, and weighs about 6 tons. The shaft of the cross, which is handsomely carved, is 17 ft. 5 in. long and is sunk 11 in. into the base. The headstone of the cross is 4 ft. 11 in. high, with a spread over the arms of 3 ft. 10 in. The total height from the level of the ground is 23 ft. 6 in. On the east side of the cross are expedite from two twelve foot. The west side depicts scenes from his life, with scenes of the city of Durham. There have been introduced some designs taken from the Lindis-
ascribes its invention to the goddess Isis, and Xemrophos refers to the use of beer in Armenia. Pliny mentions an intoxicating liquor made of corn and water in common use among the peoples of western Europe, including the Gauls, Mead and alcohol were drunk in Britain prior to the Roman invasion. In the 8th cent. ale booths were subject to legal regulations. Beer is manufactured in a primitive manner from malt by native tribes in Africa, and from maize by the Indians of South America. There are numerous varieties in 1891, including ale. England is known as pale ale, "bitter beer," "mild ale," etc., the most celebrated of the mild ales being those manufactured at Burton-on-Trent. Porter and stout, dark-coloured varieties of beer, are produced chiefly in London and Dublin. "Lager beer," a German beer, which in recent years has come into use in this country, is also manufactured in England and in America. The annual consumption of beer in gallons per head in various countries of Europe and in the United States and Canada is shown as follows:—Belgium, 1900; United Kingdom, 20-27; Germany, 20-70; United States, 11-17; Denmark, 11-05; Holland, 8-29; Austria-Hungary, 7-10; Norway, 6-30; Sweden, 5-32; France, 3-21; Canada, 3-17; Russia, 0-84; Italy, 0-178. Beer and ale exported from the United Kingdom: 1879, 45:910 barrels; 1880, 41:102; 1889, 50:712; 1893, 310:806; 1898, 551:051. Excise duty on beer (1893) 6s. 3d. per barrel; addition of 6d. June, 1891; raised to 1s. April, 1892. Beer for purposes of taxation is defined by the inland revenue acts of 1880 and 1888. Adulteration, or addition of anything except finings for clarification, or even the mixing of small beer with strong beer, means a fine of 500, and forfeiture of the beer. In the case of a beer seller conviction of adulteration is registered and may be imposed on his license; see Mr. Brookes, Pater, Testaments, Asn. 

BEES. Mount Hybla, on account of its odoriferous flowers, thyme, and abundance of honey, has been poetically called the "empire of bees." Hyppetricus, in Attica, was also famous for its bees and honey. The economy of bees was admired in the earliest ages; and Eumelus, of Corinth, wrote a poem on bees, 741 B.C. Bees were introduced into New England, in 1670, and have since spread over all the continent of North America. The satirized "Fable of the Bees" appeared in 1723. Heber published his observations on bees in 1762. The Apian Society had an establishment at the Asn. 3-mill, near London (1860-2). The Ligurian variety of the honey-bee was successfully introduced into England in 1876. A British Beekeepers Association, founded in May (Mr. John Leek, first president), first exhibition in Crystal Palace, 8 Sept. 1874; at other places since. C. M. Prendergast, of American origin, introduced into London influenza of 1742; first at Holloway. Geographical, musical, and bees began early in 1876. 

BEES, ST., Cumberland. A monastery was founded here by St. Begga, 650; a grammar school by abp. Grimold, 1383; a clerical training college by bp. Law, 1847. 

BEET-ROOT is extensively grown in England. Beta vulgaris. red beet, is used for the table as a salad. Margratt first produced sugar from the beet-root in 1747; M. Adlard produced excellent sugar from the beet-root in 1764; and M. Dechamps, a chemist of France, at the instance of Bonaparte, largely extracted sugar from the beet-root in 1800. More than half the sugar consumed in France is now manufactured in that country from beet. It is also largely manufactured in other countries, especially in Germany. 

BEGGARS were tolerated in ancient times, being often musicians and ballad-singers. In 1388, 1530, 1535, 1547-50 severe laws were passed against them. By 14 Eliz., c. 5, 1572, sturdy beggars were ordered to be "grievously whipped and burnt through the right ear," punished capital for the third offence: acts consolidated 1731. By the Vagrancy Act (1824), 5 Geo. IV. c. 83; all public beggars are liable to a month's imprisonment. See Poor Laws, Mendicity Society, and Vagrants. The "Beggar's Opera," by John Gay, a satire against the government of Sir Robert Walpole, was produced at the Lincoln's-inn-field-theatre, 29 Jan., 1727-8, and had a run of 63 nights; see Geneva. 

BEGUINES, a congregation of nuns first established at Liége, and afterwards at Nivelle, in 1207, some say 1226. The "Grand Beguinage" of Bruges was the most extensive. Some of these nuns imagined that they could become sinless. The council of Vienne condemned this error, and abolished a branch of the order in 1511. They still exist in Germany and Belgium, acting as nurses to the sick and the abandoned, &c. 

BEHEADING, the Decollatio of the Romans introduced into England from Normandy (as a less ignominious mode of putting high criminals to death) by William the Conqueror, 1076, when Walthoef, earl of Huntington, Northampton, and Northumberland, was first so executed. After this mode of execution became frequent, particularly in the reigns of Henry VIII., Mary, and Elizabeth, when men of the noblest blood thus perished, the aged Queen of Salisbury, 27 May, 1541; lady Jane Grey, 12 Feb. 1554. 

BEHINSTUN, in Persia. At this place is a rock containing important inscriptions of Darius Hystaspes about 518 B.C. in three languages, in cuneiform (or wedge-shaped) characters, which were deciphered and translated by sir H. Rawlinson in 1831-6, and published in the Journal of the Royal Asiatic Society. 

BEHRING'S STRAIT, discovered by captain Vitus Behring, a Danish navigator in the service of Russia. He thus proved that the continents of Asia and America are connected by a water passage thirty-nine miles, 1728. He died at Behring's island in 1741. In 1728 captain James Cook surveyed the coasts of both continents. See United States, 1890-91. 

The ear Alexander L., in 1821, declared the Behring seas closed to foreign fishing; this was at once repudiated by Mr. J. Quincy Adams, secretary of the United States. Alaska was purchased in 1867 from Russia, by the states, who afterwards assumed the Russian claim upon the seas, and seized the British Columbus sealing vessels. The seizure of the Black Diamond sloop by the U.S. revenue cutter Rush, 3 July, was declared legal by Mr. Secretary Blaine, U.S. 1 Aug. 1859; while the British government claimed, as heretofore, the right of fishing in waters beyond the territorial limits. The governments agreed to refer the question to arbitration, Feb. 1890. President Harrison proclaimed the Behring seas closed to unauthorized sealing, 24 March. A Blue Book was published, 1 Aug., containing the correspondence between the two governments from 1 Sept. 1859, to 2 Aug. 1876. The reports of Salisbury demanded that, pending arbitration, British sealing vessels should not be molested, adding that so, they should be protected. 2 Aug. 1879. Negotiations paused, arbitration refused by Mr. Blaine.

BELGRAVE, capital of Servia, a city on the right bank of the Danube. It was taken from the Greek emperor by Solomon, king of Hungary, in 1672; gallantly defended by John Hunimedes against the Turks, under Mahomet II., July to Sept. 1456, when the latter was defeated, with the loss of 40,000 men. Belgrade was taken by Sultan Soliman, Aug. 1521, and retaken by the Imperialists in 1526, from whom it was again taken by the Turks, 1687. It was besieged in May, 1716, by prince Eugene. In that year the Turkish army, 200,000 strong, approached to relieve it, and on 5 Aug. a second battle was fought at Peterwardein, in which the Turks lost 28,000 men. Eugene defeated the Turks, Aug. 17, and Belgrade surrendered Aug. 28. In 1739 it was ceded to the Turks, after nine fortifications had been demolished. It was retaken in 1788, and restored to the peace of Reichenbach, in 1799. The Servian insurgents had possession of it, 1860-13. In 1872 it was placed under prince Milosh, subject to Turkey. The fortifications were restored in 1824. On 14 June, 1854, the Turkish pasha was dismissed.

BENEDICTINES, an order of monks founded by St. Benedict (lived 480-543), who introduced the monastic life into Western Europe, in 529, when he founded the monastery on Monte Cassin in Campania, and eleven others afterwards. His Rule Monachorum (rule of the monks) soon became the common rule of western monachism. No religious order has been so remarkable for extent, wealth, and men of note and learning, as the Benedictine. Among its branches the chief were the Cluniacs, founded in 910, and the Cistercians, founded in 1096, and reformed by St. Bernard, abbot of Clairvaux, in 1116; and the Carthusians, from the Chartreux (hence Charter-house), founded by Bruno about 1080. The Benedictine order was introduced into England by Augustin, in 596; and William I. built an abbey for it on the plain where the battle of Hastings was fought, 1066; see Battle-Abbey. William le Greve, earl of Warwick, built a convent at Lewes, in Sussex, in 1077. Of this order it is reckoned that there have been 400 popes, 200 cardinals, 50 patriarchs, 116 archbishops, 4,000 bishops, 12 emperors, 46 kings, 41 queens, and 3,600 saints. Their founder was canonised. Baronia. The Benedictines have taken a notable part in politics, but have produced many valuable literary works.

BENEFICE (literally a good deed or favour), or FINE. Clerical benefices originated in the 12th century, when the priesthood began to imitate the feudal lay system of holding lands for performing certain duties; till then the priests were supported by alms and oblations at mass. Vicarages, rectories, perpetual curacies, and chaplaincies, are termed benefices, in contradistinction to dignities, such as archbishops. A rector is entitled to all the tithes; a vicar, to a small part or none. All benefices that should become vacant in the space of six months, were given by pope Clement VII. to his nephew, in 1534. It was seized by the king of Naples, but restored to the pope on the suppression of the Jesuits, 1773. Talleyrand de Périgord, Bonaparte's arch-chancellor, was made prince of Benevento, 1806. † The division of the Bible into chapters has been ascertained to archbishop Latrobe in the 17th, and to archbishop Langley in the 18th century; but T. Hartwell Horne considers the real author to have been cardinal Hugo de Sancto Canto, about the middle of the 16th century. The division into sections was commenced by Rabbi Nathan (author of a Concordance), about 1445, and completed by Athanas, a Jew, in 1564. The present division into verses was introduced by the celebrated printer, Robert Stephens, in his Greek Testament (1551) and in his Latin Bible (1567-8).

Shapiro, were exhibited in the British Museum, Aug., 1833, under a critical examination by Dr. Ginsburg and others, declared to be forged. M. Shapiro, probably insane, committed suicide at Rotterdam, 5 March, 1834. BILLIARDS (Old French billiard, "a stick with a curved end"). The French ascribe the invention to Henrique Devigne, an artist, about 1571; the game was mentioned by Spenser about 1591, and 1607. It was played by Cotton in his "Compleat Gamester," 1674. Slate, billiard tables were introduced in England in 1827; other changes since.

The Champion Cup has been won since 1870: by W. C. Peall, 1870; W. S. Diggle, 1871, 2nd March, 1872, 4 Feb. 1874; J. Roberts, jun., 14 April, 1873, 30 May, 1875, 30 Jan. 1871, 24 May, 1875, 20 Dec. 1878, 25 May, 1877, 30 March-1 April, 1883, 1-3 June, 1883, by J. Bennett, 25 Nov. 1870, 2 Nov. 1870, 12-13 Jan., 1881. From 1883 to 1892 J. Roberts, jun., held undisputed claim to the title of champion, when in the fast-named year, challenged by C. Diggle, the match taking place under the new rules regulating the "spot stroke" and "push stroke," the width of the pockets, and the distance of the billiard spot from the top cushion. The new rules, however, the billiard Association, came into force 1 Oct. 1892. A match of 18,000 up was played March-April, 1892, between Roberts and Dawson, the former winning by 1,314 points.

The American "Billiard Championship," instituted in 1883, has since been won by Mr. H. O. Lonsdale, 1883; Mr. A. P. Gaskell, 1888, 49-91; Mr. W. D. Courtney, 1890-91; Mr. A. R. Wisdom, 1892-93, 1903; Mr. S. S. Christie, 1892-1902-13; Mr. A. H. Vahid, 1897; Mr. S. H. Fry, 1893-1900; Mr. H. Mitchell, 1893-94; Mr. T. Vaughan, 1894; Mr. A. W. T. Good, 1902-3; Mr. W. A. Lovejoy, 1904; Mr. E. C. Breed, 1906; Mr. H. C. Viner, 1907-8; Major Fleming, 1909.

The duplicating of the dates in the foregoing list is due to the fact that the championship was competed for twice each year until it became an annual tournament in 1903.

The Highest Spot-barred Break was: 14,657 by T. Taylor, 1871, 25 Apr., 1876; 14,393 by F. C. Ives, Humphrey's hall, Knaresborough, 1 June, 1893; 13,792 by J. Roberts, junr., R. Diggle, at Manchester, 17-24 May, 1891; 8,935 by E. Diggle, r. J. Roberts, r. Diggle, Argyll hall, 4 Jan., 1907.

World Record Break under I.A. Rules: 905-135 (including 349,552 cradle stroke) by C. Diggle, by 21 Nov., 1892.

The "anchor" or "cradle" stroke was productive of immense breaks, which reached a climax in the game between F. Reece and J. Chapman of 905-135, June 4-June 7, 1892. Reece's last break of 490,135, was not officially recognized by the Billiard Association owing to play having been protacted into the night after the exclusion of the electric light, and was not accordingly "made in public." Reece's next best break of 490,001, 27 May-1 June, was beaten by W. Cook of 472,790 in June. The stroke was eventually barred by the Billiard Association to obviate the otherwise inevitable destruction of interest in the game by reason of the monopoly of this stroke, 1907.

* Bishops have the titles of Lord and Right Rev. Father in God. The archbishops of Canterbury and York have the title of Prince. The bishops of London, Durham, and Winchester have precedence of all bishops; the others rank according to seniority of consecration.

+ An order in council, Oct. 1838, directed the sees of Bangor and St. Asaph to be united on the next vacancy in either, and Manchester, a new see, to be created thereupon; this order, as regards the union of the sees, was rescinded 1847.
BISHOPS IN IRELAND are said to have been consecrated in the 2nd century; see Church of Ireland.

Prebends were constituted, and divisions of the bishoprics in Ireland made, by Cardinal Papae, erected from pope Eugene III.

Several prebends privy to Queen Mary.

Ep. Affronted with death ignominiously.

Two bishops deprived for not taking the oaths to William and Mary.

Church Indemnities Act, for reducing the number of bishops in Ireland, 3& W. IV. c. 37, passed 14 Aug. 1833.

By this statute, the four archbishops of Armagh, Dublin, Cashel, and Tuam, the first two were to be abolished on the demission of the present archbishops, which has since occurred; and it was enacted that eight of the then-eighteen bishops should, as they become void, be forthwith united to other sees, which was accomplished in 1835, so that the Irish church at present consists of two archbishops and ten bishops.

BISHOPS IN SCOTLAND were probably nominated in the fourth century.

The Reformation, styling themselves "the Congregation of the Land," having taken up arms and declared themselves a nation, Mary of Scots, called a parliament, which set up a new form of church policy on the Genevan model, in which bishops were replaced by "superintendents." 

Episcopal synod held by the regent Melville, see Tolbooth Kirk.

Three prelates for Scottish sees consecrated at Lambeth: John Spottiswoode, Gavin Hamilton, and Andrew Anderson for Glasgow, Galloway, and Dunkeld.

BISHOPS, COLONIAL, &c. By 15 & 16 Vict. c. 52 (1852), and 16 & 17 Vict. c. 49 (1853), the colonial bishops may perform all episcopal functions in the United Kingdom, but have no jurisdiction.

Episcopacy restored; an archbishop (James Sharp) and three bishops consecrated by Sheldon, bishop of London. 15 Dec. 1661.

The Scotch convention expelled the bishops: abolished episcopacy; declared the throne vacant; drew up a claim of right; and proclaimed William and Mary.

Episcopacy formally abolished, and the bishops' revenues sequestered. 11 April, 1684.

New episcopacy formally restored when it was agreed to pay the revenues.

The Episcopal church was thus reduced to the condition of a Non-conforming body, at first barely tolerated, and then after the Revolution of 1688, it was quite established.

Bishop Rose connected the established episcopal church of Scotland with that of form of it which is now merely tolerated, he having been bishop of Edinburgh from 1683 till 1728, and having been deposed in 1688. Dr. Fullarton became the first post-revolution bishop of that see. Fife (now St. Andrews, so called in 1684) now unites the bishopric of Dunkeld (re-instituted in 1757) and that of Dunblane (re-instituted in 1749). Ross (of uncertain date) was united to Moray (re-instituted in 1727) in 1688. Argyll and the Isles never existed independently until 1845, having been conjoined to Moray and Ross, or to Ross alone, previously to that year. Galloway has been added to the see of Glasgow.

BISHOPS, AMERICAN. The first was Samuel Seabury, consecrated bishop of Connecticut by four non-jurating prelates, at Aberdeen, in Scotland, 14 Nov. 1784. The bishops of New York and Pennsylvania were consecrated in London, by the archbishop of Canterbury, 4 Feb. 1787, and the bishop of Virginia in 1789. Several American bishops formed part of the Pan-American synod, at Lambeth, 21-27 Sept. 1865. The first R. C. bishop of the United States was Dr. Carroll, of Maryland, in 1780.

BISHOP'S RING, the name given to the halo or coronet extending from 20° to 30° from the sun, caused by the diffusion of solar light through the minute particles of volcanic dust suspended in the air after the great volcanic eruption at Krakatoa, in Java, 26 Aug. 1883. The phenomenon was first observed by Mr. Bishop at Honolulu, 5 Sept., 1883, hence the name.

BISHOPS, SUFFRAGAN, to assist metropolitan, exist in the early church. Twenty-six, appointed by Henry VIII. 1534, were abolished by Mary, 1553, and restored by Elizabeth, 1558. The last appointed is said to have been Sterne, bishop of Colchester, 1666. The appointment of suffragans bishops was revived in 1869, and archdeacon Henry MacKenzie, suffragan bishop of Nottingham (diocese of Lincoln), was consecrated 2 Feb. 1870, and archdeacon Edward Parry, suffragan bishop of Dover (diocese of Canterbury), 23 March, 1870. Others have been appointed since; there were 9 in 1889; 10 in 1892; 28 suffragans in 1905; 29 suffragans and 5 assistant bishops in 1906; 39 suffragans in 1917; 30 in 1919. See Suffragan.

BITHYNIA, an ancient province in Asia Minor, is said to have been invaded by Thracian tribes, some named Bithyini, who gave it the name of their tribe. It was successively occupied by the Assyrians, Lydians, Persians, and Macedonians. Most of the cities were rebuilt by Greek colonists.

Blackburn, Lancashire, so called in Domascade-book. The manufacture of a cloth called Blackburn check, carried on in 1650, was superseded by Blackburn greys. In 1757, James Hargreaves, of this town, invented the spinning-jenny, for which he was eventually expelled from the county. About 1810 or 1812 the townspeople availed themselves of his discoveries, and engaged largely in the cotton manufacture. The Blackburn mills are equipped with, approximately, 80,000 looms and 1,200,000 spindles. For a long period the town has ranked as the greatest weaving centre in the world. In his late Majesty, King Edward VII., laid the foundation stone of a technical school on May 9, 1888, and thus inaugurated a large scheme of town improvement, a great clearance of slums, and a growth of industries for the purpose. Since then the clearance has been continued by stages, and early in 1910, on another portion of the site, the corporation commenced the erection of a session-house and extensive school premises. Blackburn murder, see Trials, July, 1876. See Riots, 1878. Population, 1901, 134,069.

BLACKFRIARS, Bridge.

LONDON. The first stone of the new bridge was laid 30th June, 1863, and it was completed by Mylne, in 1866. It was frequently repaired, 1853-58, and then began to sink. In 1894 it was pulled down, and a temporary bridge erected. The foundation of a new five-arched bridge, designed by Mr. Joseph Cubitt, was laid by Lord mayor Hale, 20th July, 1863, and the bridge was opened by Queen Victoria 6th Nov., 1869. The first railway train (London, Chatham, and Dover) entered the city of London over the new railway bridge, Blackfriars, 6th Oct., 1864. Another railway bridge was opened 7th Jan., 1884. Fatal accident during operations for widening the bridge: 5 men killed, 23 Nov. 1897; the bridge widened, and new portion opened by the lord mayor, who drove the first train across on 14th Sept., 1899.

BLACK FRIDAY, 11 May, 1868, the height of the commercial panic in London, through the stoppage of Overend, Gurney & Co. (limited), on 10th May. Messrs. John Henry and Edmund Gurney, and their partners, committed for trial for conspiracy to defraud, 21st Jan., 1869, were tried and acquitted, 13th-23rd Dec., 1869. On Friday, 21st Nov., 1869, a temporary panic was produced by the embarrassments of Messrs. Baring Brothers.

BLACK HAND, the terror of the Italian colonies in New York. This was not a secret society like the "Mafia" and "Camorra," but a collection of individual blackmailers, working in groups, and using the sign of a black hand. In 1895, 21 "Black Hand" outlaws were recorded—tenarched by being held without any serious harm, or stabbed with stiletto wounds. Twenty-three similar crimes are recorded for 1900. Lieut. Petrosino, of the New York detective force, who had gone to Italy to prosecute enquiries regarding the society, was murdered at Palermo in Sicily, 12 March, 1909. See Spring, 1885.

BLACKHEATH, Kent, near London. Here Wat Tyler and his followers assembled 12 June, 1381; and here also Jack Cade and his 20,000 Kentish men encamped, 1 June, 1450; see Tyler and Cade. Here the Cornish rebels were defeated and Flannock's insurrection quelled, 22 June, 1497. The ancient cavern, on the ascent to Blackheath, popularly termed "the retreat of Cade," and of bandits in the times of civil commotion, was covered in 1780. Several daring highway robbers were committed near the heath, and the youthful culprits punished, in 1877. See Trials. Murder of Mrs. Arabella C. Tyler at Kidbrook-park-road, 14 Aug., 1848.

BLACK LEGS. A name commonly given to cheating gamblers, was unjustly given to non-unionist workmen by the unionists and others during the labour agitation in 1889 and 1890.

BLACK LETTER, employed in the first printed books in the middle of the 15th century. The first printing types were Gothic; but they were modified into the present Roman type about 1469: Pliny's Natural History was then printed in the new characters.

BLACK LIST, name given to printed lists of insolvent, bankrupts, and other matters affecting the credit of firms and individuals, published in London, weekly or bi-weekly, drawn from public registers. The legality of the publication of this kind has been questioned, but, in the case of the Scottish Mercantile Society's Record in 1846, the house of lords found "such publication" was not slandering. Private lists of a searching kind issued to subscribers were first started by Mr. Thos. Perry of Cornhill. Similar systems widely used in America and elsewhere as a "Black list" in regard to drunkards came into operation under the Licensing Act of 1862.

BLACK MAIL, a compulsory payment for protection of cuttage, &c., made in the border counties was prohibited by Elizabeth in 1601. It was exacted in Scotland from the lowlanders by the highlanders, till 1735. It checked agricultural improvement. The term black-mail has been applied to the payments of new commercial companies for notices respecting them in certain newspapers, 1889-90.

Five men convicted and sentenced for black-mailing (Andrew Grant and Herbert Colloton—penal servitude for life). July 5, 1897.

Richard, Edward, and Leonard Chrimse sentenced to several years penal servitude for blackmailing women. 20 Dec., 1898.

Oliveier Fletcher sentenced to 7 years and John Cox to a months imprisonment. 15 April, 1899.

Franz von Veltheim, on a charge of demanding large sums of money with menaces from Mr. S. B. Joel, was found guilty and sentenced to 20 years penal servitude. See Trials. 12 Feb., 1908.

Robert Stoudin and Sevier, charged at Westminster to obtain by menaces the sum of 5,000, from Jack Barnard Joel, was found not guilty. See Trials. 12th July, 1909.

BLACK MONDAY, Easter Monday, 14 April, 1360. "So full dark of mist and hail, and so bitter cold that many men died on their horsebacks with the cold." Now. The day on which a number of the English noblemen and gentry met near Dublin, in 1209. The day of panic when the Scottish rebels in 1745 were reported to have arrived at Derby, and the Bank of England paid in sixpences.

BLACK MONEY. base foreign coin so termed. 1333.

BLACK ROD has a gold lion at the top, and is carried by the usher of the order of the knights of the garter (instituted 1349), instead of the mace. He also keeps the door when a chapter of the order is sitting, and during the sessions of parliament attends the house of lords and acts as their messenger to the commons. Gen. sir M. Biddulph, G.C.B., died 23 July (aged 80), 1904; succeeded by adm. sir H. F. Stephenson, G.C.V.O., K.C.B., 19 Aug. 1904.

BLACK SEA, the Euxine (Fontus Euxinus of the ancients), a large internal sea between the S.W. provinces of Russia and Asia Minor, connected with the sea of Azoff by the straits of Yenikale, and with the sea of Marmora by the channel of Constantinople. This sea was much frequented by the Greeks and Italians, till closed to all nations by the Turks after the fall of Constantinople in 1453. The Russians obtained admission by the treaty of Kakhovka, 10 July, 1774. It was partially opened to British and other traders (since when the Russians gradually obtained the predominance). Entreated by the British and French fleets, at the requisition of the Porte, after the destruction of the Turkish fleet at Sinope by the Russians, 30 Nov. 1775, 2 Jan. 1854.

A dreadful storm in this sea raged, and caused great loss of life and shipping, and valuable stores for the allied armies. See Russo-Turkish War.

The Black Sea was opened to the commerce of all nations by the treaty of 1856. The article of the treaty of Paris, 30 March, 1856, by which the Black Sea was opened to the commerce of all nations, and interdicted to any ships of war; and the erection of military maritime arsenals forbidden, was repudiated by a Russian circular dated 10th Oct. 1870.

After some correspondence, the meeting of a conference on the subject, in London, was agreed to by all the powers concerned in the treaty. The conference met in London 27 Jan., 1871, and a treaty was signed by which the neutralization of the sea was abrogated; but it was agreed by a special protocol, that no nation shall liberate itself from the obligations of a treaty without the consent of the others who signed it.

BLACKWALL (London), the site of fine commercial docks and warehouses. See Docks. The Blackwall railway was opened to the public, 4 July, 1840; the eastern terminus being at Blackwall wharf, and the western in Fenchurch street. See Tunnel, 1841, et seq. and Nary, June, 1848.

BLACK WATCH, armed companies of the loyal clans (Campbells, Monroes, etc.) employed to watch the highlands from about 1725 to 1739, when they were formed into the celebrated 42nd regiment, enrolled as "The Royal Highland Black Watch." Their removal for foreign service probably facilitated the outbreak in 1745. They wore dark tartans, and hence were called Black Watch. They have served with distinction in many campaigns.

BLANKETERS. A number of operatives who, on 10 March, 1817, met in St. Peter's field, near Manchester, many of them having blankets, rugs, or great coats rolled up and fastened to their backs. This was termed the Blanket meeting. They proceeded to march towards London, but were dispersed by the magistracy. It is stated that their object was to commence a general insurrection. See Derby. Eventually the ring leaders had an interview with the cabinet ministers, and a better understanding between the working classes and the government ensued.

BLANKET SCANDAL, see under South African War.

BLANKETS are said to have been first made at Bristol by Thos. Blanket, in the 14th century. This is doubtful.

BLASPHEMY was punished with death by the law of Moses (Lev. xxiv.) 1491 B.C.; and by the code of Justinian, A.D. 529. It is punishable by the civil and canon law of England, regulated by Geo. III. c. 8 (1819). Daniel Isaac Eaton was tried and convicted in London of blasphemy, 6 March, 1812. Robert Taylor, a protestant clergyman, was tried twice for the same crime. He was sentenced to two years' imprisonment, and largely fined, July, 1831. In Dec. 1840, two publishers of blasphemous writings were convicted.

BLAZONRY. Bearing coats-of-arms was introduced and became hereditary in France and England about 1192, owing to the knights painting their banners with different figures, thereby to distinguish them in the crusades. See Heraldry.

BLEACHING. In Egypt, Syria, India, and Gaul, Pliny. An improved chemical system was adopted by the Dutch, who introduced it into England in 1598. The first large bleach-fields in Lancashire, Fife, Forfar, and Renfrew, and in the vale of the Leven, in Dumbarton. The application of the gas chlorine to bleaching is due to Berthollet's discovery, about 1783. Its combination with lime (as chloride of lime) was devised by Mr. Tennant, of Glasgow, who took out a patent for the process in 1798, and by his firm it
is still extensively manufactured. In 1822 Dr. Ur published an elaborate series of experiments on this substance. A new and more rapid process invented by Mr. Jacob Baynes Thompson, tried at Bolton, and reported successful, April, 1884. Improvements made by Mr. William Mather, 1885. The manufacture of bleaching powder was cheapened by Mather's process, which is now extensively utilized, by Messrs. Brunner, Mond & Co., reported, Oct. 1885. In 1856 bleaching and dyeing works were placed under the regulations of the Factories Act.

BLENEHEIM (or Plintheim) a village in Bavaria on the left bank of the Danube, near the town of Hochstett, the site of a battle fought 2 Aug. (new style, 13), 1704, between the English and confederates, commanded by the duke of Marlborough, and the French and Bavarians, under marshal Tallard and the elector of Bavaria. The latter was defeated with the loss of about 12,000 killed, and 13,000 prisoners (including Tallard). Bavaria became the prize of the conquerors. The British parliament gave Marlborough the honour of Woodstock and hundred of Wotton, and erected for him the house of Blenheim.

BLIND. The first public school for the blind was established by Valentine Hanry, at Paris in 1784. The first in England was at Liverpool, in 1791; in Scotland, at Edinburgh, in 1792; and the first in London in 1796. Printing in raised or embossed characters for the use of the blind was begun at Paris by Hanry in 1786. The whole Bible was printed at Glasgow in raised Roman characters about 1828. Louis Braille, born near Paris, Jan. 1809, died 1852, became blind from an accident at the age of three. He adapted from M. Barbier’s system his own simple and beautiful one of dots, for reading and writing for the use of the blind, which he published in 1829 and fully developed in 1842. The Braille musical notation is also much used. A sixpenny magazine for the blind, edited by the late rev. W. Taylor, F.R.S., so eminent for his forty years’ exertions on behalf of these sufferers, was published in 1855-6. He aided the establishment of a college for the blind of upper classes at Worcester, in 1866. There is hardly any department of human knowledge in which blind persons have not obtained distinction. Laura Bridgman, born in 1829, became dumb and blind two years after. She was so well taught by M. Hoeve, of Boston, U.S., as to become an able interpreter of blind and dumb persons; she died May 22, 1885. By the census of 1891, there were in Great Britain, 21,475 blind persons; 14,253 males; 10,221 females; about one in 975 blind. The number of the blind in Great Britain has proportionately decreased since 1851, according to the census, 22,800 in 1851. In 1881 about one in 1138 blind. Royal Normal College and Academy of Music for the blind, established 1873, at Norwood, Surrey, mainly by the exertions of Mr. Francis Joseph Campbell, an American, himself blind, and an able teacher, aided by the marquis, ait. duke, of Westminster, purchased for 22,000l. by the London school board, 1874, for the use of the blind, Jan. 1876. Mr. Campbell ascended Mont Blanc in 1880. There were 8 societies for the blind in London in 1910.

Royal Commission on the condition of the blind; extended to the deaf and dumb, Jan. 1886.

According to the census of 1851, the number of blind in the United Kingdom was 22,532. Scotland 3,545, Ireland 6,611; 1760, estimated at 35,000 in the United Kingdom. The royal commission appointed to inquire into their condition was appointed 28 July, 1886, and on the 20th Jan. 1886, additional members were appointed, and its inquiries were extended to the deaf, dumb, and imbecile in the United Kingdom, Paris, Germany, Switzerland, and Italy. The commission, after 166 sittings, and many visitations and examinations of witnesses, issued their first report July, 1889. The number of the deaf and dumb under instructions in the United Kingdom was in 1851, 1,200; in 1891, there were about 20,000 deaf and dumb persons in the United Kingdom, 50 public institutions for children’s education and 75 for adults.

Elementary Education (Blind and Deaf Children) Act, passed in 1893, death of Dr. Wm. Moon, inventor of the largely adopted system of printing for the blind. 9th July, 1894. International congress for improving the condition of the blind, opened at Brussels . . 6 Aug. 1897. M. Dessand’s new writing system for the blind reported on May 18th, 1897. New post-office regulations for the benefit of the blind, by which paper impressed in “Braille,” or other special type, might be sent at special rates, came into force on 22nd Aug. 1897.

BLINDING by consuming the eyeballs with lime or souring vinegar, was a punishment inflicted anciently on adulterers, perjurers, and thieves. In the middle ages the penalty was frequently changed from total blindness to a diminution of sight. A whole army of Bulgarians was deprived of sight by the emperor Basil, 104. Several of the eastern emperors had their eyes torn from their heads.

BLISTERS, used by Hippocrates (160-357 B.C.), made, it is said, of cantharides (which see).

BLIZZARD, an old term applied in the Midland counties to the snow-blust, also signifying anything blazing, blinding, or stifling. Of late years violent snow-storms have been termed blizzard in the United States of North America, as well as in Britain. See Horse, 14-15 Jan.; and 11-13 March, 1888, and since.

BLOCKADE is the closing an enemy’s ports to commerce; a practice introduced by the Dutch about 1784. The primitive reason why the European powers is that every blockade, in order to be binding, must be effective. Cadiz blockaded 17-47; the Elbe was blockaded by Great Britain, 1873; the Baltic, by Denmark, 1858-49 and 1863; the gulf of Finland by the Allies, 1854; and the ports of the Southern States of North America by Great Britain, April 16, 1861. See Orders in Council, and Berlin.

BLOCK BOOKS, see Printing.

BLOCKS employed in the rigging of ships were much improved in their construction by Walter Taylor, about 1784. In 1893, Mark T. Brutel in-
ventilated a mode of making blocks by machinery, which was put into operation in 1808, and in 1815 was said to have saved the country 20,000, a year.

BLOOD. The circulation of the blood through the lungs was known to Michael Servetus, a Spanish physician, in 1553. Casalpinus published an account of the general circulation, of which he had some confused ideas, improved afterwards by experiments, 1569. Paul of Venice, or Father Paolo (real name Peter Sarpi), discovered the valves which serve for the circulation; but the honours of the discovery of this circulation belongs to William Harvey, between 1619 and 1628. Freund. A memorial window in the church at Folkestone, his birthplace, was uncovered 9 April, 1874, and a statue at the same place, 6 Aug, 1891.

Eating Blood was prohibited to Noah, Gen. ix., to the Jews, Ecc. xii., &c., and to the Gentiles converts by the apostles at Jerusalem, Acts vii. 52, Acts x., 19.

Blood-drinking was anecdotally tried to give vigour to the system. Louis XI. in his last illness drank the warm blood of his servants in the vain hope of restoring his decaying strength, 1461. Barsault.

In the 16th century an opinion prevailed that the declining vigour of the aged might be repaired by transfusion of their veins the blood of young persons. It was condemned in France by the physicians about 1688, and prevailed for many years, till the most fatal effects having ensued, it was suppressed by an edict: "An English physician (Leaver, or Lowin practised in this way; he died in 1721." Frielit. It was attempted again in France in 1726, and more recently there, in a few cases, with success; and in England (but the instances are rare) since 1823. Tried at Philadelphia, U.S., April, 1877; in London, unsuccessfully, 10 May, 1877.

Blood, a disbanded officer of Oliver Cromwell's household, with his confederates, seized the duke of Ormond in his coach, intending to hang him, and had got him to Tyburn, when he was rescued by his friends, 6 Dec. 1670. Blood afterwards, in the disguise of a clergyman, attempted to steal the regal crown from the Jewel-office in the Tower, 9 May, 1671; yet notwithstanding these other offences he was not only pardoned, but had a pension of 500/. per annum settled on him by Charles II. 1671. He died 24 Aug. 1680.

One equal to the supply of air for forty forge fires was erected at the king's dockyard, Woolwich. The hot-air blast, a most important improvement, causing great economy of fuel, was invented by Mr. James B. Neilson, of Glasgow, and patented in 1828. He died 18 Jan. 1865.

BLOW-PIPE. An Egyptian using one is among the paintings on the tombs at Thebes. It was employed in mineralogy, by Antony Von Swahl, at Swede, about 1773, and improved by Wellington and others in 1802, professor Robert Hare, of Philadelphia, increased the action of the blow-pipe by the application of oxygen and hydrogen. By the agency of Newmam's improved blow-pipes, in 1810, Dr. E. D. Clarke fused the earths, alkalies, metals, &c. Works on the blow-pipe by Challenger and Murray, 1815; G. Pleydell, 1814, and W. A. Blue and orange or yellow, became the whig colours after the revolution in 1688; and were adopted on the cover of the whig periodical, the "Edinburgh Review," first published in 1802. Unsuccessful attempts made by several European powers in 1845, and since, Nordfelt's submarine boat first constructed at Stockholm in 1883, to be employed in naval warfare, exhibited at Land'skrona in presence of effects sent by all the European powers in Aug. 1885; the boat, made of wood, 42 ft. long; motive power, steam; crew of 3 or 4 men, breathe for six hours by means of sealed-up compressed air; the boat may be raised or sunk at will of the crew, and by means of torpedoes may cause the destruction of any vessel. BOHEMIA.

BOCCACCIO'S DECAMERONE. a collection of a hundred stories or novels (many very immoral), severely satirizing the clergy, deemed to have been related in art days, during the plague of Florence in 1338. Boccaccio lived 1313-75. A copy of the first edition (that of Valdorfer, in 1471) was knocked down at the sale of Roxburgh's sale, to the Duke of Marlborough, for £120, 17 June, 1812. This copy was afterwards sold by public auction, for £75 guineas 5 June, 1819.

BOHEMIAN LIBRARY. Oxford, founded in 1598, and opened in 1602, by sir Thos. Bodley (died 28 Jan. 1617). It is open to the public, and claims a copy of all works published in this country. In 1609, it contained about 250,000 volumes; in 1685, 435,417 volumes (MS. 20,588). For rare works and MSS. it is said to be second only to the Vatican. BOEOTIA, a division of Greece, north of Attica, known previously as Aonia, Messapia, Hyantis, Ogygi, and Cadmeis. Thebess, the capital, was celebrated for the exploits and misfortunes of its kings and heroes. The term Boetian was usual by the Athenians as a synonym for dulness; but unjustly, since Pindar, Heiod, Plutarch, Democritus, Epeimidonos, and Croton, were Boetians. The early history and dates are mythical; see Thebes.

BOG OF ALLEN, the name given to an extensive series of bogs in Ireland, on the E. side of the Shannon.

BOGOTÀ SANTA FE DE, capital of New Granada (Colombia), founded 1538.

BOGS, probably the remains of forests, covered with peat and loose soil. An act for the drainage of Irish bogs, passed March, 1839. The bog-land of Ireland has been estimated at 3,000,000 acres; that of Scotland at upwards of 2,000,000; and that of England at near 1,000,000 of acres. In Jan. 1839, Mr. Reeve Reeve took out a patent for certain valuable products from Irish peat. Candles and various other articles produced from peat have been since sold in London. Fuel for railway engines and other purposes was made from peat (April, 1873); and a peat, coal, and charcoal company established.

A considerable trade is carried on in Dublin in bog- oak jewelry and ornaments, originated on the occasion of the visit of Geo. IV. to Ireland, 1821.

Much destruction has been caused by the motion of bogs. Ireland (about 1530) speaks of Chat Moss doing so.

A mischief was done at Enaghmoone, Ireland, 3 Jan. 1533; and farm houses and fields near Dunmore were covered, Oct. 1779. Through heavy rains and the percolation of water, the Knockneaskagh bog a mile long and 5 miles broad at high tide in E. Ireland, has been sunk, and every thing in its course for about 2 miles; the Donnelly family (8 persons) at quarry-bodge, on lord Kenmure's estate, were drowned; so also were fish, and small farmers ruined, 28, 29 Dec. 1856; bog slipped near Lismore, West Wick, much damage and livestock lost, 11 Nov. 1891.

The declared value of the bones of cattle and of other animals, and of fish (exclusive of whale-fish) imported into the United Kingdom from Russia, Prussia, Holland, Denmark, &c., amounted to 363,613l. in 1851, to 659,416l. in 1871, to 741,892l. in 1877, to 617,748l. in 1883, to 315,765l. in 1887, to 449,326l. in 1890. BON MARCHÉ (cheap). Name given by some shopkeepers in London to their mode of selling goods to the poor at very small profits; now applied to great establishments in London, Paris, and many large provincial towns. The system was originated at Paris by Mme. Boncienaut, originally a shop-girl; about 1832, she, with her husband, opened a shop in the time of deep distress for meeting the wants of the poorest people. In time her business greatly increased with enlarged premises, and she adopted the system of the division of profits with her employed. She realised a large fortune, and became a munificent benefactress of the city. She died in Dec. 1887; worth it is said four million pounds. She lived at Villarceaux, and was a singular eccentric character, died at Paris 20 Feb. 1888.

BOOK (Anglo-Saxon, boe; German, buch). Books were originally made of boards, or the inner bark of trees; afterwards of skins and parchment. Papyrus, an indigenous plant, was adopted in Egypt. Books with leaves of vellum were invented by Attalus, king of Pergamus, about 195 B.C., at which time books were in volumes or rolls. The MSS. in Herculaneum consist of papyrus, rolled and charred and matted together by the fire, and are about nine inches long, and one, two, or three inches in diameter, each being a separate treatise. The first printed books (see Printing) were printed on one side only, the leaves being pasted back to back. See Libraries.

The production of a Universal Catalogue of books printed in the United Kingdom, proposed by the Society of Arts, in the "Journal," 14 April, 1799. See Bibliography.

Papers or Books: Jerome (who died 420) states that he had ruined himself by buying a copy of the works of Origen. A large estate was given by Alfred for a book on geomorphology, about 890. The first English Bayle was published for about 30s., and a bounty was exchanged for sheep, and five quarters of wheat. Books frequently fetched double or triple their weight in 8d. They sold in armies by the thousand, and the book was a copy of Mocking Bird, ornamented by Mr. Tomkins, was declared worth 9 guineas. Book. Yet more superb copy was insured in a London office for 3,000l. See Bibliography.

Book, Riviera. - The book of St. Columba, a very early illuminated book, is supposed to have been bound about 820.

A Latin Psalter was bound in eik bos, 4th century. A MS. of the book of Evangelists, the book on which our kings from Henry I to Edward VI took their coronation oath, was bound in eik bos nearly an inch thick, and the velvet was the covering in the 14th century, and silk soon after. Vellum was introduced early in the 15th century; it was stamped and ornate bound about 1490.

Leather came into use about the same time.

The rolling machine, invented by Mr. Wm. Burroughs, was substituted for the beating-instrument, and his states began to take the place of the eik bos, the leather being pasted to it. See England.
Cloth binding superseded the common boards generally about 1831. Canvas-covered red rubber backed accounts-books and large volumes were introduced in 1841. The use of thin metal plates instead of paste-board introduced about 1640. Exhibitions at the Society of Arts opened 24 Jan., 1836.

BOOKSELLERS, at first migratory like haw-
kers, became known as stationers, from their
practice of having booths or stalls at the corners
of streets and in markets. They were long sub-
ject to vexatious restrictions, from which they were
enabled to escape in 1758.

The earliest bookseller's catalogue is said to be that
published by Andrew Cunliffe, of Lorthbury, dedi-
cated to Queen Elizabeth, 1565.

dispute arose which was referred to lord chief
justice Campbell, at Stratheuden house, 14 April,
1852. His lordship gave judgment against the
association, which led to its dissolution, 19 May

latter in 1828 was decomposed by Gay-Lussac,
Thénard, and H. Davy, into oxygen and the pre-

BOTANY. Aristotle is considered the founder of the science (about 347 B.C.). Historia Plantarum of Theophrastus was written about 320 B.C. Authors on botany became numerous at the close of the 15th century. Fuchsins, Boek, Baulin, Celsianus, and others, wrote between 1530 and 1550. The system and arrangement of the great Linneas (see Linnaean System) were made known about 1735; and Jussieu's system, founded on Tonnertor's, and called the natural system, in 1758. At Linneas's death, 1778, the species of plants actually described amounted to 11,500. The number of species recorded at present does not fall short of 100,000. J. C. Loudon's "Encyclopædia of Plants," a most comprehensive work, first appeared in 1820. De Candolle's "Prodromus Systematicus Naturalis Regni Vegetabilis" (of which Vol. 1. appeared in 1818), was continued by his son Alphonse, who died, aged 86, April, 1863. An International Botanical Congress was held, in London, 23 May, 1889, professor A. De Candolle, president; another at Amsterdam, 13 April, 1877. BRASS. That mentioned in the Bible was most probably bronze. When Lucius Mummian burnt Corinth to the ground, 140 B.C., he found immense riches, and during the conflagration, it is said, all the metals in the city melted, and running together, formed the valuable composition described as Corinthians Brass. This is well doubted, for the Corinthian artists had long before obtained great credit for their method of combining gold and silver with copper. De Fossioy. BRAY, Berks. Fuller says that its vicar, Symon Symonds, was twice a papist and twice a Protestant—in the reigns of Henry VIII., Edward VI., Mary, and Elizabeth (1533-1589). Upon being called a turncoat, he said he kept to his principle, that of "living and dying the vicar of Bray." The story is doubtful. The modern song refers to the political changes of the 17th and 18th centuries. Bray, the "Irish Brighton," a beautiful seaside town 13 miles N.E. of Dublin, with esplanade a mile long. Pop. 18,888.

It had an opening in the side to admit the victims, and a fire was kindled underneath to roast them to death. Phalaris ordered the artist to make the first experiment. Pandar (522-522 B.C.) speaks of the cruelties of Phalaris, but later writers give him a different character.

Awards states that the limit of the zone of territory over which the rights of sovereignty of one or other of the two parties must be regarded as established could not be precisely fixed: topographical lines previously adopted that the frontier between British Guiana and Brazil remains fixed by the line which starts from the left bank of the Mayapo, continues in an easterly direction along the watershed to the source of the Orinoco river, proceeds down the course of that river to its confluence with the Tacutu, follows the course of the Tacutu to its source, where it joins the line of frontier established by the declaration of 1899, and concludes in London by the high contracting parties concerned on 2 Nov., 1901. In virtue of that declaration, all that part of the zone in dispute lying to the east of the line of frontier will belong to Great Britain, all that part which is to the west will belong to Brazil. The frontier, along the rivers Içana (Malau) and Tacutu, remains fixed by the Treaty of 1899. The said river will be open to free navigation of the two States bordering on them. When the rivers divide into several branches the frontier will follow the Tholeoa of the most easterly branch. 1 Mar.

BREAD. Ching-Young, the successor of Fohi, is reported to have been the first who taught men (the Chinese) the art of husbandry, and the method of making bread from wheat, and wine from rice, 1998 B.C. Uniit, Hist. Baking of bread was known in the patriarchal ages: see Exodus xii. 15. It became a profession at Rome, 1700 B.C. After the conquest of Macedon, 138 B.C., numbers of Greek bakers came to Rome, obtained special privileges, and soon obtained monopoly. During the siege of Paris by Henry IV., owing to famine, bread, which had been sold whilst any remained for a crown a pound, was at last made from the bones of the charnel-house of the Holy Innocents, A.D. 1591. Henri IV., in the time of James I., barley bread was used by the poor, and now in Ireland, codfish, barley, and potato powder, is made into bread, as potato-dough is used in Ireland. The London Bakers' Company was incorporated in 1397. Bread-street was once the London market for bread. Until 1392, the London bakers were not allowed to sell any in their own shops. Now, bread is made with yeast by the English bakers in 1551. In 1556 and 1587 Dr. Dolefield patented a mode of making "setried bread," in which carbonic acid gas is combined with water and mixed with the flour, and which is said to possess the advantages of cleanliness, rapidity, and uniformity. In 1682 a company was formed to encourage Stevens' bread-making machinery. An act for regulating bakehouses was passed in July 1824. In 1827 the London bakers of the metropolis, 23 Sept., was settled by concessions, 9 Oct. 1872. A Bread Reform League formed; meeting at the Mansion house, London, 17 Dec. 1880. The Bread Union, limited, established in London, Sept. 1889; failure, Oct. 1890. Delegated meeting of working bakers in London, demanding increased pay and hours of labour, 5 Sept.; strike averted by concessions, Nov. 1889.

The tree was successfully cultivated in French Guiana, 1858.

The first stone of the Plymouth breakwater was lowered 12 August, 1812. It stretches 5280 feet across the sound, is 360 feet in breadth at the bottom and more than 30 at the top, and consumed 3,660,000 tons of granite blocks, from one to five tons each, up to April, 1841, and cost a million and a half a year. The architects were Mr. John Rennie and his son John. The first stone of the lighthouse on its western extremity was laid 1 Feb. 1841. Breakwaters have been constructed at Holyhead, Portland, Dover, Middlesex, &c. BRIDGES were first of wood. There are ancient stone bridges in Egypt. Abidos is famous for the bridge of boats which Xerxes built across the Hellespont, in B.C. 480 n.c. Trajan's magnificent stone bridge over the Danube, 4770 feet in length, was built in A.D. 105. Brotherheads for building bridges existed in S. France about 1180. The Devil's bridge in the Canton of Uri was built on two high rocks and many stories have been invented to account for it. At Schaffhausen an extraordinary bridge was built over the Rhine, 400 feet wide; there was a pier in the middle of the river, but it is doubtful whether the bridge rested upon it; a man of the lightest weight felt the bridge totter under him, yet waggons heavily laden passed over without danger. The bridge was destroyed by the French in 1799. See Hammarsmith, London, Waterloo, Blackfriars, Southwark, Forth, Tyne, Tower, Westminster, and other bridges, in separate articles. The chief Tournay bridges were freed from toll 21 May, 1879, and 26 June, 1880.

BULL or EDICT OF THE POPE.

The bull is properly the seal, either of gold, silver, lead, or wax. On one side are the heads of Peter and Paul, and on the other the name of the pope, and year of his pontificate. A bull against heresy was issued by Gregory IX. in 1231. Pius V. published a bull against Elizabeth, 25 April, 1570; in 1571 bulls were forbidden to be promulgated in England. The bull Unigenitus (beginning with this word) against the Jansenists was issued by Clement XI., 1713; confirmed by Benedict XIII., 1725. The Golden Bull of the emperor Charles IV., so-called from its golden seal, was made the fundamental law of the German empire, at the diet of Nuremberg, 1556; see BRONZ BULL. Pius IX. published an encyclical letter censuring modern errors, 8 Dec., 1864; see under Rome; see STECKS.

BULL-BATING or BULL-FIGHTING, was an amusement at Stamford in the reign of John, (1209); and at Tutfley, 1374. In the Sports of England, we read of the "Easter fierce hunts, when booning bears fought for their heads, and lusty bulls and huge bears were baited with dogs"; and near the Cliek, London, was the Paris, or Bear Garden, so celebrated in the time of Elizabeth for the exhibition of bear-baiting, then a fashionable amusement. A bill to abolish bull-baiting was thrown out in the commons, chiefly through the influence of Mr. William Windham, who made a speech in favour of the custom, 21 May, 1802. It was made illegal in 1855; see Cruelly to Animals. Bull-fights were introduced into Spain about 1260; abolished there, "except for puns and patriotic purposes," in 1784. Bull-fights are very common in Spain. A bull-fight at Lisbon, attended by 10,000 spectators, on Sunday, 14 June, 1830; one took place at Havre, 5 July, 1868. Sometimes theatrical fights with Spanish bulls, at the Agricultural Hall, London, were held 28 March, 1881. At a bull-fight at Marseilles about 17 persons were killed, and 230 injured, by the fall of wooden stands, Sunday, 11 Aug., 1881. A bull-fight at Nimes (since prohibited), 12 June, 1881.

A bull-fight at the Hippodrome, Paris, for sufferers by inundations in S. France, very successful, no casualties, Spanish ambassador present, 16 Jan. 1887.
BULLETS.

BULLETS of stone were in use 1514. Iron ones are mentioned in the Fiedlera, 1530. Lead bullets were made before the close of the 16th century. The cylindrical cup-rib ball was invented by Capt. Minic, about 1823. Other and greatly improved bullets have been since devised for use with modern rifles, such as the Martini-Henry, the Enfield-Martini, the Mauser, the Mannlicher, and the Lee-Metford. The bullet-proof bullet, so named from its having been invented and manufactured at the arsenal of that name near Calcutta, flattens out on striking an object. A bullet, a modification of the Lee-Metford bullet, having similar properties as the dum-dum (the nickel sheathing of the bullet being stripped from the "nose" so as to expose the soft lead packing), was issued to the army in 1869, but was not used, it being considered that it came, like the dum-dum, under the category of "explosive bullets," condemned by the Geneva Convention. It is still employed against savage races.

A bullet-proof coat or cuirass invented by Mr. Dowce at Vienna: successfully tested at Mannheim; report efficient but heavy 13 March, 1864; tested at the Athens, London, in the presence of the Duke of Cambridge, and other officers; report as to practical value indecisive, 23 May, 1864. The Prussian war office ordered various trials, declare the cuirass to be worthless. 3 Sept. 1894. Mr. Maxam's bullet-proof cuirass; indecisive trials at Erith, 2 June, and at the Aquarium 9 June, 1895. Mr. Loris' bullet-proof and dagger-proof cuirasses exhibited at the Crystal Palace. 20 Aug. Capt. Boynton's bullet-proof of highest bred at Sheffield. 28 Sept. 1895.

BULLION, uncoined gold and silver. The "Bullion Report" of a parliamentary committee in 1816, principally guided by Mr. Horner and Mr. (afterwards Sir R.) Peel, established the conclusion that paper money is always liable to be over-issued, and consequently depreciated, unless it be at all times immediately convertible into gold. This principle has been adopted in British monetary arrangements; see Bank of England.

BULWER-CLAYTON TREATY, concluded 19 April, ratified 4 July, 1850, by which Sir Henry Lytton Bulwer for the British, and Mr. Clayton for the American government, declared that neither should obtain exclusive control over the proposed ship canal through Central America, or erect any fortification on any part of the country. Disputes afterwards arose with respect to this treaty, and the connection of Great Britain with the Mosquito territory (which see), which were settled in 1857.

Its abrogation was proposed by the Americans in 1859; on account of De Lesseps's plan for a canal in Central America. The treaty was finally abrogated: Hay-Pauncefote Isthmian canal treaty, signed by Mr. Hay and Lord Pauncefote at Washington, 18 Nov. 1901; ratified 21 Feb. 1902.

Their powers were increased by Sottilas; Tschirnhausen, 1690; Button, 1747; and Parker and others more recently. Lord Bacon gives instances of the resurrection of persons who had been buried alive; Duns Scotus being of the number. BUTTER is said to have been used by the Arabs in early times, but not by the Greeks and Romans, who had excellent oil. It is not mentioned as a food by Galen, A.D. 130-200. It has long been used by northern nations. Various statutes have passed respecting its package, weight, and sale; the principal of which are the 56th & 57th Geo. III. and 10 Geo. IV. 182.

CABBALA, a Jewish system of philosophy or theosophy, deriving its name from a Hebrew word, signifying reception or tradition, said to have been given by God to Adam, and transmitted from father to son by his descendants. It is said to have been lost at the Babylonian captivity (587 B.C.), but to have been revealed again to Ezra. Its supporters assert that the caballistic book "Sohar," or "Splendour," a mystic commentary on the Pentateuch, was first committed to writing by Simon Ben Jochai, A.D. 72-110. The true date of the books containing the caballa is now considered to range from 9th to the 14th centuries, and their origin to be the mingling of talmudism with the Greek philosophy termed Neo-Platonism. Some of their dogmas are akin to Christian tenets, such as the trinity, the incarnation, &c. The caballa exercised much influence upon the mental development of the Jews, and even captivated the greatest thinkers of the 16th and 17th centuries.

It was retaken by the duke of Guise, in the reign of Mary, 7 Jan. 1558, and its loss so deeply touched the queen's heart, as to cause some to say it occasioned her death, which occurred soon afterwards, 17 Nov. same year. CALCULATING MACHINES. To avoid errors in computing and printing logarithms and tables of figures, machines to calculate and print, have been devised. Pascal, when nineteen years of age, invented one about 1650. The construction of Mr. C. Babbage's differential machine was commenced at the expense of government in 1823, and continued till 1853, when the work was suspended after an expenditure of 17,000l. The portion completed was exhibited in the Royal Col- lege, London; it is now at South Kensington. Professor Clifford, in his lecture at the Royal Institution, 24 May, 1872, stated that Babbage expended 20,000l. upon his machines, and that the analytical machine was nearly finished, and would eventually be much used. Babbage's Calculating Engines: a Collection of Papers relating to "Machina," was published by his son, Gen. Babbage, in 1889. C. Babbage died 1871, aged 78. In 1857, Messrs. E. and G. Schutz, two Swedish engineers, published in London specimen tables, calculated and printed by machinery constructed between 1837 and 1843, after a study of the account of Mr. Babbage's machine. Messrs. Schutz brought their machine to England in 1854. It was bought for 1000l. by Mr. J. F. Rathbone, an American merchant, to be presented to Dudley observatory in his own town, Albany. In 1857, Messrs. Schutz were engaged to make one for the British government, which was completed. Mr. Wiber's machine, exhibited at Paris, Feb. 1863, was much commended. Tables constructed by means of Schutz's machine, and edited by W. Parr, were published by the government in 1884. The arith-ometer, patented by M. Thomas (de Colmar) in 1822 (.), exhibited at the International exhibitions, 1851 and 1862, is said to be in use in assurance offices. Geo. B. Grant described a simpler machine in the "American Journal of Science," Oct. 1874. Other machines have been constructed since.

An "arithometer," for adding up figures and printing, was invented by Mr. Burroughs in the United States, and introduced into this country by Mr. H. E. Winter in 1863.

CALENDAR, see Jewish Era and Calendar.

The Roman calendar was introduced by Romulus, who divided the year into ten months comprising 304 days, 735 r.c. This year was of fifty days less duration than the lunar year, and of sixty-one less than the solar year, and its commencement did not correspond with any fixed season. Numa Pompius, 713 B.C., added three months; and Julius Caesar, 46 B.C., to make it more correct, fixed the solar year at 365 days 6 hours, every fourth year being bissextile or leap-year; see Leap-year. This calendar was defective, as the solar year consists of 365 days, 5 hours, 49 minutes, and not of 365 days 6 hours. The pontiffs erroneously inserted an intercalary day each fourth year instead of each third year, so that they had inserted 12 instead of nine 25, Feb., up to A.D. 8; Augustus Cesar ordained that there should be no leap-year for 12 years, until this was rectified. The difference in the 16th century amounted to 10 entire days, the vernal equinox falling on 11th instead of 21st March. To obviate this error, pope Gregory XIII. ordained, in 1582, that that year should consist of 355 days only (5 Oct. became 15 Oct.); and to prevent further irregularity, it was determined that a year ending a century should not be bissextile, with the exception of that ending each fourth century; thus 1700, 1800, and 1900 have not been bissextile, but the year 2000 will be a leap-year. In this manner three days are removed in each century, because the passage of eleven minutes makes three days in about that period. The year of the calendar is thus made as nearly as possible to correspond with the true solar year, and future errors of chronology are avoided. See New Style and French Revolutionary Calendar. The Gregorian and Russian calendars still retain the old style.

Adopting the reformed doctrines he fled to Angoulême, where he composed his Institutio Christianae Religionis in 1535; published in 1536. He retired to Basel, and settled in Geneva, where he died, 27 May, 1564. He was instrumental in burning Servetus for denying the Trinity in 1553. A formal separation between the Calvinists and Lutherans took place after the conference of Poissy in 1561, where the former expressly rejected the tenth and other articles of the confession of Augsburg, and took the name of Calvinists. In France (see Huguenots) they took up arms against their persecutors. Henry IV., originally a Calvinist, on becoming king, secured their liberty by the Edict of Nantes in 1598 (which see). Calvinistic doctrines appear in the articles of the Church of England and in the confession of the Church of Scotland, and are held by many protestant sects. They include predestination, particular redemption, irresistible grace, and the certain perseverance of the saints. See Church of Scotland, 1904-5.

CAMERONIANS, a name frequently given to the Reformed Presbyterian church of Scotland, the descendants of the covenanters of the 17th century, the established church, 1638-50. * Charles II.

*They were frequently called hillmen or mountain men, and carried presents from the places and modes of worship to which they were frequently reduced, and McMullanites, from John McMullan, their first minister, after their...
signed the League and Covenant in 1650, in hopes of recovering his kingdom, but denounced it in 1661, and revived episcopacy. A revolt ensued in 1666, when many covenanters were slain in battle (in the Pentland hills, &c.), and many refusing to take the oaths required, and declining to accept the king's核桃, were executed by the absconding cruelt tortures. The name Cameronia is derived from Richard Cameron, one of their ministers, who was killed in a skirmish, in 1680. On 22 June in that year he and others issued at Sanquhar a declaration for religious liberty. The 65-century was kept in 1680. In 1689 they raised a body of soldiers under William H., who commanded them under the command of lord Angus, as the 26th regiment, since so famous, now designated the Cameroonians (the Scottish Rifles). In 1712 they renewed their public covenants, and are described in one of their tracts as "the suffering anti-popish, and anti-priestly, anti-erastian, true-presbyterian church of Scotland." They were not connected with the Cameronian movement.

They revenged the cruelties of their enemies, and maintained an obstinate resistance against the royalist armies commanded by marshal Moncevel and other distinguished generals, till 1705, when the insurrection was suppressed by
marshal Villars. After futile conciliatory efforts, several of the heroic leaders suffered death rather than surrender. Cavalier, an able general, unable to carry out a treaty made with Villars, seceded in 1704, entered the British service, and died governor of Jersey, 1740.

CAMP (Lat. castra, English camp is derived from Lat. campus, a plain), the name given to the place where the aggregate body of tents or huts in the field. Encampments are mentioned about 1490 B.C. (Numbers ii.). The Lacedaemonians among the Greeks were the first who cultivated the art of forming military camps, the form of which was circular. The Romans, whose camps were square and entrenched, attained to a high degree of skill in this science. Polybius, who accompanied Scipio in many campaigns, gives a very full description of the Roman camp. As described by this historian the camp of a consular army accommodated 16,800 foot and 1,800 horse soldiers, and was elaborately constructed. Vestiges of Roman camps exist at the present day in various parts of England and Scotland. The introduction of gunpowder greatly modified the construction and area of camps. Artillery of the most improved type and strong detached forts constitute the chief defensive feature of entrenched camps. The vast size of European armies of the present day necessitates the accommodation of troops in entrenchments or bivouacs, but in expeditions in hot climates, with flying columns, tents are used. If occupied for one or two nights only camps are called "flying camps," if for a longer period "standing camps." Camps of exercise of large extent are established at Aldershot (q.v.), Colchester, Shorncliffe, the Curragh, Kildare, etc. (q.v.). Gordon (Salisbury Plain) visited by king, 15 July, 1910. A camp was formed in Hyde-park 1739 and 1814, and at the Alexandra Palace and Hampton Court for the Indian and Colonial troops, 1901-1902 (see Coronation).

CANDLES DAY. 2 Feb. is kept in the church in memory of the purification of the Virgin, who presented the infant Jesus in the Temple. From the number of candles lit (it is said in memory of Simeon's song, Luke ii. 32, "a light to lighten the Gentiles...", this festival was called Candlemas, as well as the Purification. Its origin is traced to pope Damascus in the 5th century, by others to the Roman emperor Justinian, 531. Some antiquarians trace a connection between the Christian festival with the great feast of expiation and purification called Febnra, held 15 Feb, in ancient Rome. The practice of lighting the churches was forbidden by order of council. 2 Edw. VI. 1558; but is still continued in the church of Rome. Candlemas is a Scotch quarter-day.

CANDLES. The Roman candles were composed of string surrounded by wax, or dipped in pitch. Splinters of wood fatted were used for light among the lower classes in England, about 1300. Wax was not used, nor were Dipped candles usually burnt. The Wax Chandlers' company was incorporated 1473. Mould candles are said to be the invention of the seur Le Brez, of Paris. Spermaceti candles are of modern manufacture. The Chinese make candles from wax obtained from the candle-berry tree (magnis cerifera). The trade upon candles made in England, imported in 1783, amounted to about 50,000 lbs. annually when it was repealed in 1831. Improvements in the manufacture of stearine candles, due to the researches on oils and fats by Chevreul, 1811-23. He died 9 April, 1884. aged 62. The plotted wick introduced by Cambacres 1825, improved by Wilson 1831, and with wicking, at Price's manufactory at Lambeth, the principles involved in many patents are carried into execution, including those of Gaynne (1849), Jones and Price (1852), and Wilson in 1854, for candles which require no wicking. When tallow was high in price palm and cocoanut oils were for a time extensively used. The discovery of carbon by Dr. James Young 1837-39. introduced a material which has practically superseded all others. Price's patent candle company, established 1847, incorporated by act of parliament 1848 and 1855, supply the largest candle-making works in the world. In 1870 the manufacture of candles from a mineral substance named selenicren began.

CANDLESTICKS (or lamp-stands) with seven branches were regarded as emblematical of the priest's office, and were engraved on their seals, cups, and tombs. Bezaleel made "a candlestick of pure gold" for the tabernacle, Exod. xxx. 19 (Ezra, xxvii. 17). Candlesticks were used in Britain in the days of king Edgar, of which "gilded and gilt candellabra well and honourably made.""

CANDY or KANDY (Ceylon), was taken by a British detachment, 20 Feb. 1803, who capitulateed 23 June following, on account of its unfortified town; and many were massacred at Colombo, 26 June. The war was renewed in Oct. 1813; the king was made prisoner by general Brownrigg, 19 Feb. 1815; and the sovereignty was vested in Great Britain, 2 March, 1815. Candy has many objects of interest; among these are the governor's house, one of the finest structures in Ceylon, and the Buddhist temple, "the palace of the tooth," containing, it is said, a tooth of Gautama the Buddha, the most sacred spot in the Buddhist world.

In 1576 it was devastated by the great plague, and during the religious wars it was sacked by the duke of Savoy. Napoleon landed at Cassis on his return from Elora, 1815. Its rise as a watering place is due to lord Brougham, who in 1824 selected Cannes as a health resort. The duke of Albany died at the Villa Nevada, 28 March, 1884, and the late queen Victoria visited Cannes in 1887 to inspect the Albert Memorial church of St. George of England, built in memory of the prince. The present Canons and Constitutions of the Church of England, collected from former ordinances, were
established in 1603 by the clergy in convocation, and ratified by king James I., 1604. A new body of canons formed by the convocation in 1649, were declared unlawful by the commons, 16 Dec. 1641.—An intermediate class of religious, between priests and monks, in the 8th century, were termed canons, as living by a rule. Only two persons escaped; one woman who had prayed for the success of the Romans, and another who succeeded some prisoners. During the middle ages Capua was successively subjugated by the Greeks, Saracens, Normans, and Germans. Still later were the covered cars in which the officers of state rode. Triumphal cars, introduced by Tarquin the Elder, were formed like a throne. See Carriages and Motor Car.

The king Ferdinand made political concessions, but the influence of the allied sovereigns at Leybach led Ferdinand to annul them and suppress the liberal party, Jan. 1821, when the Carbonari were denounced as traitors.

CARBONIC ACID GAS, a gaseous compound of carbon and oxygen, found in the air, and a product of combustion, respiration, and fermentation. The Grotto del Cane yields 200,000 lbs. per annum. No animal can breathe this gas. The briskness of champagne, beer, &c., is due to its presence. It was liquefied by atmospheric pressure by Faraday in 1823. On exposing the liquid to the air it becomes solid, resembling snow, through vaporisation. See under Carbon, 1899-90.

CAUCUS. An American term applied to a private meeting of the leading politicians of a party to agree upon the plans to be pursued during an election or session of Congress. This institution is not a very powerful antagonist to public opinion. The word is to be derived from the word "caucus" or "caucus meetings. A "caucus club" is mentioned by John Adams, in 1763. Bartlett.

Similar meetings are occasionally held in London by conservatives and liberals; one was held by Mr. Gladstone respecting the budget bill, 6 July, 1871. Jealousy respecting the system was aroused in 1878.

The Birmingham Liberal association began in 1863 and a powerful caucus, systematized by Mr. Schneida, very efficient 1873 et seq.; a similar conservative association since formed; a network of similar societies exists throughout the kingdom.

CAUDINE FORKS, according to Livy, the Caudine Caunici (in Samnium, S. Italy), were two narrow defiles or gorges, united by a range of mountains on each side. The Romans went through the first pass, but found the second blocked up; on returning they found the first similarly obstructed. Being thus hemmed in by the Samnites, under the command of C. Pontius, they surrendered at discretion, 324 B.c. (after a fruitless contest, according to Cicero). The Roman senate broke the favourable treaty. C. Pontius was taken prisoner in the third Samnite war, was executed at Rome, 290.

He took the place after three weeks' siege, 28 June; and in spite of a treaty massacred great numbers of the British, without respect to age or sex, in the most cruel manner. General Havelock defeated Nana Sahib, 16 July, at Futtehpore, and retook Cawnpore, 17 July. Sir Colin Campbell defeated the rebels here on 6 Dec. following. A column was erected here, in memory of the sufferers, by their relatives of the 22d regiment. In Dec. 1800, Nana was said to be living at Thibet; and in Dec. 1801 was incorrectly said to have been captured at Kurrachee; see India, 1857. Population, 1861, 197,170.

CELESTIAL GLOBE, see Globes.

CELIBACY (from celsus, unmarried) was preached by St. Anthony in Egypt about 305. Heretical converts lived in caves, &c., till monasteries were established. The doctrine was rejected in the council of Nice, 325. Celibacy was enjoined on bishops only in 692. The decree was opposed in England, 98-978. The Romish clergy generally were enjoined a vow of celibacy by pope Gregory VII. In 1075-89, and its obsequies were established by the council of Placentia, held in 1095. Marriage was restored to the English clergy in 1537. Among the artists were "Cham," a name taken by the comte de Nee, who contributed from 1842 till his death, 6 Sept., 1879. See Punch, "the London Charivari."
CHARTEROI, in Belgium; fortified and named by the Spanish governor Rodrigo, 1696. Several great battles have been fought near this town, especially in 1690 and 1794; see Fleurus. Charleroi was besieged by the prince of Orange, 1672 and 1677; but he was soon obliged to retire. Near here, at Ligny, Napoleon attacked the Prussian line, making it fall back upon Wavre, 16 June, 1815. Great strike of miners, 5 Feb. 1925.

CHARLES-ET-GEORGES, a French vessel, professedly conveying free African immigrants (but really slaves), set on fire by the Portuguese in Conducia bay, 29 Nov. 1857, sent to Lisbon, and condemned as a slaver. The French government sent two ships of war to the Tagus, and the vessel was surrendered under protest; but the emperor of France gave up the free emigration scheme.

CHARLESTON (South Carolina), founded by people from old Charlestown, 1860. The English fleet here was repulsed with great loss, 28 June, 1776. It was besieged by the British troops at the latter end of March, 1780, and surrendered 13 May following with 6000 prisoners; it was evacuated, 14 Dec. 1782, and rebuilt here in Nov. 1890, through the election of Mr. Lincoln for the presidency, he being opposed to slavery. On 12, 13 April, 1861, the war began by the confederates bombarding Fort Sumter; see United States. In Dec. 1861, the federals sunk a number of vessels laden with stone in order to choke up the entrance to Charleston harbour. Unsuccessful attacks were made on Charleston by the federals between April, 1863, and 17 Feb. 1865, when the confederates were compelled to retire; and the federals replaced their standard on fort Sumter, 14 April, the day on which President Lincoln was assassinated.

There are two palaces in Charlottenburg, and a memorial church erected to the memory of the emperor William I. (1801-95), and Trinity church (1839-66). Here is situated the famous technical high school, founded 1822, attended by some 5,000 students. Pop., 1875, 23,957.

CHARTER-HOUSE (a corruption of Chartreuse, which see), London, formerly a Carthusian monastery, founded in 1337 by sir Walter de Manny, one of the knights of Edward III., now an extensive charitable establishment. The last prior, John Houghton, was executed as a traitor, for denying the king's supremacy, in May, 1535. After the dissolution of monasteries in 1539, the Charter-house, passed over various hands till 1 Nov. 1014, when it was sold by the earl of Suffolk to Thomas Sutton for 13,000l., who obtained letters patent directing that it should be called "the hospital of king James, founded in the Charter-house," and that "there should be for ever 16 governors." In 1755, the foundation was 80 poor brothers and 44 poor scholars. Sutton died, Dec. 16, 1653. The expenditure for 1853-4 was 22,806l.; the receipts, 28,906l.; hence, the school was in a prosperous state.

In Sept. 1872, the school was opened in new buildings, opened by the prince of Wales, 6 April, 1875. The buildings for the poor "brethren" were also modified, and in Nov. entirely new arrangements for them were proposed. Bill proposing removal of the "brethren" (53), who are to become annuitants with additions; and erection of buildings on the site of the old buildings and land (four acres), a total revenue of Sutton's will, introduced by Mr. Millington, 7 May, 1886. Alterations were made by the Municipal Reform Act 1835. See Magna Charta and Boroughs. Ancient Anglo-Saxon charters are printed in Kemble's "Codex Diplomaticus," 1829.

CHARTISTS, the name assumed by large bodies of the lower classes, shortly after the passing of the Reform Bill in 1832, from their demanding the people's Charter, the six points of which were Universal Suffrage, Vote by Ballot, Annual Parliaments, Permanent franchise of the Members of Parliament, and Property Qualification (which was enacted, June, 1858), and Equal Electoral Districts. In 1838 the chartists assembled in various parts of the country, armed with guns, pikes, and other weapons, and carrying torches and flags. A proclamation was issued against them, 12 Dec. Their petition (agreed to at Birmingham, 6 Feb. 1838) was presented to parliament by Mr. T. Attwood, 14 June, 1839. They committed great outrages at Birmingham, 15 July, 1839, and at Newport (which see), 4 Nov. 1839. They held for some time a sort of parliament called the "National Convention," the leading men being Fengus O'Connor, Henry Vincent, Mr. Stephens, &c. On 10 April, 1848, they proposed to hold a meeting of 200,000 men at Kensington- common, London, to march thence in procession to Westminster, and present a petition to parliament; but only about 20,000 came. The bank and other establishments were fortified by military, preventive measures adopted, and not less than 150,000 persons of all ranks (including Louis Napoleon, afterwards emperor) were voluntarily sent as act as special constables. The chartists dispersed after slight encounters with the police, and the monster petition, in detached rolls, was sent in cabs to the house of commons. From this time the proceedings of the chartists became insignificant.

monasteries of the Carthusian order, situated among the rugged mountains near Grenoble, in France, was founded by Bruno of Cologne, about 1084. At the revolution in 1792, the monks were expelled and their valuable library destroyed. They returned to the monastery after the restoration of 1815. In Nov. 1880 they declined to accept indulgence from the decrees for expelling the religious orders from France. The monks of the Grande Chartreuse locked themselves in their fortress and awaited the explosion of force. This took place on the 20th April, 1903.

CHARTS AND MAPS. Anaximander of Miletus is said to have been the inventor of geographical and celestial charts, about 570 B.C. Modern sea-charts were brought to England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, 1489. The first tolerably accurate map of England was drawn by George Lilly, who died in 1599. Gerard Mercator published an atlas of maps in 1595; and Mercier's papers published in their columns maps illustrating the wars of 1870-1, 1876-7, &c.

CHASSEPOT RIFLE, a modified needle-gun, and a breech-loader (named after its inventor, Alphonse Chassey), adopted by the French government in 1860. In April, 1886, 10,000 had been issued to the troops. In his report on the battle of Mafeking (October 10, 1899, 3 Nov. 1899), Gen. De Wailly said, "The chassepot has done wonders." It was generally considered successful in the war, 1870-1.

The range of the chassepot being 1800 paces, and that of the needle-gun only between 600 and 700, the Germans in all their charges had to traverse 1200 paces before their arms could be used to purpose. Many Germans were armed with the chassepot after the surrender of the French army at Sedan, 2 Sept. 1870.

Here were massacred, 20 July, 1182, about 5000 Brabanzons, fanatical mercenaries who had been hired to exterminate the Albigeneses by the cardinal Henry, abbot of Clairvaux, in 1181. They had become the scourge of the country, and the "Capuchons," organized for their destruction. Châteauneuf was captured by the Germans after a severe conflict of about nine hours, 18 Oct. 1870. Barricades had been erected in the town, and the Garde Mobile fought bravely. The town was reoccupied by the French, 6 Nov.

On 10 June, 1667, the Dutch fleet, under admirals De Ruyter, sailed up to this town, and burnt many of the forts. By the entrance into the Medway is now defended by Sheerness and other forts, and additional fortifications were made at Chatham. The Cheddar system of cheese-making, named after a village in Somersetshire, has been largely adopted in the British colonies and the United States during the present century.

CHELSEA (Middlesex). Situated on the N. bank of the Thames. A theological college here founded in 1520, was converted to the college of Charles II. in 1662 to an asylum for wounded and superannuated soldiers. Williamson, Reese, and others, 18 July, 1876. In their report, issued Aug. 1879, they recommended increased inspection and more stringent regulations. See Alkalies.

CHEMISTRY was introduced into Spain by the Moors, about 1150. The Egyptians and Chinese
claim an early acquaintance with chemistry. The first chemists were the Alchemists (see Alchemists); but chemistry was not a science till the 18th century; during which its study was promoted by Bacon, Hooke, Mayow, and Boyle. In the early part of the 18th century, Dr. Stephen Hales laid the foundation of Physiologic Chemistry, and his contemporary Boerhaave combined the study of chemistry with medicine. These were succeeded by Bergman, Stahl, Black, &c. In 1772, Priestley published his researches on air, having discovered the gases oxygen, ammonia, &c.; and thus commenced a new chemical era. He was ably seconded by Cavendish, Scheele, Lavoisier, Chaptal, and others. The 19th century opened with the brilliant discoveries of Dalton, Faraday, Thomson, &c. Organic Chemistry has been very greatly advanced by Berzelius, Liebig, Dumas, Laurent, Hofmann, Cahours, Frankland, Williamson, &c. and others, since 1830; see Pharmacy, Electricity, Galvanism. For the analytical processes termed "Spectrum analysis," invented by Kirchhoff and Bunsen (1856). and "Disintegration" (1861), and "Atmosysis" (1862), invented by Mr. T. Graham, see those articles. The Royal College of Chemistry, Oxford-street, London, was established in 1815 (now at South Kensington)—Henry Watts's great "Dictionary of Chemistry," begun 1803, has supplements; new edition, 1890-93; he died 30 June, 1833. CHERBOURG, the great naval fortress and arsenal of France on the coast of Brittany, about 60 or 70 miles equi-distant from Portsmouth and Plymouth. It was captured by our Henry V. in 1418, and lost in 1450. Under the direction of Louis XIV., some works were erected here by the great Vauban, with which some shipping, &c., were destroyed by the British, 6, 7 Aug., 1758. The works, resumed by Louis XVI., were interrupted by the revolution. * He took part (it was said without authority) in arranging the treaty of Tien-tsin in June, 1858. He was in consequence condemned to death—by suicide.

The non-fulfillment of this treaty led gradually to the war of 1856-57.

The emperor Taou Kwang, who died 25 Feb., 1859, during the latter part of his reign, became liberal in his views, and favoured the introduction of European art and science, a rash and unwise policy, and adopted reactionary measures, particularly against Christianity, which in consequence, Aug. 1859, and quickly became of alarming importance. The insurgents at first proposed only to expel the Tartars: but in March, 1851, a pretender was announced, and the emperor may be supposed to have been at a loss what to do. In the middle of June, 1851, he had purged the whole ministry, including the cabinet, of Tien-teh (Celestial Virtue), but afterwards assumed another name. He is stated to have been a native of Quang-si, of obscure origin, but to have obtained some literary knowledge, and to have been acquainted with the principles of Christianity from a Chinese Christian, named Leang-fu, and also from the missionary Roberts in 1844. He announced himself as the restorer of the worship of the true God, and derived many of his dogmas from the Bible. He declared himself to be the monarch of all beneath the sky, the friend of Man and China, and the ruler of the world, the brother of Jesus, and the second son of God, and demanded universal submission. He made overtures for alliance to lord Elgin in Nov. 1856. His followers were termed Taou-tao, or 'princes of peace,' a title utterly believed by their atrocious deeds. The rebellion was virtually terminated, 18 July, 1864, by the capture of Nankin, the suicide of the Tien-Wang, and the execution of the military leaders

§ It was ordered by the Chinese officers, 12 men out of the crew of 24 being carried off and the national ensign taken down. Sir J. Bowring, governor of Hong-Kong, being compelled to resort to his ship to avoid it, sailed for India and Ceylon for troops. On 3 March, 1857, the house of commons, by a majority of 10, censured sir John for the "invidious measures" he had pursued, the Chinese ministry (who took his part) dissolved the parliament, but obtained a large majority in the new one.

CIRCASSIA.

Circassia (Asia, on N. side of the Caucasus). The Circassians, said to be descended from the Alakans, were unsubdued, even by Timour. In the 16th century they acknowledged the authority of the czar Ivan II. of Russia, and about 1715, the princes of Kabardia took oaths of fealty. Many Circassians became Mahometans in the 18th century.

Tarquin named them Circensian; their celebration continued from 4 to 12 Sept.

CIRCLE. The quadrature, or ratio of the diameter of the circle to its circumference, has exercised the ingenuity of mathematicians of all ages. Archimedes, about 221 B.C., gave it as 7 to 22; Abraham Sharp (1717) as 3.1416; and Lagrange (1796) as 3.141592653589793238462643383279502884197169399 and from 10 arithmetic progressions, 1130879375.

In 1804 these divisions were annulled by the establishment of the Confederation of the Rhine, in 1806 (which see).

CIRCUITS IN ENGLAND were divided into three, and three justices were appointed to each, 1176. They were afterwards divided into four, with five justices to each division, 1180. They have frequently altered. England and Wales were formerly divided into eight-each travelled in spring and summer for the main part of civil and criminal cases, the larger towns are visited in winter for trials of criminals only; this is called "going the circuit." The circuits were settled by order in council, 5 Feb. 1876; modified 10 June, 1884, and Dec. 1887.

The system was again changed, eight circuits being arranged for with three assizes to each, excepting Lancashire and Yorkshire, which have four each (civil and criminal January, May; criminal only, excepting Glamorgan and Lanarkshire, Oct.).

CIRCUMNAVIGATORS.

Circumcision (instituted 897 B.C.) was the seal of the covenant made by God with Abraham. It was practised by the ancient Egyptians, and is still by the Copts and some oriental nations. The Festival of the Circumcision (of Christ), originally the octave of Christmas, is mentioned about 437. It was introduced from the Roman missal into the first English prayer-book in 1549.

It was enlarged by Julius Caesar so as to seat 150,000 persons, and was rebuilt by Augustus. Julius Caesar introduced into it large canals of water, which could be quickly covered with vessels, and represent a sea fight. "Piling; see Amphitheatres, Fantasia, and Hippodrome.

CLAN-NA-GAEL (brotherhood of Gaels), an Irish secret oath-bound society, originating out of the Fenian brotherhood in 1870, it became the heart of the Irish National League in the United States, of which it was the extreme violent part. Its action much restrained by the influence of Messrs. Parnell, Sexton, and other members of the Irish Parliamentary party who originated a "new departure." It obtained the support of the Irish peasantry by promising to obtain them their farms without rent. The ultimate object of the Clan-na-Gael is said to be the establishment of Ireland as a perfectly independent state; it is termed a dynamite party ("Parnellism and Crime," series III., June 1887).

For number of Dr. Cronin, &c., see United States, 1885.

The Clan-na-Gael at Chicago declare against any form of violence, reported Feb. 1889.

The following is a list of all the known clans of Scotland, with the badge of distinction anciently worn by each. The chief of each clan wears two eagle's feathers in his bonnet, in addition to the badge. Chambers. A history of the clans by Wm. Buchanan was published in 1773.

CLAPHAM SECT. a name given to the
clergymen of the order of Friars Eremites,
which was reformed in England, first by
the Rev. Sydney Smith in the latter part of the
18th century. The Rev. Henry Venn was vicar of
Clapham, and several of its eminent members lived
there. The sect included Wm. Wilberforce,
Zachary Maecenas (father of the historian), and
the Rev. W. Romanie.

CLARE AND CLARENCE (Suffolk). Richard
de Clare, Earl of Gloucester, is said to have seated
here a monopoly of the order of Friars Eremites,
the first of this kind of mendicants who came to
England, 1248. Tanner, Lionel, third son of Ed-
ward III., becoming possessed of the honour of
Clare, by marriage, was created duke of Clarence.
The title has ever since belonged to the branch of
the royal family.

Minories, founded in Italy by St. Clare and St.
Francis d'Assisi, about 1212. They were also called
Ursulines; their rule having been modified by pope
Urban IV., who died 1264. This order settled in
France about 1260, and in England in the Monastery
without Aldgate, London, about 1293, by Blanche,
queen of Navarre, wife of Edmund, earl of Lan-
caster, brother of Edward I. At the suppression,
the site was granted to the bishopric of Bath and
Wells, 1539. Tanner.

CLAREMON'T (Surrey), the residence of the
princess Charlotte (daughter of the prince-regent,
afterwards George IV., married to prince Leopold
of Saxe-Coburg, 2 May, 1816): here she died in
childbirth, 6 Nov., 1817. The house was built by
Sir John Vanbrugh, and was the seat successively
of the earl of Clare, of lord Clive, lord Galloway,
and the earl of Tyrconnell. It was purchased by
Mr. Ellis, who government for 65,000l. for the prince
and princess of Saxe-Coburg; and the former,
the late king of Belgium, assigned it to prince Albert
in 1836. The exiled royal family of France
resided at Claremont, 3 March, 1848; and the
king, Louis Philippe, died there, 29 Aug., 1850.

Henry IV., created duke of Clarence, 1411. His
duty was to arrange the funerals of baronets,
knaves, squires, and gentlemen, on the south side
of the Trent, from whence he is also called sur-roy
or south-roy.

enacted at a council held 25 Jan., 1164, at Clare-
don, in Wiltshire, to restrict the power of the

CLEARING-HOUSE. In 1775, a building in Lombard-street was set apart for the use of bankers, in which they might exchange drafts, bills, and securities, and thereby save labour and curtail the amount of floating cash requisite to meet the settlement of the different houses, if effected singly. By means of transfer tickets, transactions in the amount of millions daily are settled without the intervention of a bank note. In 1800, the clearing-house was used by 117 companies, and in May, 1804, it was joined by the Bank of England. In the year ending 30 April, 1808, 3,257,411,000 passed through the clearing-house; 30 April, 1873, 6,093,335,000; 31 Dec. 1887, 8,077,875,000; 1900, 8,963,000,000; 1915, 12,287,035,000; 1920, 12,120,392,000.; 1922, 15,873,120,000. CLERMONTINES, apocryphal pieces, attributed to Clemens Romanus, a contemporary of St. Paul, and said to have succeeded St. Peter as bishop of Rome. He flourished in the 1st cent. He is the decretal of pope Clement V, who died 1314, published by his successor, Boulanger. Also Augustine monks, each of whom having been a superior nine years, then merged into a common monk.—Clementines were the adherents of Robert, son of the count of Geneva, who took the title of Clement VII, on the death of Gregory XII. 1378, and Urbanists, those of pope Urban VI. Christendom was divided by their claims: France, Castile, Scotland, &c., adhering to Clement; Rome, Italy, and England, to Urban. The schism ended in 1409, when Alexander V, was elected pope, and his rivals resigned; see Anti-Popes.

CLEPSYDRA, a water-clock; see Clocks.

CLERGY, from the Greek eikron, a lot or inheritance) in the first century were termed presbyters, elders, or bishops, and deacons. The bishops (episcopi or superiors), elected from the presbyters, in the second century, assumed (about 330), and under Constantine, obtained the recognition and protection of the secular power. Under the Lombard and Norman-French kings in the 7th and 8th centuries, the clergy began to possess temporal power, as owners of lands; and after the establishment of monachism, a distinction was made between the regular clergy, who lived apart from the world, in accordance with a regular order, and the secular (worldly) or beneficed clergy. The English clergy write clerk after their names in legal documents. See Church of England (note) and Bishops.

The clergy were first styled clerks, owing to the judges being chosen after the Norman custom from the sacred order, and the officers being clergy; this gave them that denomination, which they keep to this day. Blackstone.

The deceased kept the keys of their religion and of letters, so the priests kept both these to themselves; they alone make profession of letters, and a man of letters was called a clerk, and hence learning went by the name of clerks. Persian.

Benefit of Clergy, Prciriglum Clerico, arose in the regard paid by Christian princes to the church, and consisted of: 1st, an exemption of places conscripted to religious duties from criminal arrests, with which was the foundation of sanctuaries; 2d. exemption of the persons of clergymen from criminal process before the secular judge, in particular cases, which was the original meaning of the privilegium clericale. The benefit of clergy was afterwards extended to everyone who could read, and it was enacted, that there should be a prerogative allowed to the clergy, that if any man who could read were to be condemned to death, the bishop of the diocese might, if he would, claim him as a clerk, and dispose of him in some place of the clergy as he might deem meet. The ordinary gave the prisoner at the bar a Latin book, in a black Gothic character, from which to read a verse or two; and if the ordinary said, "Legit at Clerico" ("He reads like a clerk"), the offender was only in the hand; otherwise, he suffered death; 3 Edw. 1 (1294). The privilege was restricted by Henry VII. in 1489, and abolished, with respect to murderers and other great criminals, by Henry VIII. in 1534; 2 Edw. 1 (1523). The reading was discontinued by 5 Anne, c. 6 (1706). Benefit of Clergy was wholly repealed by 7 & 8 Geo. IV. c. 25 (1827).

CLOGHER (Ireland). St. Macartin, a disciple of St. Patrick, fixed a bishopric at Clogher, where he also built an abbey "in the street before the royal seat of the kings of Erkal." He died in 506. Clogher takes its name from a golden stone, from which, in times of paganism, the devil used to pronounce juggling answers, like the oracles of Apollo Pathitos. Sir James Ware. In 1141 the cathedral was built anew, and dedicated to its founder. Clogher merged, on the death of its last prelate (Dr. Tottenham), into the archiepiscopal see of Armagh, by the act of 1833.

CLOFERT (Ireland). St. Brendan founded an abbey at Clonfert in 525; his fame is shown in the district of Connacht by the name of the abbey, which is still extant in the Colwent library at Westminster. In his time the cathedral, famous in ancient days for its seven altars, was erected; and Colgan makes St. Brendan its founder and the first bishop; but it is said, in the Ulster Annals, under the year 571, "Measb, bishop of Clonfert-Brendan, went to rest." Clonfert, in Irish, signifies a wonderful den for monks. In 1875 the see merged into that of Killaloa; see Bishops.

By 18,000 Hanoverians laid down their arms, and were dispersed. The treaty was disavowed by the king, and soon broken; the duke resigned all his commands.

CLOTURE, the power of closing a debate in the French chamber of deputies, exercised by the president. A similar power, termed Closure, was given to the speaker of the House of Commons, 11 Nov. 1852; first enforced 24 Feb. 1855. By a new rule the power of closure was given to a house of 100, 28 Feb. 1888; and was frequently exercised in 1888, and since. See Parliament, 1887, and 1893.

CLOUD, St., a palace near Paris, named from prince Cloud of Clonard or Cloud, who became a monk there in 533, after the murder of his brothers, and died in 560. The palace was built in the 10th century, and in it Henry III. was stabled by Clement, I Aug. (died 2 Aug.) 1234. This palace, long the property of the dukes of Orleans, was bought by Marie Antoinette in 1778. It was a favourite residence of the empress Josephine, of Charles X. and his family, and of the emperor Napoleon I. It was burnt during the siege of Paris, having been fired upon by the French themselves, 13 Oct. 1870. The ruins were cleared away, and the site sold, July, 1892.

CLOUDS consist of minute particles of water, often in a frozen state, floating in the air. In 1803 Mr. Luke Howard published his classification of clouds, now generally adopted, consisting of three primary forms—circus, cumulus, and stratus; three compounds of these forms; and the nimbus or black rain clouds (cumulo cirro-stratus). A new edition of Howard's Essay on the Clouds appeared in 1863. Important international cloud work by prof. F. H. Bigelow; to standard types of clouds defined by the international cloud committee, taken during 1876; published by the U.S. Weather Bureau, 1900.

CLUB-FOOT, a deformity due to the shortening of one or more of the muscles, although attempted to be relieved by Lorenz in 1784, by cutting the tendo Achillis, was not effectively cured till 1831, when Stroemeyer of Erlangen cured Dr. Little by dividing the tendons of the contracted muscles with a very thin knife.

CLUBMEN, associations founded in the southern and western counties of England, to restrain the excesses of the armies during the civil wars, 1642-5. They professed neutrality, but inclined towards the king, and were considered enemies by his opponents.

CLUBS, originally consisted of a small number of persons of kindred tastes and pursuits, who met together at stated times for social intercourse. The club at the Mermaid tavern, established about the end of the 16th century, consisted of Raleigh, Shakespeare, and others. Ben Jonson set up a club at the Devil tavern. Addison, Steele, and others, frequently met at Button's coffee-house, as described in the Spectator. Some odd clubs are described in No. 9 of that journal, 10 March, 1710-11. The present London clubs, some comprising 500, others about 1000 members, possess handsome, luxuriously furnished edifices in or near Pall Mall. The members obtain choice viands and wines at moderate charges, and many clubs possess excellent libraries, particularly the Athenaeum (which see). The annual payment varies from 3l. 3s. to 1l. 1s.; the entrance fee from 5l. 5s. to 42l. A bill for the registration of clubs was read a second time in the commons, 22 March, 1893. John de Laval de Bois-Dauphin set up a coach on account of his enormous bulk. The first coach seen in England was about 1555. Coaches were introduced by Fitz-Alan, earl of Arundel, in 1580. Note. The coach line of Buckingham had six horses, that of the earl of Northumberland eight, 1616. The coach-tax commenced in 1734. The lord mayor’s old state coach was not used 9 Nov. 1857; see Car, Chariots, Chariotiers, Hackney Coaches, Mail Coaches, &c.

**Coal.** It is contended, with much seeming truth, that coal, although not mentioned by the Romans in their notices of Britain, was yet in use by the ancient Britons. Bruntwood is said to have granted a licence to dig coal near Newcastle-upon-Tyne in 1234; some say earlier, and others in 1239. Sea-coal was prohibited from being used in and near London, as being "prejudicial to human health." and even smiths were obliged to burn wood, 1275. Note. In 1366 the gentry petitioned against its use. Coal was first made an article of trade from Newcastle to London, 4 Rich II. 1381. Rymer’s Fœdera. Notwithstanding the many previous complaints against coal as a public nuisance, it was at length generally burned in London in 1400; but it was not in common use in England until the reign of Charles I. 1625. Coal was brought from Dublin to Newry in 1742. Coal declared a contraband of war by Great Britain, April, 1808.

COAL DUES, on coal entering the port of London for metage are mentioned in 1444. The right of the Corporation to 2½ per cent. was established in 1541. The amount of the tax and the term of levying it have been frequently changed since 1841. In 1881, the tax was directed to be levied on all coals entering London by water or railways, to be regulated by weight and note by measure. The tax of 1s. 6d. per ton by the act of 1818 extended to 5 July, 1889. The receipts in 1887 amounted to 150,313. Lastly the money was expended on extensive City improvements.

Provision was made for the co-operation of the mine-owners to enable the corporation to pay debt due for the Holborn Viaduct and various city improvements. They ceased 5 July, 1859. Tax of 1s. 6d. per ton on exported coal, 18 March, 1859, continued 5 July, 1899, repealed by the Budget of 1897-8. It produced, in six years, a total of 11,885,427.

The Roman hero Titus Manlius slew a gigantic Gaul in single combat, and put his torqua (twisted chain or collar) on his own neck; and hence the name Torquatus, 361 B.C. That of the order of the Garter is described, and its wearing enjoined, in the statutes of Henry VIII., 24 April, 1522; but a collar had been previously worn. Ashoko. The collar of SS. was adopted by Henry IV., and became a Lancastrian badge; some consider the letters stand for “converganze,” in reference to his claim to the crown. Some writers consider SS. to be in honour of St. Simplicius, a martyr. The order of the Collar or Necklace (or Annunciation) was instituted by Amadeus IV. of Savoy, about 1180.

COLLEGES, from the Latin collegia, assemblages of persons for some specific study or purpose. In Roman law the term corresponded to our word corporation, but the English word college has become chiefly identified with purposes of training or study. University education preceded the erection of colleges, which were foundations to relieve the students from the expense of living at lodgings-houses and at inns. On the Continent colleges in degrees and to have been first conferred at the University of Paris, 1190; but some authorities say not before 1215. In England it is contended that the date is much earlier, and some hold that Beyle obtained an degree formally at Cambridge, and John de Beverley at Oxford, and that they were the first doctors of these universities. Many of the older public schools contain the word college as part of their formal title, and many more modern estabishments, which are, strictly speaking, schools rather than colleges, have adopted the same title. COLON ( ). The colony and period were adopted by Thrasymachus about 373 B.C. (Stilidas), and known to Aristotle. The colony and semicolon ( ) first used in British literature in the 16th century.

COLONEL (from Italian colonia, a column), the highest regimental military officer. The term had become common in England in the 16th century.

COLONIAL COLLEGE. The, was founded 1887, to train youths for colonial life. The course of instruction is scientific and practical, and includes veterinary science, hygiene, surveying, farming, fruit culture, dairy keeping, and other branches of agricultural knowledge. The college is at Hillesley Bay, Subulik, with an estate of 2,000 acres.

COLONIES. The Phenician and Greek colonies, frequently founded by political exigencies, soon became independent of the mother country. The Roman colonies, on the contrary, continued in close connection with Rome itself, being governed almost entirely by military law. —The Colonies of Great Britain partake of both these characters. The N. American colonies revolted in consequence of the attempt at taxation without their consent in 1764. The loyal condition of the present colonies now is due to the gradual relaxation of the pressure of the home government. The population of the British colonies in all parts of the world was estimated in 1801, at 142,052,413; in 1858, 275,520,210; in 1901, 352,750,000. The revenue of the colonies was estimated in 1805 to be £1,492,000; in 1895, £7,360,000; the expenditure, in 1805, £3,355,000; in 1893, £1,708,000. Total imports from the United Kingdom, 1908, 19,000,000; exports to the United Kingdom, 1903, 8,500,000; the act for the abolition of slavery in the British colonies, and for compensation to the owners of slaves (20,000,000 sterling), was passed in 1833. All the slaves throughout the British colonies were emancipated on 1 Aug. 1838. Germany and other powers showed great delay in the emancipation in 1854 and seq. See Holland and Germany.

Resolution of House of Commons recognises the claim of colonies to protection from consequences of imperial policy, but “is of opinion that colonies exercising rights of self-government ought not to undertake the immense responsibility of providing for their own internal order and security, and ought to insist in their own external defence” 1858.

COLOSSEUM. See Coliseum. The building in Regent's Park, London, was planned by Mr. Hornor, a correspondent of the writer, and commenced in 1824, by Peter and Grussell, and finished by Dr. Burton. The chief portion was a polygon of 160 faces, 120 feet in diameter externally: the walls were three feet thick at the ground: the height to the glazed dome 112 feet. On the canvas walls of the dome was painted the panoramic view of London, completed in 1825 from sketches by Mr. Hornor taken from the summit of St. Paul's Cathedral in 1824-2. The picture covered above 49,000 square feet, more than an acre of canvas. The different parts were combined by Mr. E. T. Harris, who in 1815 repainted the whole. In 1826 a panorama of Paris was exhibited. succeeded, in 1853, by the Lake of Thun in Switzerland; in 1854 the panorama of London was reproduced. In 1855, the panorama with the pantomime of Lisbon, was added. In 1857, when Mr. Hornor failed, the establishment was sold for 29,000l. to Messrs. Graham and Yates. In 1853 it was bought by Mr. D. Montague for 23,000 guineas. Tins. After having been long closed, the building was opened to the public at Christmas, 1859, at one shilling. Under the charge of Mr. Bachofiner, it continued open till the spring of 1869, when it was again closed. The sale of the site was announced 1870. It was announced in Dec. 1871 that a company was about to transform the building and ground into club, chambers, baths, a winter garden, &c. In 1874, it was sold; large mansions have been erected on the site.

COLOSSEUS of Rhodes, a brass statue of Apollo, seventy cubits high, esteemed one of the wonders of the world, was erected at the port of Rhodes in honour of the sun, by Chares of Lindus, a contemporary of Scopas and Polygnotus, 270 or 275 B.C. It was thrown down by an earthquake at the height of 120 or 130 feet. This figure is said mythologically to have stood upon two nails, a leg being extended on each side of the harbour, so that a vessel in full sail could enter between the statue was in ruins for nearly nine centuries, and had never been restored, when the Saracens, taking Rhodes, pulled it to pieces, and sold the metal, weighing 72,927 lbs. to a Jew, who is said to have loaded 900 camels in transporting it to Alexandria about 633. Depraved.

COLOSSEUS, the tenth British battleship of the Dreadnought type. The length of the ship is 545 ft. The vessel was launched on the Clyde, 9 April, 1911.

COLOUR is to light what pitch is to sound, according to the abductive theories of Hume, (about 1768, established by Dr. T. Young and others. The shade varies according to the number of vibrations. 385 millions of millions of vibrations in a second are represented by the red end of the spectrum; to the violet, 575, see Spectrum.

COLOURS, the name given by chemists to a large number of substances, mainly due to the action of dyes and to the phenomena of light, and the qualities of which are determined by the condition of the eye and the mind. The first attempt to arrange the phenomena of light in a logical system was made by Dalton, the chemist, and the results of his researches were published in 1801. The system is known as the Daltonian system. It was based on the idea that the eye contains three different types of photoreceptors, each sensitive to a different range of wavelengths. These photoreceptors are known as cone photoreceptors, and they are responsible for the perception of colour. The three types of cone photoreceptors are sensitive to blue, green, and red light, which correspond to the primary colours of light. The perception of colour is determined by the combination of signals from these three types of photoreceptors. Color blindness, which is a deficiency in the perception of colour, is caused by a deficiency in the number or sensitivity of the photoreceptors. The study of colour vision and colour blindness is an important field of research in psychology and neuroscience. COMEDY.

Thalia is the muse of comedy and lyric poetry. Suszrion and Dolo, the reputed inventors of theatrical exhibitions, 578 B.C., performed the first comedy at Athens, on a waggon or movable stage, with actors, for which they were rewarded with a basket of figs and a cask of wine; see Alexandrian Morals, and Drama.

Comedies, for libel, prohibited at Athens, 440 B.C. Aristophanes was called the prince of ancient comedy. 434 B.C., and Menander that of the new, 120 B.C.

Of Plautus, 250 comedies are extant; he published 220 B.C. Statius Creolius wrote upwards of 30 comedies; flourished at Rome 158 B.C.

Comedies of Lucius and Terence first acted 154 B.C.

First regular comedy performed in England about A.D. 1551. It was said of Sheridan that he wrote the best comedy (the School for Scandal), the best opera (the Duenna), and the best after-piece (the Critic), in the English language (1775-1779).

COMETS (Greek γενέα, a hair). See Astron. Soc. Mr. Hind, in his little work on comets, gave a chronological list (1852). The spectrum analysis of Donati (1864), Dr. Wm. Huggins, and Dr. William Allen Miller in 1866 et seq., and others, indicate in comets the presence of gaseous matter in a state of incandescence, giving spectra, chiefly composed of bright bands due to hydro-carbons. The comet of 1852 showed the gas also of iron and sodium. There are 11 periodic comets of which the return has been observed, 1825.

The Chinese annalists give early accounts of comets.

Aristotle describes one which appeared B.C. 751. At the birth of the great Mithridates two probabibly only one large comets appeared, which were seen for seventy-two days together, whose spouton eclipsed that of the mid-day sun, and occupied the fourth part of the heavens, about 144 B.C. Justin.

A good comet seen in 1450. It is consiered to have reappeared in 1550, with diminished spouton, and was expected to appear again about Aug. 1855 or Aug. 1860. Here.

A remarkable one seen in England, June, 1337. Show Tycho Brahe demonstrated that comets are extraneous to our atmosphere, about 1577.

A comet observed by Tycho Brahe and others in 1556. A comet observed from its near approach to the earth was visible from 3 Nov. 1672 to 9 March, 1680. It enabled Newton to demonstrate that comets, as well as the planets, obey the law of gravitation, and are probably moved in elliptic orbits, 1704.

A comet first seen by Klinkenberg at Harelem, 5 Dec. 1743.

Haller's Comet, 1662. Named after one of the greatest astronomers of England. He first proved that many of the appearances of comets were but the periodical returns of the same bodies, and he demonstrated that the comet of 1662 was the same with the comet of 1453, and 1607, deducing this fact from a minute observation of the first mentioned comet, and being struck by its wonderful resemblance to the comets described as having appeared in those years. He first fixed the identity of comets, and predicted their periodical returns. Vinc's Astronomy. The revolution of Halley's comet is performed in about 75 years; it appeared (as he foretold) in the year 1758, and came to its perihelion on March 13; it next appeared in 1835 and last in 1906. Seen at the Königstuhl observatory, Heidelberg, 12 Sept. 1699. Seen by Mr. Newall at the Cambridge Observatory, 24 Oct. 1715.

A most brilliant comet appeared in 1566, which passed within two millions of miles of the earth, first seen by Messer 8 Aug. This beautiful comet, moving with immense swiftness, was seen in London; its tail stretched across the heavens, a cloud, of shining comet, 36,000,000 miles in length.

The computed length of that which appeared in 1811, and which was so remarkably conspicuous, was, on 15 Oct., according to the late Dr. Herschel, up to 1,000,000,000 miles, and it exhibited greatest breadth, at the same time, 15,000,000 miles. It was visible all the autumn to the naked eye. Philos. Trans. Royal Soc. for 1812. Another comet, Dec. 1837.

Lukis's Comet was discovered by Mr. Clain in 1759, Miss Caroline Herschel in 1785, and Tanulis in 1835; rediscovered by Pons, 26 Nov. 1828, but justly named by astronomers after professor Kucke, for his success in detecting its orbit, predicted, and proved true, like the preceding one of the three comets which have appeared according to prediction, and its revolutions are made in 3 years and 17 weeks. Thirteenth return observed at Cambridge by Dr. A. C. Ann. 1875; observed in England, 14 Oct. 1871; seen 13 April, 1873; in New South Wales, 3 Aug. 1852; visible at Washington, N.C., 21-21 Sept. 1857, imperfectly seen by Cerulli and others, 3 Nov. 1875; seen at Cambridge, Mass., 6 Aug. 1879; and at Heidelberg, 5.9. 1891.

Biel's Comet has been an object of fear to many on account of the nearness with which it has approached, not the earth, but a point of the earth's orbit, 27 Feb. 1856. It is one of the three comets whose re-appearance was predicted, its revolution being performed in 6 years and 30 weeks. Its second appearance was in 1802, when the time of its perihelion passage was 27 Nov.; its third was in 1839; its fourth in 1855; and its fifth in 1853; it has since vanished.

Comet discovered by M. Faye at Paris, Nov. 1843; re-appeared over 7 years. Brown's comet discovered by him in 1846.

M. Babinet considered that comets had so little density that the earth might pass through the tail of one without our being aware of it, 4 May, 1857.

Donati's Comet, so called from its having been first observed by the Dominion, of January 6th, 1858, being then calculated to be 123,000,000 miles from our earth. It was very brilliant in England in the end of September and October following, when the tail was said to be 6,000,000 miles long. On the 11th of October it came nearest to the earth; on the 18th it was near coming into collision with Venus. Opinions varied as to this comet's brilliancy compared with that of 1858.

One discovered at Bath, by W. Wingecker, 31 June, 1852.

Lut Creux Comet of 1853 first seen by Mr. Tebbutt at Sydney, in Australia, 13 May; by M. Goldschmidt and others in France and England on 20, 30 June. The nucleus was about 400 miles in diameter, with a long bush-like tail, being about 100 miles high and 300 miles wide, in 24 hours. On 30 June, it was suggested that we were in the tail there being a phosphorescent auroral glare.

A tailless comet was discovered in the constellation Cassiopeia, by M. Smailing, at Athens, on 2 July; and by M. Tempel, at Marseilles, 2 and 3 July, 1857.

A comet detected at Marathon, N.Y., by Mr. Swift, 15 July, and by Rose, at Rome, on 23 July, 1858. It was visible to the naked eye in August and September.

Six telescope comets were observed in 1855, and seven in 1856.

A fine comet appeared in the southern hemisphere, and was visible in South America and Australia, in Jan. Feb. 1859.

Several small comets discovered by various astronomers, 1822-1838.

Comets' Comet, discovered by him at Marseilleilles, 28 April, 1838, became visible near Polaris star in London about 4 July; gradually increased in brightness, and passed out of sight in a few weeks, in Europe; and disappeared at Melbourne, 1 June, 1834.

A bright comet appeared in the southern hemisphere, large nucleus, fan-shaped tail; visible in the southern hemisphere, May; in London, 22 June to Sept. 1831.

COMMERCE. early flourish in Arabia, Egypt, and among the Phoenicians; see the description of the SSS n.s. 1875 xvi. xxxiii. In later times it spread over Europe by a confederation of maritime cities, 1221 (see House Towns); by the discoveries of Columbus; and by the enterprises of the Dutch and Portuguese; see Exports, Imports, and articles connected with this subject.
The first treaty of commerce made by England with any foreign nation was entered into with the Flemings, 1 Edw. I. 1272. The second was with Portugal, 5 Edw. I. 1286. Article. See Trea.tries. Hortelot's Collection, in 16 vols. 8vo, published 1828-85, has a copious index.

Chambers of Commerce originated at Marseilles in the 15th century, and similar chambers were instituted in all the chief cities in France, about 1700. These chambers suppressed in 1791; restored by decree Feb. 6th, 1820.

A chamber of commerce was started by John Weskett, merchant, he receiving payment, about 1792. The chamber of commerce at Glasgow was established Oct. 1785; at Manchester, 1820; Hull, 1837; at Liverpool (mainly through the exertions of Professor Leone Levi), 1849.

Associated (twenty-seven) chambers of commerce (not including Liverpool, Manchester, and Glasgow) met at Westminster for interchange of opinions on various questions, 21 Feb., 1855; annual and other meetings held since.

Commercial Education: conference at the Mansion House to promote the scheme put forth by the London chamber of commerce, 5 Feb., 1892; another at the Guiness, 9 July, 1898; reported successful Nov. 1899; 4th international congress at Venice, 4 May, 1899.

The London chamber of commerce constituted, Sept., issued prospectus about to Oct., 1882; 760 members for general meeting 28 Jan. 1882.

First annual meeting, 24 Jan. 1883 (publishes its report of its special commission on secret communications prevalent in all trades and said to be increasing the Guiness, 9 July, 1898).

The International Congress of Commercial Law met at Antwerp, 1885; Brussels ... 30 Sept. 1888.

Commercial Travellers' Association founded in Manchester, 1875, has many branches in the country. See London Chamber of Arbitration.

Commercial Court. The judges of the Queen's Bench resolved, May, 1894, 'That a Commercial Court should be constituted from amongst themselves; in 1894 they have drawn rules for procedure. It is not authorized by act of parliament, as a matter of convenience it is much resorted to ...' 1905.

Sixth congress of the chambers of commerce of the empire opened in London, Lord Elgin, colonial secretary, president: 300 delegates present, 8 June, 1906.

Commercial Intelligence Office, a branch of the board of trade, instituted Oct. 1874, 'to provide the public with accurate information on all tariff and trade matters.' Statistics of wages, the conditions and amounts of labour, state of the labour market and the social condition of the working classes are collected, with statistics relating to strikes and industrial questions. The Labour Gazette containing such information is published monthly.

Commission, see High Commission Court of.

Commissionnaires, street messengers in Paris. In 1859 a few old soldiers and sailors who had been wounded in the Crimean and Indian Mutiny campaigns were provided with uniforms and formed into a society called 'The Corps of Commissionnaires' by Capt. Edward Walter. The fundamental principles were "thrift" and "self-help." By March, 1864, their numbers had increased to 250, and in that year Capt. Walter appealed to the public for an officers' endowment fund to provide salaries for a staff of officers to assist him. This was liberally responded to, and enabled him to open branches of the corps in several great cities in the United Kingdom. In 1887 the strength had increased to 1,050; in 1905 to 3,000; in 1910, to 3,500, of whom 2,400 are in London. A testimonial from officers of the army and navy was presented to captain Walter in 1884; he was knighted in 1887; K.C.B. in 1889; died Feb. 26, 1904, aged 80. The corps was inspected by Edward VII. at Windsor, June 16, 1907; and by the Prince of Wales at Chelsea hospital, June 27, 1909.

Committees, Standing and Grand, were directed to be appointed by the new rules for procedure passed by the House of Commons in 1882, for facilitating the progress of legislation. The first grand committee (on trade, shipping, &c.) met 9 April, 1883; another (on law, &c.) soon after.

These Committees were re-appointed by the new rule (10), March 1888, and since. See Scotland, April 1894, May 1895.

Common Council of London. The city parliament consists of 260 members, elected annually on St. Thomas's Day, 21 Dec. by the freemen householders of the 26 wards and their aldermen. This court, which appears to have been gradually organized in the 12th century, is mentioned in a charter granted by John, 1214. Seeough Monday. A Common Hall is held occasion. The common council supported the principle of Orange in 1883, and Queen Caroline in 1880. It vigorously opposed the scheme for amalgamation with the London County Council, 1893. Agrees, under certain conditions (widening of Blackfriars Bridge), with the London County Council in its proposal embodied in bill (rejected by house of lords, Aug. 1903) to extend the southern system of tramways over Blackfriars bridge and along the Victoria embankment, June, 1905.

Common Law of England, an ancient collection of unwritten maxims and customs (leges non scriptae), of British, Saxon, and Danish origin, which has subsisted immemorially in this kingdom; and although somewhat impaired by the code of the Norman conquerors, yet endured the violence of the times. At the parliament of Merton, 1236, "all the earls and barons," says the parliament roll, "with one voice answered that they would not change the laws of England, which have hitherto been used and approved"; eminently the law of the land, which has been supported by the reports of the common pleas and the statutes passed by parliament, see Bastard. The process, practice, and mode of pleading in the superior courts of common law were amended in 1852 and 1854.

Common Pleas. Court of, in England, in ancient times followed the king's person, and is distinct from that of the King's Bench; but on the grant of Magna Charta by king John, in 1215, it was fixed at Westminster. In 1855 the mode of procedure in all the superior courts was made uniform. In England, no barrister under the degree of sergeant could plead in the court of common pleas; but in 1846 the privilege was extended to barristers practising in the superior courts at Westminster. Sat last, July, 1875. By an order in council, 1875.
Dec. 1880, the courts of exchequer and common pleas were founded, and were consolidated into one called the "Queen's bench division," under the lord chief justice of England. By the Act 44 and 45 Viet., see, 68, passed 27 Aug. 1851, the lord chief justice was endowed with the powers of the chief justice of common pleas and the chief baron of the exchequer.

| 1911 | The last chief justice of the common pleas was Lord Justice Simon de Montfort, first created earl of Leicester, by the Provisions of Oxford. Ordered returns are not to be made of two knights from every shire, and deputees from certain boroughs, to meet such of the barons and clergy as were his friends, with a view thereby to strengthen his own power in opposition to that of his sovereign Henry III, 1258. See Parliament. In 1859 Mr. Nurnmarch estimated the constituency of England and Wales at 9,000,000. It was largely increased by the reform act of 1867, which limit parliamentary electors, 1822: England and Wales, boroughs, 1,250,000; counties, 800,000. Scotland, burghs, 40,000; counties, 700,000. England, boroughs, 174,000; counties, 175,439. Total, 2,526,052. By the Franchise Act of 1884, the electors of the United Kingdom were increased to about 5,000,000, and many changes were made by the Redistribution Act of 1885. COMMONS. In 1868, of the 37,500,000 acres of land in England, about 18,000,000 were meadow, forest, and fen. In 1727, about 3,000,000 acres more had been brought into cultivation; and from that time to 1844, by means of 4000 private acts of parliament, about 7,000,000 acres more were enclosed. Since the inclusion act of 1845—

* In 1844 Sudbury, and in 1852 St. Albans, were disfranchised for bribery and corruption, each having previously returned two members; the aggregate number of the house then became 624. In 1851, the forfeited seats were thus distributed by act of parliament—two additional to the west riding of York, one additional to South Lancashire, and one to a newly created borough, Birkenhead.

1 Disfranchised and replaced, 1867: Lancaster, York, Dorset, Totnes, and Reigate.—Disfranchised, 1870: Beverley and Bridgewater, each two members; Cashel and Sligo, each one member; 162 members, 1878: 12 members short, through void elections, Aug. 1886.

which established commissioners, another 1,000,000 acres have been enclosed.

Act for improvement, protection, and management of commons near the metropolis, passed, Aug. 1866. The Commons Preservation Society, established 1865, elected Wm. Cooper presidency. Feb. 1867 Metropolitan commons act, to prevent enclosure in the neighbourhood of London, passed, 1865 and 1869.

It is stated that there are 900,000 acres of common land capable of cultivation in England and Wales, Aug. 1874.

Act for the regulation of commons, passed, 21 Aug. 1870: Mr. de Morgan, active opponent of enclosures, imprisoned for contempt of court (The Rolls). Jan. 1878 Metropolitan Board of Works authorised to secure commons, etc., by act passed, 1878.

About 14,000 acres of land near London preserved by the agency of the Commons Preservation Society reported at the annual meeting on 16 Dec. 1866.

Law of commons amendment act requires consent of the board of agriculture before enclosure, 1891. By the House's act passed in 1831, power was given to any lord of the manor to acquire possession of any part of any commons over which his rights extend, in order that the secretary of state for war may establish ranges for rifle practice, &c., with regulations.

New Commons act (to preserve open spaces for the public) passed, 1890.

COMMONWEALTH of ENGLAND, the term applied to the interregnum between the death of Charles I. and the restoration of Charles II. A republic was established at the execution of Charles I., 30 Jan. 1649,—a new oath called the “Engagement” was framed, which all officials were obliged to take; *Salmon. Oliver Cromwell was made protector, 16 Dec. 1653 (see *Natus); succeeded by his son Richard, 3 Sept. 1660. Monarchy was restored 8 May, and Charles II. entered London, 29 May, 1660. COMMONWEALTH of AUSTRALIA constitution act, royal assent, 9 July, 1900; see *Australia.

1 By this oath they swore to be true and faithful to the Commonwealth, without king or house of lords. The statues of Charles were next day demolished, particularly that at the Royal Exchange, and one at the west end of St. Paul's; and in their room the following inscription was conspicuously set up:—"Exi Tyrannis Regum ultimus. Auto Libertatis Anglie Restitutae Primo. Auto Tuo. 1649, Jan. 30."
COMMUNALISTS, or COMMUNISTS, propose to divide France into about a thousand small thoroughly independent states, with councils elected by all the populations, Paris to be the ruling head. They declare that capital and its holders must be adapted to nobler uses, or cease to exist. Their creed is stated to be atheism and materialism. They are intimately connected with the International Society of workmen (see Workmen), and with the communists or socialists (1871-3).*

COMMUNES, in France, are territorial divi-
sions under a mayor. In the 18th century the name was given to combinations of citizens, favoured by the crown, against the exactions of the nobles. In 1789, during the English invasion, vainly endeavoured to establish a confederation of sovereign cities, having Paris as the governing head; and for six months it was really governed by a commune in 1588. After the insurrection of July, 1789, the revolutionary committee which replaced the city council took the name of "commune of Paris," Potting being mayor. It met at the Hôtel de Ville, and was definitely constituted, 21 May, 1791. It had great power under Robespierre, and fell with him 17 July, 1794; being replaced by twelve municipalities. The commune of Paris was proclaimed 28 March, 1871, during the insurrection, which began 18 March, and ended with the capture of the city by the government troops, 28 May following. 223 communities were pardoned by decree issued 17 Jan. 1874; and many others afterwards. A number re-entered Paris, 3 September following. For the events of the communal rule in Paris, see France, 1871. Louise Michel, "Red Virgin," died 175. See Socialism.

COMMUNION, a name given to the ordinance of the Lord's Supper, 1 Cor. x. 16. Communicating under the form of bread alone is said to have had its rise in the west, under pope Urban II., 1096. The cup was first denied to the laity by the council of Constance, 1415-18. The fourth Lateran council, 1215, decreed that every believer should receive the communion at least at Easter. The communion service of the church of England was set forth in 1549.

COMPANIES. The London trade companies were gradually formed out of the trade or craft guilds, mainly by the exertions of Walter Harvey, mayor, in 1272, who is said to have been very active in enlarging and maintaining the liberties and privileges of the city. The original religious element in the companies gradually disappeared. Among the earliest commercial companies in England may be mentioned the Guild- of Vicarage, established 1232. The second company was the merchants of St. Thomas à Becket, in 1238. See The Merchant Adventurers, incorporated by Elizabeth, 1574. Mr. Edward Arnold's Early Chartered Companies, published July, 1856. The following are the city companies of London, the first twelve are in the original style of "the honourable." Many companies are extinct, and many dates are doubtful. An inquiry into their affairs was partially resisted by them in 1855. In 1869 the gross income of the endowed charities of the city companies was stated to be above 90,000l. A motion in the commons for inquiry into the revenues and other affairs of 89 companies, by Mr. W. H. James, withdrawn, 23 May, 1876. A commission of inquiry was appointed (the earl of Derby, duke of Bedford, lords Coleridge and Sherbrooke, sir R. A. Cross, &c.), 14 July, 1880. Five reports issued with recommendations for reform, 1884-5.

In 1582, forty men and about 10,000 freemen, estimated annual income about 750,000l., expended in maintenance, education, and charities; about 25,000l. spent in entertainments.

Grants from the companies to the City Guilds of London Institute—Goldsmiths 45,000l., Drapers 43,000l., Clothworkers 37,000l., Fishmongers 34,000l., Mercers 22,000l., Grocers 10,000l.; for technical education, Ac.,—Drapers 10,000l., Goldsmiths 35,000l., Mercers 60,000l., and others promised, 1783-88.

COMPASS, MARINER'S, said to have been early known to the Chinese, 1115 B.C., and brought to Europe by Marco Polo, a Venetian, 1260 A.D. Flavio Gioja, of Amalfi, a navigator, of Naples, is said to have introduced the suspension of the needle, 1322. The compass is said to have been known to the Swedes in the time of king Karl Birger, 1250. Its variation was discovered first by Columbus, 1422; afterwards by Sebastian Cabot, 1540. The compass-box and hanging compass used by navigators were invented by William Barlowe, an English divine and natural philosopher, in 1608; see Magnetism. The measuring compass was invented by Jost Bing, of Hesse, in 1602.

The compass of sir William Thomson (lord Kelvin), patented in 1876, is considered the best. The Eöy compass, constructed so as to be unaffected by the magnetism inseparable from an iron ship, reported successful, Feb. 1909.

The first compound radical isolated was cyanogen (which see), by Gay-Lussac, in 1815; see Azul, Ethyl, and Methyl.

Opposition to this dogma was forbidden by decree of pope Paul V. in 1617, confirmed by Gregory XV. and Alexander VII. Heinault. On 8 Dec. 1854, pope Pius IX. promulgated a bull, declaring this dogma to be an article of faith, and charging with heresy those who should doubt it or speak against it. The Conceptionists were an order of monks in Italy, established in 1498; see Sintini.

CONFEDERATION OF RHINE.

CONFEDERATION OF RHINE. (I. con together, claus a key.)

A meeting of persons shut up to consult in privacy.

The term is now specially used to signify the assembly of cardinals locked up in apartments of the Vatican till they have elected a pope. The practice is said to have been instituted by Alexander III. in 1179. Clement IV. having died at Viterbo in 1268, the cardinals were unable to agree in the election of a successor. In 1271 they were on the point of breaking up, when the magnates, by the advice of St. Bonaventura, shut the gates of their city, and locked up the cardinals, upon which Gregory X. was elected. This pope in 1274, with aid from a council, formulated rules for the exclusion of cardinals during a papal election, which, with slight modifications, are still adhered to. Small cells are erected in a hall of the Vatican, with access to the Sistine chapel, in which the votes (by ballot) are cast. All doors but one are built up, every possible outlet being strictly guarded. The day after the death of a pope the cardinals are locked up in these apartments and do not come out until from among their number a pope has been chosen.

The latest concclave was on July 31, 1903, when the Sacred college to the number of 42 cardinals entered the conclave; on Aug. 4 Cardinal Sarto (who has taken the name of Pius X.) was elected pope in succession to Leo XIII.

CONCORD (Massachusetts, N. America). New April was fought the battle of Lexington (which see), 19 April, 1775.

CONCORDANCE. An index or alphabetical catalogue of all the words and also a chronological account of all the transactions in the Bible. The first concordance was made under the direction of Hugo de St. Caro, who employed as many as 500 monks upon it, 1257. Abbé Lenglet. It was based on one compiled by Anthony of Padua. Thomas Gibson's "Concordance of the New Testament," published, 1535. John Murbeck's "Concordance" (for the whole Bible), 1550. Two Concordances (with royal privileges), by Robert Free, appeared in 1578. Cruden's Concordance was published in London in 1777. Dr. Robert Young's valuable "Analytical Concordance to the Bible," 1785-90. 7th ed. The index to the Bible, published by the King's printers and others, prepared by B. Vincent, 1818, still in use 1845.

CONCORDAT. An instrument of agreement between a prince and the pope, usually concerning benefices. The concordat between the emperor Henry V. of Germany and pope Calixtus II. in 1122, has been regarded as the fundamental law of the church in Germany. The concordat between Napoleon Bonaparte and Pius VII., signed at Paris, 15 July, 1801, re-established the Catholic church and the papal authority in France. Napoleon was made in effect the head of the Gallican church, and Bonaparte was to have 500,000 francs annually from him, and their investiture from the pope. Another concordat between the same persons was signed at Fontainebleau, 25 Jan. 1813. These were almost nullified by another, 22 Nov. 1817. A concordat, signed 18 Aug. 1855, between Austria and Rome, by which a great deal of the liberty of the Austrian church was given up to the papacy, caused much dissatisfaction. In 1868 it was virtually abolished by the legislatures of Hungary and Austria. See France, 1803 and 1866.

CONDÉ, Louis I. de Bourbon, prince of brother of Antony of Bourbon, king of Navarre, was born 7 May, 1536; representative of an ancient race, taking their name from the town of Conde, distinguished in the wars against Philip the Huguenots, taken prisoner at the battle of Jarnac, and killed by the baron de Montesquieu (1569). Louis II. de Bourbon, "the Great Condé," born, 8 Sept. 1621, commander of the French forces in the Thirty Years war, defeated the Spaniards at Rocroi, a brilliant victory (1643), and others. 1644-8. Retired finally to Clamart, about 1675, and died, 11 Dec. 1686. "Histoire des princes de Condé," by the due d'Anville, published 9 vols., 1805-96.

CONDOTTIERI, conductors or leaders of mercenaries, termed five companies or lances, which during so troublesome an age, cities formed a league to suppress them in 1342. Many ravaged France after the peace of Bretigny, in 1360.

CONDUITS. Two remarkable conduits, among a number of others in London, existed early in Cheapside. The "great conduit" was the first cistern of lead erected in the city, and was built in 1525. At the accession of Anna Bolena, on the occasion of her marriage, it ran with white and clear wine all the afternoon, 1 June, 1533-34.

CONFEDERATE STATES OF NORTH AMERICA. The efforts of the Southern States for the extension of slavery, and the dissolution of the States for its abolition, with the consequent political divisions, led to the great secession of 1860-1. On 6 Nov. 1860, Abraham Lincoln, the Republican or Abolitionist candidate, was elected president of the United States. Hitherto, a president in the interest of the South had been elected. On 20 Dec., South Carolina seceded from the Union; Georgia, Florida, Mississippi, Louisiana, Texas, Virginia (except West Virginia), Arkansas, Tennessee, and North Carolina also. Jefferson Davis was inaugurated president of the Southern Confederacy at Montgomery in Alabama, 18 Feb. 1861. For the events of the war which ensued, and the disintegration of the Southern States to the Union, see United States, 1861-5.

CONFEDERATION AT PARIS, 14 July, 1791; see Champ de Mars and巴士底行.

The princes collectively engaged to raise 250,000 troops to serve in case of war, and established a diet at Frankfort. This league of the Germanic States at the Congress of Vienna in 1815; and in 1815 it was replaced by the Germanic Confederation (which see, and Germany).
CONGO.

In 1810 Leslie used an air-pump in combination with a vessel of sulphuric acid. Numerous freezing mixtures have been discovered since. Intense cold is produced by the aërisation of liquefied carbonic acid gas. Ice-making machines invented by Jacob Perkins 1834, John Gorrie 1848, and others. In 1855 Jas. Harrison patented a machine for manufacturing ice for commercial purposes, by means of ether and salt water, and made large blocks. In 1860, M. Carre devised a method of freezing to 60° below zero by making water in a close vessel absorb and give off the gas ammonia. Siebe's ice-making machine, an improvement on Harrison's, exhibited in use 1861-80. R. Reece liquefied ammonia by compression and vaporised it in a closed vessel surrounded with the liquid to be cooled, 1868. Prof. Linde of Munich followed up this principle and produced an ammonia compression machine, 1873. Compression machines, ammonia or carbonic acid, are now, 1895, in general use in all parts of the world.

Congo. The mouth of the river Congo, S.W. Africa, was discovered by the Portuguese in 1483, and they have ever since claimed territories in the neighbourhood, having founded settlements, and sent missionaries, with temporary success. The river, which is about 3,000 miles long, and has a basin of 1,300,000 square miles, is navigable 110 miles to the rapids at Banana. Other parts navigable by shallow draught vessels, besides 5,000 miles of navigable tributaries. Dr. Livingstone explored the Congo, 1857-71. The natives on its bank and on the creeks having railed the Geraldtine and committed other acts of piracy, were chastised by an expedition under Commodore Sir Wm. Hewett, 3-11 Sept. 1875. Several villages and chiefs' houses were destroyed. "Sleeping sickness," a terrible fatal disease, for which no remedy has been discovered, has of recent years almost depeopulated large districts, particularly on the Lower Congo (which see). The independent State of the Congo was founded in 1882 by the king of the Belgians, Leopold II., and was recognized as a State by the European powers at a conference at Berlin in 1885. The annexation of the State to Belgium was settled by treaty November 28, 1897, and has been recognized by all the powers excepting Great Britain and the United States of North America. The area of the colony is estimated 664,654 square miles; population about twenty millions. European population, January, 1910, estimated at 3,000. Principal exports are rubber, ivory, palm-nuts, cocoa, gold and copper ore. Capital, Boma. Revenue, 1918, 1,415,120£; expenditure, 1,369,838£. Imports, 1918, 2,353,596£; exports, 4,009,500£. Public debt, 8,579,393£. The great Congo river and its many navigable tributaries are the leading feature of the State.

French Congo extends along the Atlantic coast between the German Kamerun colony and the Congo Free State, with the exception of the Spanish territory on the coast of the Muni river. French acquisition began in the year 1884. The area is about 694,000 square miles; population estimated at ten millions.

Angola (Portuguese) has a coast line of about 1,000 miles and is separated from the French Congo,

The first general congress of the United States of America, preparatory to their declaration of independence, when strong resolutions were passed, also a petition to the king, and an address to the people of England, was held, 5 Sept. 1774. The second was held, 20 May, 1775; the third, when the independence was declared, 4 July, 1776, he first federal American congress, under the constitution, was held at New York; George Washington, president, to March, 1789. The first congress of the succeeding southern states was held at Montgomery, Alabama, 4 Feb.; it elected Jefferson Davis president of the confederate states on 4 Feb. For political reasons it adjourned on 24 May, to meet at Richmond, in Virginia, on 20 July, 1861.

In 1863, the emperor Napoleon invited the sovereigns of Europe to a congress; which was declined by England 25 Nov. and only conditionally received by other powers. He proposed a congress on the affairs of Italy and Rome in Nov. 1877, without effect.

**CONSECRATIONS.** see Wither cott.

**CONJURERS.** see under Wizard.

**CONNAISSANCE DES TEMPS.** the French auxiliary work, continuing Becker's Ephemerides, was first published by Freind, 1770.

**CONNAUGHT,** W. Ireland; long a nominal kingdom, divided into counties, 1296. Prince Arthur, third son of queen Victoria, born 1 May, 1832, was created duke of Connaught, 23 May, 1871; being the first royal prince whose leading title was Irish.

The Duke of Connaught's Establishment Act, passed 8 Aug., 1872, made the same provision for the duke as for his brother Albert; see Edinburgh. The dukedom was married to the princess Louise Margaret of Prussia, 13 March, 1859. *See England (Royal Family).*

**CONNECTICUT,** a New England state of N. America. The settlements of 1635 and 1638 were united by charter in 1665. Capital Hartford. Population 1900, 508,420, 1910 (est.) 1,000,000.

Trestle bridge accident, car overturned, 36 deaths, reported, 29 Aug., 1899. Great fire at Waterbury, buildings destroyed, over 4,000,000 dols. damage, 2 Feb. 1902.

**CONNOR,** Ireland. The bishopric was united to that of Down, 1442. The first prelate, Eganus Macsenus, died 98. The united sees were added to Dromore on the death of its last bishop, 1842, in accordance with the Irish church temporalities act, 1833.

**CONQUEST,** the era in British history, when William duke of Normandy overcame Harold II. at the battle of Hastings, 14 Oct. 1066, and obtained the crown which he asserted had been bequeathed to him by Edward the Confessor (Edgar being the rightful heir). William has been erroneously styled the *Conqueror,* for he succeeded to the crown of England by compact. He defeated Harold, who was himself a usurper, but a large portion of the kingdom afterwards held out against him; and he, unlike a conqueror, took an oath to observe the laws and customs of the realm, in order to induce the submission of the people. Formerly our judges were accustomed to reprobate any gentleman at the bar who said casually William the *Conqueror,* instead of William I. *Seignor.* Malice exhibited forty-two drawings on the events of the Norman conquest, in May, 1857.

**CONSCIENCE CLAUSE.** see Education, 1863, 1868-2, and Vaccination, 1868.

**CONSCIENCE, COURTS OF, or OF QUESTS for recovery of small debts, constituted by a stat. of Hen. VII. 1491, and re-organised by stat. 9 Hen. VIII. 1517. These courts were improved and amended by various acts; their jurisdiction in London reached to 5l., and (until superseded by county-counts) to 40s. in other towns. The practice was by summons, and if the party did not appear, the commissioners had power to apprehend and commit; see County Courts.

**CONSCIENCE, LIBERTY OF,** a principle of genuine Christianity (1 Cor. x. 20) repudiated by Romanism, proclaimed by James II. for political purposes, 1687.

**CONSCRIPT FATHERS** (pater conscripti), the designation given to the Roman senators, because their names were written in the registers of the senate.

**CONSCRIPTION,** a mode (derived from the Romans) adopted for recruiting armies on the continent. On 5 Sept. 1798, a military conscription was ordained in France, comprehending all the young men from 20 to 25 years of age, from whom selections were made. A conscription for 350,000 men took place in Jan., 1814, after the disastrous Russian campaign, and in Dec., same year another for 350,000 after the battle of Leipzig. Estimated conscription, 1793-1813, 4,103,000. The law of 1818 (modified in 1824, 1832, and 1868) required a certain annual contingent for each department. The conscription was enlarged and modified by the army bill which was enacted in Feb. 1868. The re-organisation of the army began in 1871, after the fatal war with Germany. Substitutes allowed under certain conditions. Conscription for Great Britain advocated and strongly opposed in 1875, and since, Lord Roberts and others strongly favour compulsory service, 1869.
CONSECRATION.

Aaron and his sons were consecrated priests, 1490 B.C. (Lev. viii.) The Jewish tabernacle was dedicated, 1490 B.C., and Solomon the temple, 1094 B.C. (1 Kings viii.) The consecration of churches began in the 2nd century. Anciently the consecration of popes was deferred until the emperor had given his assent to their election. Gregory IV. desired to have his consecration confirmed by the emperor Louis, in 828. *Héaulmi.* The consecration of churches, places of burial, &c., is admitted in the reformed religion. An act relating to the consecration of churches and chapels, passed 20 Aug., 1867, was amended in 1868. A form of consecration was adopted by convocation, but not sanctioned by the crown, April, 1712. It is generally used but is not compulsory. *Burn.* The form of consecrating bishops in the church of England is set forth in the prayer-book of 1549.—*Stowe.*

CONSERVATION OF FORCE. The doctrine that no physical force can be created or destroyed, but may be transferred, maintained by Faraday, Grove, Helmholz, Tyndall, and other scientists; see *Correlation.*

CONSERVATIVES. A name said to have been invented by John Wilson Croker,* an earnest Tory, in 1830, assumed by a party whose leading principle is the preservation of our national institutions. It was termed a new cant word by T. B. Macaulay in *Edinburgh Review,* July, 1832. Sir Robert Peel acknowledged himself a conservative when re-elected to the Irish party in parliament with being an Orange man, but the party that afterwards separated from him called their principles conservative in contradistinction to his—his policy and measures being changed.—The *Conservative Club* was founded in 1830; see *Protectionists and Clubs.* The party in the north of the United States which supported the president in his conciliatory efforts to re-establish the Union, Jan. 1866, were termed "Conservatives." See *Derby and Disraeli, Fourth Party, Liberals* (1886), *National Union, Salisbury administrations, Balfour administration,* &c.

Testimonial of 10,000L, presented by lord Salisbury from the conservative party to cnt. Middleton, R., (see agent) 19 March, 1896. Meeting of the unionist party held at Lansdowne-house on the opening of the new parliament; about 650 persons were present, Mr. Raffour presiding... 15 April, 1906.

CONSERVATOIRES. A name given to establishments for the cultivation of music and the arts on the continent. One was established at Naples in 1537. The singing school at Paris, founded in 1754, and closed in 1789, was re-opened in 1793 as the "Institut National de Musique," and after being re-organised, was re-named "Conservatoire de Musique" in 1795, and flourishing under Cherubini (1822-42). "The Conservatoire des Arts et Métiers" was established in 1784. It includes a museum and library, and lectures are given to workmen there.

CONSERVATORS OF THE PUBLIC LIBERTIES. Officers chosen in England to inspect the treasury and correct abuses in administration, 18 Hen. III. 1241.—*Rapin.* Conservators were appointed to see the king's peace kept.—*Pardon.* Conservators were formerly appointed in every seaport to take notice of all offences committed against the peace upon the main sea out of the liberty of the Cinque Ports.—*Bailey.*

CONSISTORIES. For regulating ecclesiastical discipline and divine worship in the Lutheran church in Germany, were established at the reformation—the first at Wittenberg in 1542; other consistories were established after the peace of Augsburg in 1555.

CONSISTORY COURT, anciently joined with the hundred court; and its original, as divided therefrom, is found in a letter of William I., 1079, quoted by lord justice Coke. The chief and most ancient consistory court of the kingdom belongs to the see of Canterbury, and is called the Court of Arches (which see).

CONSOLIDATED FUND was formed by combining the "aggregate," "general," and "South Sea funds," 1786. On 5 Jan., 1816, the exchequers of Great Britain and Ireland, previously separate, were amalgamated, forming "the consolidated fund of the United Kingdom." Acts are passed annually for the appropriation of the fund.

CONSPIRACY AND PROTECTION TO PROPERTY ACT, passed 13 Aug. 1875: relates to trade disputes, breaches of contract, &c.

CONSTABLE OF ENGLAND, LORD HIGH.
The seventh great office of the crown, and, with the earl marshal, formerly a judge of the court of chivalry, called, in the time of Henry IV., curia militis, and hence a necessary court of honour. The power of this office was so great that in 1386 a statute was passed for abridging it, and also the power of the earl marshal (which see). The office existed before the conquest, after which it went by inheritance to the earls of Hereford and Essex, and next in the line of Stafford. In 1521 it was forfeited to Earl Stafford, duke of Buckingham, attained for high treachery and has never since been granted to any person, otherwise than pro hac vice (for this occasion), to attend at a coronation or trial by combat. The only instance of a trial by combat being ordered since this office fell into the hands of the crown, was that commanded between lord Reay and David Ramsay, in Nov. 1631; but the king prevailed.

LORD HIGH CONSTABLES AT CORONATIONS.

Queen Anne, Windesley, duke of Bedford
George I., John, duke of Montague
George II., Charles, duke of Richmond
George III., John, duke of Bedford
George IV.
William IV.
Arthur, duke of Wellington
Victoria
Edward VIII., Alexander, duke of Fife

CONSTABLE OF SCOTLAND, LORD HIGH.
The office was instituted by David I., about 1147. The holder had the keeping of the king's sword, which the king, at his promotion, delivered to him naked and hence the badge of the lord high constable is a naked sword, and the absolute command of the king's armies while in the field, in the absence of the king. The office was conferred heritably in 1314 on sir Gilbert Hay by Robert Bruce. One of Hay's descendants was made Earl of Errol, and with his family the office still remains, being expressly reserved by the treaty of union in 1707. The present earl of Errol is the twenty-third lord high constable (1862).

CONSTABLES of Hundreds and Franches, instituted in the reign of Edward I., 1285, are now called high constables. There are three kinds of high constables, high, petty, and special; the high constable's jurisdiction extends to the whole hundred; the petty constables to the parish or liberty for which he is chosen; and the special constable is appointed for particular emergencies (as in April, 1838, on account of the Chartists). The general appointment of parish constables was made unnecessary by an act passed Aug. 1872. See Special Constables and Terrors.

CONSTABULARY FORCE. For that of London, see Police. The constabulary of Ireland act passed in 1829, when this species of force was established throughout the country. CONSTITUTIONS.

CONSTITUTION OF ENGLAND. It comprehends the whole body of laws by which the British people are governed, and to which it is presumptively held that every individual has assented. Lord Somers. This assemblage of laws is distinguished from the term government in this respect—that the constitution is the rule by which the sovereign ought to govern at all times; and government is that by which he does govern at any particular time. Lord Bolingbroke. The king of England is not seated on a solitary eminence of power: on the contrary, he sees his equals in the co-existing branches of the legislature, and he recognises his superior in the law. Sheridan.

CONSTITUTIONALIST PARTY, a name assumed by a combination of Conservatives and seceded Whigs. Aug. 1857; and used during the severely contested elections, Nov. 1868. The Constitutional Union held its first anniversary 26 June, 1881.

Their operation was suspended in consequence of a resolution of the house of commons, 20 April, 1883, and they were repealed, 16 April, 1886; see India, 22 July, 1897. For contagious diseases of animals, see Cattle.

CONTEMPORARY REVIEW, founded by Mr. A. Strahan; first appeared Jan. 1866; editor Dean Alford.

CONTINENTAL SYSTEM, the name given to Napoleon's plan to exclude the British merchandise from the entire continent. It began publicly with his Berlin decree, 20 Nov. 1806, confirmed by the Milan decree, 17 Dec. 1807. This led to the Orders in Council (which see).

CONTINUITY. Mr. (after sir) W. R. Grove, in his address as president of the British Association, on 22 Aug. 1866, at Nottingham, expounded the opinion held by many philosophers, that all the past changes in the world have been produced by the continuous action of the causes now in operation—that "continuity is a law of nature, the true expression of the action of an Almighty Power."

Those who hold this opinion are termed Uniformitarians; their opponents are termed Cataclysmists, who attribute the changes to the violent action of fire and water.

CONTRABAND OF WAR, a term said to have been first employed in the treaty of Southampton between England and Spain in 1625. During the struggle between Spain and Holland, both powers acted with much rigour towards ships of neutrals conveying goods to the belligerents. This provoked the resistance of England. A mililiar policy was adopted by the treaty of Pyrenees, 1650; and by the declaration of Paris, 26 April, 1856. The subject was much discussed during the North American conflict, 1861-5, in April, 1868, and in 1904-5, during the Russo-Japanese war.

One, in 1798, to support the war against France, amounted to two millions and a half sterling. For India, &c., see Mansion House.

CONTROL. BOARD OF, Mr. Pitt's hill, establishing this board for the purpose of aiding and controlling the executive government of India, and of superintending the territorial concerns of the company, was passed 18 May, 1784. Act am yed and the board remodelled, 1793. The president of the board was a chief minister of the crown and necessarily one of the members of the cabinet. This board was abolished in 1856, when the government of India was transferred from the company to the crown; see India Hills, and India.

Persons attending them were liable to severe punishment. The statutes were repealed by the toleration act, 24 May, 1689.

CONVICTS, see Transportation.

CONVOLUTIONS, the ancient general assembly of the clergy of the nation, convened by the sovereign's writ, to consult on the affairs of the church; the writ is directed to the archbishop of each province requiring him to summon all the bishops, archdeacons, &c. The convention is divided into two houses, the upper, consisting of bishops; and lower, consisting of deans, archdeacons, and members (termed proctors) elected from the inferior clergy. The clergy were summoned to meet the king by writ, 25 Edw. I. 1294. The power of the convention was limited by a statute of Henry VIII., in whose reign the convention was reorganised. The two houses of convention were deprived of various privileges, while the upper house was abolished in 1788. In 1854, a new act was passed, and the annual meetings of the clergy held during the sitting of parliament were revived in the province of Canterbury 1852, and York 1861, and fruitless attempts have been made to obtain the power of dealing sumingly with ecclesiastical affairs; but in Feb. 1873, convention was authorised to deliberate respecting alterations in the Liturgy; upon which it sat in 1873; again in 1879; Petition to the queen for reform of convention, Nov. 1882.

Convocation relieved from the jurisdiction of the secular courts by Richard III., 1483. The Archbishop of York's claim for this in regard to elections (in the case of Canon Erasmus) confirmed by the Queen's Bench Division, Nov. 1857. See Langton, House of, which first met 16 Feb. 1822.

In 1098 n.c. a calf was cooked by Abraham to entertain his guests (Gen. xviii. 7, 8). "The Forme of Cury" (i.e. cookery) is dated 1390. An English cookery-book was printed 1498. "The Boke of cooke made plain and easy," by a lady (Hannah Giles), 1577. "Mrs. Becton's Book of Household Management," new edit. 1610.

Military cookery. Capt. Grant devised a system of cooking for the camp at Aldershot, which has continued in successful operation for the service of between 7,000 and 16,000 men. From April to August, in 1875, the system was subjected to the severe test of cooking for 90,000 men, who marched in and out of the encampment during that period. The construction of fuel requisites for this system of cooking was one half-pound of coal per man per day, and the official report states the cost to be one halfpenny per man per week for the three daily meals.

Self-supporting Cooking Depots for the working classes were set up at Glasgow (by Mr. Thomas Corbett), 21 Sept. 1867, and proved successful in Manchester, London, and other places soon after.

Three medals were awarded to the Norwegian self-factoring cooking apparatus (Sorenson's patent) at the Paris Exhibition, 1878. Cooking is effected by boiling water, the heat of which is maintained by enclosing it in a non-conducting substance.

A School of Cookery was opened at the international exhibition, South Kensington, 14 April, 1873.

A National Training School for Cookery, proposed 17 July, 1873, was established in 1874.
